Parking Spaces Mark C. Childs 1999 With a unique combination of design principles, engineering and safety research, pattern ideas, and creative inspiration, this one-of-a-kind guidebook shows you how to create compelling public spaces that meet the community's parking needs. At the same time, the book demonstrates how to support an active pedestrian environment, and establish an alternate setting for carnivals, outdoor movies and markets, sporting events, and art parks.

Public History Thomas Cauvin 2016-05-20 Public History: A Textbook of Practice is a guide to the many challenges historians face while teaching, learning, and practicing public history. Historians can play a dynamic and essential role in contributing to public understanding of the past, and those who work in historic preservation, in museums and archives, in government agencies, as consultants, as oral historians, or who manage crowdsourcing projects need very specific skills. This book links theory and practice and provides students and practitioners with the tools to do public history in a wide range of settings. The text engages throughout with key issues such as public participation, digital tools and media, and the internationalization of public history. Part One focuses on public history sources, and offers an overview of the creation, collection, management, and preservation of public history materials (archives, material culture, oral materials, or digital sources). Chapters cover sites and institutions such as archival repositories and museums, historic buildings and structures, and different practices such as collection management, preservation (archives, objects, sounds, moving images, buildings, sites, and landscape), oral history, and genealogy. Part Two deals with the different ways in which public historians can produce historical narratives through different media (including exhibitions, film, writing, and digital tools). The last part explores the challenges and ethical issues that public historians will encounter when working with different communities and institutions. Either in public history methods courses or as a resource for practicing public historians, this book lays the groundwork for making meaningful connections between historical sources and popular audiences.

The High Cost of Free Parking Donald C. Shoup 2005 Off-street parking requirements are devastating American cities. So says the author in this no-holds-barred treatise on the way parking should be. Free parking, the author argues, has contributed to auto dependence, rapid urban sprawl, extravagant energy use, and a host of other problems. Planners mandate free parking to alleviate congestion, but end up distorting transportation choices, debasing urban design, damaging the economy, and degrading the environment. Ubiquitous free parking helps explain why our cities sprawl on a scale fit more for cars than for people, and why American motor vehicles now consume one-eighth of the world's total oil production. But it doesn't have to be this way. The author proposes new ways for cities to regulate parking, namely, charge fair market prices for curb parking, use the resulting revenue to pay for services in the neighborhoods that generate it, and remove zoning requirements for off-street parking.

Climate Change in Wildlands Andrew J Hansen 2016-06-07 Scientists have been warning for years that human activity is heating up the planet and climate change is under way. We are only just beginning to acknowledge the serious effects this will have on all life on Earth. The federal government is crafting broad-scale strategies to protect wildland ecosystems from the worst effects of climate change. One of the greatest challenges is to get the latest science into the hands of resource managers entrusted with vulnerable wildland ecosystems. This book examines climate and land-use changes in montane environments, assesses the vulnerability of species and ecosystems to these changes, and provides resource managers with collaborative management approaches to mitigate expected impacts. Climate Change in Wildlands proposes a new kind of collaboration between scientists and managers—a science-derived framework and common-sense approaches for keeping parks and protected areas healthy on a rapidly changing planet.

Urban Megaprojects Gerardo del Cerro Santamaria 2013-06-06 This book discusses the economic and political conditions that facilitate megaproject implementation and what are the impacts on urbanity and livability of such costly mode of urban development. It includes contributions from sociologists, planners, geographers and architects making it a truly multidisciplinary project.

Parking Principles; Subject Area: 53 Traffic Control and Operations National Research Council (U.S.). Highway Research Board 1971 In 1967 FHWA recommended that the HRB committee on parking develop a new publication to update and revise BPR's 1956 publication, "Parking guide for cities." In the present study, the committee attempts to view parking across the entire spectrum from the home to the central business district. Eight major topics are addressed: parking characteristics, zoning, parking programs, parking studies, location and design, operation, parking at transit stations, and curb parking. The three appendices comprise a glossary of terms, legal aspects of parking and public use, and change-of-mode facilities.

