**A Journey Through Art** Aaron Rosen 2018-04-17 A child's introduction to art history through the centuries and across the globe A Journey Through Art is a global history of art with a time- travel twist, taking young readers on a expedition from the Paleolithic period to the present day, voyaging to thirty locations around the world. As readers travel from one incredible destination to the next, they discover the amazing network of caves carved into the rock in AD 500 at Ajanta, India; Cambodia's Angkor Wat as it stood in AD 1200; the glories of Renaissance Florence in AD 1500; and the remarkable energy of New York in the 1950s. At every location readers encounter stories of artworks and the cultures that surrounded them. The journey is chronological with three sections: prehistoric and ancient; medieval and early modern; and modern and contemporary. Two beautifully illustrated spreads showcase each destination, allowing children to engage with the art, artifacts, and culture of a unique place in time as Aaron Rosen tells the story of how art developed across the world.

**Year Zero** Ian Buruma 2014-09-30 A marvelous global history of the pivotal year 1945 as a new world emerged from the ruins of World War II Year Zero is a landmark reckoning with the great drama that ensued after war came to an end in 1945. One world had ended and a new, uncertain one was beginning. Regime change had come on a global scale: across Asia (including China, Korea, Indochina, and the Philippines, and of course Japan) and all of continental Europe. Out of the often vicious power struggles that ensued emerged the modern world as we know it. In human terms, the scale of transformation is almost impossible to imagine. Great cities around the world lay in ruins, their populations decimated, displaced, starving. Harsh revenge was meted out on a wide scale, and the ground was laid for much horror to come. At the same time, in the wake of unspeakable loss, the euphoria of the liberated was extraordinary, and the revelry unprecedented. The postwar years gave rise to the European welfare state, the United Nations, decolonization, Japanese pacifism, and the European Union. Social, cultural, and political "reeducation" was imposed on vanquished by victors on a scale that also had no historical precedent. Much that was done was ill advised, but in hindsight, as Ian Buruma shows us, these efforts were in fact relatively enlightened, humane, and effective. A poignant grace note throughout this history is Buruma's own father's story. Seized by the Nazis during the occupation of Holland, he spent much of the war in Berlin as a laborer, and by war's end was literally hiding in the rubble of a flattened city, having barely managed to survive starvation rations, Allied bombing, and Soviet shock troops when the end came. His journey home and attempted reentry into "normalcy" stand in many ways for his generation's experience. A work of enormous range and stirring human drama, conjuring both the Asian and European theaters with equal fluency, Year Zero is a book that Ian Buruma is perhaps uniquely positioned to write. It is surely his masterpiece.

**Journey through Mathematics** Enrique A. González-Velasco 2011-08-08 This book offers an accessible and in-depth look at some of the most important episodes of two thousand years of mathematical history. Beginning with trigonometry and moving on through logarithms, complex numbers, infinite series, and calculus, this book profiles some of the lesser known but crucial contributors to modern day mathematics. It is unique in its use of primary sources as well as its accessibility; a knowledge of first-year calculus is the only prerequisite. But undergraduate and graduate students alike will appreciate this glimpse into the fascinating process of mathematical creation. The history of math is an intercontinental journey, and this book showcases brilliant mathematicians from Greece, Egypt, and India, as well as Europe and the Islamic world. Several of the primary sources have never before been translated into English. Their interpretation is thorough and readable, and offers an excellent background for teachers of high school mathematics as well

as anyone interested in the history of math.