Housing As If People Mattered Clare Cooper Marcus 2023-09-01 From the Introduction: Consider these two places: Walking into Green Acres, you immediately sense that you have entered an oasis-traffic noise left behind, negative urban distractions out of sight, children playing and running on the grass, adults puttering on plant-filled balconies. Signs of life and care for the environment abound. Innumerable social and physical clues communicate to visitors and residents alike a sense of home and neighborhood. This is a place that people are proud of, a place that children will remember in later years with nostalgia and affection, a place that just feels "good." Contrast this with Southside Village. Something does not feel quite right. It is hard to find your way about, to discern which are the fronts and which are the backs of the houses, to determine what is "inside" and what is "outside." Strangers cut across what might be a communal backyard. There are no signs of personalization around doors or on balconies. Few children are around; those who are outside ride their bikes in circles in the parking lot There are few signs of caring; litter, graffiti, and broken light fixtures indicate the opposite. There is no sense of place; it is somewhere to move away from, not somewhere to remember with pride. These are not real locations, but we have all seen places like them. The purpose of this book is to assist in the creation of more places like Green Acres and to aid in the rehabilitation of the many Southside Villages that scar our cities. This book is a collection of guidelines for the site design of low-rise, high-density family housing. It is intended as a reference tool, primarily for housing designers and planners, but also for developers, housing authorities, citizens' groups, and tenants' organizations-anyone involved in planning or rehabilitating housing. It provides guidelines for the layout of buildings, open spaces, community facilities, play areas, walkways, and the myriad components that make up a housing site.

Handbook on Transport and Land Use João de Abreu e Silva 2023-06-01 Synthesizing current understandings on the relationship between transport and land use, this timely Handbook proposes an agenda for research and practice that leads toward more human-centered communities within an increasingly urbanized world facing rapid technological change. Chapters explore the role of institutional policies and informal cultural contexts in influencing transport and land use systems, before examining the impacts of transportation and land use decisions across multiple areas, including equity, public health, climate, environment, and lifestyle preferences.

Smart Parking a Clear and Concise Reference Gerardus Blokdyk 2018-09-05 How important is Smart Parking to the user organizations mission? Is Smart Parking currently on schedule according to the plan? Will team members regularly document their Smart Parking work? Have all basic functions of Smart Parking been defined? Has the direction changed at all during the course of Smart Parking? If so, when did it change and why? Defining, designing, creating, and implementing a process to solve a challenge or meet an objective is the most valuable role... In EVERY group, company, organization and department. Unless you are talking a one-time, single-use project, there should be a process. Whether that process is managed and implemented by humans, AI, or a combination of the two, it needs to be designed by someone with a complex enough perspective to ask the right questions. Someone capable of asking the right questions and step back and say, "What are we really trying to accomplish here? And is there a different way to look at it?" This Self-Assessment empowers people to do just that - whether their title is entrepreneur, manager, consultant, (Vice-)President, CxO etc.... - they are the people who rule the future. They are the person who asks the right questions to make Smart Parking investments work better. This Smart Parking All-Inclusive Self-Assessment enables You to be that person. All the tools you need to an in-depth Smart Parking Self-Assessment. Featuring 678 new and updated case-based questions, organized into seven core areas of process design, this Self-Assessment will help you identify areas in which Smart Parking improvements can be made. In using the questions you will be better able to: - diagnose Smart Parking projects, initiatives, organizations, businesses and processes using accepted diagnostic standards and practices - implement evidence-based best practice strategies aligned with overall goals - integrate recent advances in Smart Parking and process design strategies into practice according to best practice guidelines Using a Self-Assessment tool known as the Smart Parking Scorecard, you will develop a clear picture of which Smart Parking areas need attention. Your purchase includes access details to the Smart Parking self-assessment dashboard download which gives you your dynamically prioritized projects-ready tool and shows your organization exactly what to do next. You will receive the following contents with New and Updated specific criteria: - The latest quick edition of the book in PDF - The latest complete edition of the book in PDF, which criteria correspond to the criteria in... - The Self-Assessment Excel Dashboard, and... - Example pre-filled Self-Assessment Excel Dashboard to get familiar with results generation ...plus an extra, special, resource that helps you with project managing. INCLUDES LIFETIME SELF ASSESSMENT UPDATES Every self assessment comes with Lifetime Updates and Lifetime Free Updated Books. Lifetime Updates is an industry-first feature which allows you to receive verified self assessment updates, ensuring you always have the most accurate information at your fingertips.

Chemical Analysis of Antibiotic Residues in Food Jian Wang 2011-11-29 An insightful exploration of the key aspects concerning the chemical analysis of antibiotic residues in food The presence of excess residues from frequent antibiotic use in animals is not only illegal, but can pose serious health risks by contaminating products for human consumption such as meat and milk. Chemical Analysis of Antibiotic Residues in Food is a single-source reference for readers interested in the development of analytical methods for analyzing antibiotic residues in food. It covers themes that include quality assurance and quality control, antibiotic chemical properties, pharmacokinetics, metabolism, distribution, food safety regulations, and chemical analysis. In addition, the material presented includes background information valuable for understanding the choice of marker residue and target animal tissue to use for regulatory analysis. This comprehensive reference: Includes topics on general issues related to screening and confirmatory methods Presents updated information on food safety regulation based on routine screening and confirmatory methods, especially LC-MS Provides general guidance for method development, validation, and estimation of measurement uncertainty Chemical Analysis of Antibiotic Residues in Food is written and organized with a balance between practical use and theory to provide laboratories with a solid and reliable reference on antibiotic residue analysis. Thorough coverage elicits the latest scientific findings to assist the ongoing efforts toward refining analytical methods for producing safe foods of animal origin.