**We Don't Know Ourselves: A Personal History of Modern Ireland** Fintan

O'Toole 2022-03-15 "[L]ike reading a great tragicomic Irish novel." —James Wood, *The New Yorker* "Masterful . . . astonishing." —Cullen Murphy, *The Atlantic* "A landmark history . . . Leavened by the brilliance of O'Toole's insights and wit." —Claire Messud, *Harper's Winner • 2021 An Post Irish Book Award — Nonfiction Book of the Year •* from the judges: "The most remarkable Irish nonfiction book I've read in the last 10 years"; "[A] book for the ages." A celebrated Irish writer's magisterial, brilliantly insightful chronicle of the wrenching transformations that dragged his homeland into the modern world. Fintan O'Toole was born in the year the revolution began. It was 1958, and the Irish government—in despair, because all the young people were leaving—opened the country to foreign investment and popular culture. So began a decades-long, ongoing experiment with Irish national identity. In *We Don't Know Ourselves*, O'Toole, one of the Anglophone world's most consummate stylists, weaves his own experiences into Irish social, cultural, and economic change, showing how Ireland, in just one lifetime, has gone from a reactionary "backwater" to an almost totally open society—perhaps the most astonishing national transformation in modern history. Born to a working-class family in the Dublin suburbs, O'Toole served as an altar boy and attended a Christian Brothers school, much as his forebears did. He was enthralled by American Westerns suddenly appearing on Irish television, which were not that far from his own experience, given that Ireland's main export was beef and it was still not unknown for herds of cattle to clatter down Dublin's streets. Yet the Westerns were a sign of what was to come. O'Toole narrates the once unthinkable collapse of the all-powerful Catholic Church, brought down by scandal and by the activism of ordinary Irish, women in particular. He relates the horrific violence of the Troubles in Northern Ireland, which led most Irish to reject violent nationalism. In O'Toole's telling, America became a lodestar, from John F. Kennedy's 1963 visit, when the soon-to-be martyred American president was welcomed as a native son, to the emergence of the Irish technology sector in the late 1990s, driven by American corporations, which set Ireland on the path toward particular disaster during the 2008 financial crisis. A remarkably compassionate yet exacting observer, O'Toole in coruscating prose captures the peculiar Irish habit of "deliberate unknowing," which allowed myths of national greatness to persist even as the foundations were crumbling. Forty years in the making, *We Don't Know Ourselves* is a landmark work, a memoir and a national history that ultimately reveals how the two modes are entwined for all of us.

Borderland Anna Reid 2023-02-07 "A beautifully written evocation of Ukraine's brutal past and its shaky efforts to construct a better future."—Financial Times *Borderland* tells the story of Ukraine. A thousand years ago it was the center of the first great Slav civilization, Kievan Rus. In 1240, the Mongols invaded from the east, and for the next seven centuries, Ukraine was split between warring neighbors: Lithuanians, Poles, Russians, Austrians, and Tatars. Again and again, borderland turned into battlefield: during the Cossack risings of the seventeenth century, Russia's wars with Sweden in the eighteenth, the Civil War of 1918-1920, and under Nazi occupation. Ukraine finally won independence in 1991, with the collapse of the Soviet Union. Bigger than France and as populous as Britain, it has the potential to become one of the most powerful states in Europe. In this finely written and penetrating book, Anna Reid combines research and her own experiences to chart Ukraine's tragic past. Talking to peasants and politicians, rabbis and racketeers, dissidents and paramilitaries, survivors of Stalin's famine and of Nazi labor camps, she reveals the layers of myth and propaganda that wrap this divided land. From the Polish churches of Lviv to the coal mines of the Russian-speaking Donbass, from the Galician shtetlekh to the Tatar shantytowns of Crimea, the book explores Ukraine's struggle to build itself a national identity, and identity that faces up to a bloody past, and embraces all the peoples within its borders.

Balkan Ghosts Robert D. Kaplan 2014-04-01 From the assassination that triggered World War I to the ethnic warfare in Serbia, Bosnia, and Croatia, the Balkans have been the crucible of the twentieth century, the place where terrorism and genocide first became tools of policy. Chosen as one of the Best Books of the Year by The New York Times, and greeted with critical acclaim as "the most insightful and timely work on the Balkans to date" (The Boston Globe), Kaplan's prescient, enthralling, and often chilling political travelogue is already a modern classic. This new edition of *Balkan Ghosts* includes six opinion pieces written by Robert Kaplan about the Balkans between 1996 and 2000, beginning just after the implementation of the Dayton Peace Accords. *History Year By Year A Journey Through Time From Mammoths And Mummies To Flying And Facebook Pdf Pdf* upload Arnold b Boyle

Around the World in 80 Books David Damrosch 2021-11-16 A transporting and illuminating voyage around the globe, through classic and modern literary works that are in conversation with one another and with the world around them \*Featured in the Chicago Tribune's Great 2021 Fall Book Preview \*One of Smithsonian Magazine's Ten Best Books About Travel of 2021\* Inspired by Jules Verne's hero Phileas Fogg, David Damrosch, chair of Harvard University's department of comparative literature and founder of Harvard's Institute for World Literature, set out to counter a pandemic's restrictions on travel by exploring eighty exceptional books from around the globe. Following a literary itinerary from London to Venice, Tehran and points beyond, and via authors from Woolf and Dante to Nobel Prize-winners Orhan Pamuk, Wole Soyinka, Mo Yan, and Olga Tokarczuk, he explores how these works have shaped our idea of the world, and the ways in which the world bleeds into literature. To chart the expansive landscape of world literature today, Damrosch explores how writers live in two very different worlds: the world of their personal experience and the world of books that have enabled great writers to give shape and meaning to their lives. In his literary cartography, Damrosch includes compelling contemporary works as well as perennial classics, hard-bitten crime fiction as well as haunting works of fantasy, and the formative tales that introduce us as children to the world we're entering. Taken together, these eighty titles offer us fresh perspective on enduring problems, from the social consequences of epidemics to the rising inequality that Thomas More designed Utopia to combat, as well as the patriarchal structures within and against which many of these books' heroines have to struggle—from the work of Murasaki Shikibu a millennium ago to Margaret Atwood today. *Around the World in 80 Books* is a global invitation to look beyond ourselves and our surroundings, and to see our world and its literature in new ways.

Birds and Us Tim Birkhead 2022-03-03 In *Birds and Us*, award-winning writer and ornithologist Tim Birkhead takes us on an epic and dazzling journey through this mutual history with birds, from the ibises mummified and deified by Ancient Egyptians to Renaissance experiments on woodpecker anatomy, from Victorian obsessions with egg collecting to the present fight to save endangered species and restore their habitats. Weaving in stories from his own life as a scientist, including far-flung expeditions to wondrous Neolithic caves in Spain and the bustling guillemot colonies of the Faroe Islands, this rich and fascinating book is the culmination of a lifetime's research and unforgettably shows how birds shaped us, and how we have shaped them. 'Birds and Us wings its way through 12,000 years of our species' engagement with the avian world. Birkhead tells it all with delightful gusto, plaiting personal encounters with challenging historical research and bewitching scientific rigor' Tim Dee 'Thought-provoking at every turn, this inspiring, shocking, wonder-filled exploration of our relationship with birds from earliest times delivers a sobering challenge to us living with birds today' Isabella Tree, author of *Wilding* 'A fascinating book about the close and often surprising relationship between birds and people, written by one of our leading ornithologists' Stephen Moss

Exit Into History Eva Hoffman 2010 'A book that takes you on an intimate journey through Eastern Europe at a time when the dust was still settling from the collapse of the Berlin Wall. Eva Hoffman travels from the Baltic to the Black Sea, building a compelling portrait of a region uncertain about its future.' Independent Shortly after the epochal events of 1989 Eva Hoffman spent several months in her native Poland and four other countries: the then-Czechoslovakia, Hungary, Romania and Bulgaria. She visited capital cities, wayside villages and provincial towns; stopped at shipyards, museums, and the coffee-houses of the intelligentsia; and talked to a great variety of people about the tumult they had lived through. *Exit into History* was the result: a portrait of the mosaic of the new Eastern Europe, a reconstruction of the turbulent post-war decades, and a meditation on the uses and misuses of historical memory.

Believing Anita Hill 2021-09-28 "An elegant, impassioned demand that

America see gender-based violence as a cultural and structural problem that hurts everyone, not just victims and survivors... It's at times downright virtuosic in the threads it weaves together."—NPR Winner of the 2022 ABA Silver Gavel Award for Books From the woman who gave the landmark testimony against Clarence Thomas as a sexual menace, a new manifesto about the origins and course of gender violence in our society; a combination of memoir, personal accounts, law, and social analysis, and a powerful call to arms from one of our most prominent and poised survivors. In 1991, Anita Hill began something that's still unfinished work. The issues of gender violence, touching on sex, race, age, and power, are as urgent today as they were when she first testified. *Believing* is a story of America's three decades long reckoning with gender violence, one that offers insights into its roots, and paths to creating dialogue and substantive change. It is a call to action that offers guidance based on what this brave, committed fighter has learned from a lifetime of advocacy and her search for solutions to a problem that is still tearing America apart. We once thought gender-based violence--from casual harassment to rape and murder--was an individual problem that affected a few; we now know it's cultural and endemic, and happens to our acquaintances, colleagues, friends and family members, and it can be physical, emotional and verbal. Women of color experience sexual harassment at higher rates than White women. Street harassment is ubiquitous and can escalate to violence. Transgender and nonbinary people are particularly vulnerable. Anita Hill draws on her years as a teacher, legal scholar, and advocate, and on the experiences of the thousands of individuals who have told her their stories, to trace the pipeline of behavior that follows individuals from place to place: from home to school to work and back home. In measured, clear, blunt terms, she demonstrates the impact it has on every aspect of our lives, including our physical and mental wellbeing, housing stability, political participation, economy and community safety, and how our descriptive language undermines progress toward solutions. And she is uncompromising in her demands that our laws and our leaders must address the issue concretely and immediately.

**Stranger to History** Aatish Taseer 2010-04-30 As a child, all Aatish Taseer ever had of his father was his photograph in a browning silver frame. Raised by his Sikh mother in Delhi, his Pakistani father remained a distant figure, almost a figment of his imagination, until Aatish crossed the border when he was twenty-one to finally meet him. In the years that followed, the relationship between father and son revived, then fell apart. For Aatish, their tension had not just to do with the tensions of a son rediscovering his absent father — they were intensified by the fact that Aatish was Indian, his father Pakistani and Muslim. It had complicated his parents' relationship; now it complicated his. The relationship forced Aatish to ask larger questions: Why did being Muslim mean that your allegiances went out to other Muslims before the citizens of your own country? Why did his father, despite claiming to be irreligious, describe himself as a 'cultural Muslim'? Why did Muslims see modernity as a threat? What made Islam a trump identity? *Stranger to History* is the story of the journey Aatish made to answer these questions — starting from Istanbul, Islam's once greatest city, to Mecca, its most holy, and then home, through Iran and Pakistan. Ending in Lahore, at his estranged father's home, on the night Benazir Bhutto was killed, it is also the story of Aatish's own divided family over the past fifty years. Part memoir, part travelogue, probing, stylish and troubling, *Stranger to History* is an outstanding debut. 'I had sought out my father because I couldn't live with the darkness of not knowing him. If I hadn't, all my life I would have had to cover it up with some idea of him taken from my mother on faith. I felt it would have limited me. History should never be taken on faith.'

**In Europe's Shadow** Robert D. Kaplan 2016 "A history of Romania traces the author's intellectual development throughout his extensive visits to the country, sharing his observations about its reflection of European politics, geography and key events while exploring the indelible role of Vladimir Putin."--NoveList.

are also questions faced by young people hundreds of years ago as they saw their cities and towns destroyed by the Christian Crusades. Based on a true story of a peaceful crusade in 1212 led by children, this book traces the lives of three multifaith characters as they try to find answers to these (unfortunately) persistent questions. Award-winning author Kathleen McDonnell vividly draws a world both dramatically different and remarkably similar to our own. **The Age of the Horse** Susanna Forrest 2017-05-02 A "superb" account of the enduring connection between humans and horses—"Full of the sort of details that get edited out of more traditional histories" (The Economist). Fifty-six million years ago, the earliest equid walked the earth—and beginning with the first-known horse-keepers of the Copper Age, the horse has played an integral part in human history. It has sustained us as a source of food, an industrial and agricultural machine, a comrade in arms, a symbol of wealth, power, and the wild. Combining fascinating anthropological detail and incisive personal anecdote, equestrian expert Susanna Forrest draws from an immense range of archival documents as well as literature and art to illustrate how our

evolution has coincided with that of horses. In paintings and poems (such as Byron's famous "Mazeppa"), in theater and classical music (including works by Liszt and Tchaikovsky), representations of the horse have changed over centuries, portraying the crucial impact that we've had on each other. Forrest combines this history with her own experience in the field, and travels the world to offer a comprehensive look at the horse in our lives today: from Mongolia where she observes the endangered takhi, to a show-horse performance at the Palace of Versailles; from a polo club in Beijing to Arlington, Virginia, where veterans with PTSD are rehabilitated through interaction with horses. "For the horse-addicted, a book can get no better than this . . . original, cerebral and from the heart." —The Times (London)

**Index, A History of the: A Bookish Adventure from Medieval Manuscripts to the Digital Age** Dennis Duncan 2022-02-15 A New York Times Editors' Choice Book Named a Most Anticipated Book of 2022 by Literary Hub and Goodreads A playful history of the humble index and its outsized effect on our reading lives. Most of us give little thought to the back of the book—it's just where you go to look things up. But as Dennis Duncan reveals in this delightful and witty history, hiding in plain sight is an unlikely realm of ambition and obsession, sparring and politicking, pleasure and play. In the pages of the index, we might find Butchers, to be avoided, or Cows that sh-te Fire, or even catch Calvin in his chamber with a Nonne. Here, for the first time, is the secret world of the index: an unsung but extraordinary everyday tool, with an illustrious but little-known past. Charting its curious path from the monasteries and universities of thirteenth-century Europe to Silicon Valley in the twenty-first, Duncan uncovers how it has saved heretics from the stake, kept politicians from high office, and made us all into the readers we are today. We follow it through German print shops and Enlightenment coffee houses, novelists' living rooms and university laboratories, encountering emperors and popes, philosophers and prime ministers, poets, librarians and—of course—indexers along the way. Revealing its vast role in our evolving literary and intellectual culture, Duncan shows that, for all our anxieties about the Age of Search, we are all index-rakers at heart—and we have been for eight hundred years.