Parking Management Best Practices Todd Litman 2020-03-04 This book is a blueprint for developing an integrated parking plan. It explains how to determine parking supply and affect parking demand, as well as how to calculate parking facility costs. It also offers information about shared parking, parking maximums, financial incentives, tax reform, pricing methods, and other management techniques. What types of locations benefit from parking management? Places with perceived parking problems. Areas with rapidly expanding population, business activity, or traffic. Commercial districts and other places with compact land-use patterns. Urban areas in need of redevelopment and infill. Places with high levels of walking or public transit or places that want to encourage those modes. Districts where parking problems hinder economic development. Areas with high land values Neighborhoods concerned with equity, including fairness to nondrivers. Places with environmental concerns. Unique landscapes or historic districts in need of preservation."

Parking Structures Anthony P. Chrest 2001-02-28 Parking Structures provides a single-source reference for parking structure designers, builders, and owners. This third edition is still the only such book. It addresses how to select the best functional and structural designs for a given situation, ensure long-term durability, design for easy maintenance, decide on the number and placement of entrances and exits, design an easily understood wayfinding system, design for ADA compliance, plan for internal auto and pedestrian traffic circulation, select the most effective and energy efficient lighting system, avoid the most common design and construction pitfalls, provide for adequate patron safety and security, carry out needed repairs, and extend the parking structure life. Parking Structures addresses all the major issues related to parking garages. It is an essential reference for parking structure owners, structural engineers, architects, contractors, and other professionals. New in the third edition: This third edition of Parking Structures includes new material on metric dimensions and recommendations for functional design globally, new research on flow capacity and queuing at parking entry/exits, an entirely new chapter on planning for a new parking structure, including cost issues and alternatives to structure construction, pedestrian considerations, safety in parking facilities, plazas above parking structures, an expanded chapter on seismic design, seismic retrofit, life cycle cost analysis, and upgrades to existing structures.

Rural by Design Randall Arendt 2017-11-08 For America's rural and suburban areas, new challenges demand new solutions. Author Randall Arendt meets them in an entirely new edition of Rural by Design. When this planning classic first appeared 20 years ago, it showed how creative, practical land-use planning can preserve open space and keep community character intact. The second edition shifts the focus toward infilling neighborhoods, strengthening town centers, and moving development closer to schools, shops, and jobs. New chapters cover form-based codes, visioning, sustainability, low-impact development, green infrastructure, and more, while 70 case studies show how these ideas play out in the real world. Readers —rural or not—will find practical advice about planning for the way we live now.

Case Studies in Disaster Mitigation and Prevention Himanshu Grover 2022-12-09 Case Studies in Disaster Mitigation and Prevention: Disaster and Emergency Management: Case Studies in Adaptation and Innovation series presents cases illustrating efforts to reduce human and material losses associated with disasters. This volume demonstrates that mitigation is an ongoing phase in which communities continually pursue long-term hazard resistance and reduction. Cases illustrate the importance of risk assessment in the development of mitigation strategies through hazard mapping and multi-hazard mitigation planning. Cases also illustrate approaches to reduction risk through structural and non-structural means, giving consideration to benefits or limitations of these strategies in different contexts. The contributions of different mitigation activities to disaster risk reduction efforts are examined using the Sendai Framework for Disaster Risk Reduction. Presents in-depth cases studies in disaster mitigation, one of the phases of disaster management Unites practice and research from multiple disciplines to highlight the complexity of disaster mitigation, including environmental and earth sciences, engineering, public health, geography, sociology, and anthropology Examines policy and ethical dilemmas faced by decision makers in disaster situations **A Guide to Planning for Community Character** Lane H. Kendig 2012-09-26 A Guide to Planning for Community Character adds a wealth of practical applications to the framework that Lane Kendig describes in his previous book, Community Character. The purpose of the earlier book is to give citizens and planners a systematic way of thinking about the attributes of their communities and a common language to use for planning and zoning in a consistent and reliable way. This follow-up volume addresses actual design in the three general classes of communities in Kendig's framework-urban, suburban, and rural. The author's practical approaches enable designers to create communities "with the character that citizens actually want." Kendig also provides a guide for incorporating community character into a comprehensive plan. In addition, this book shows how to use community character in planning and zoning as a way of making communities more sustainable. All examples in the volume are designed to meet real-world challenges. They show how to design a community so that the desired character is actually achieved in the built result. The book also provides useful tools for analyzing or measuring relevant design features. Together, the books provide a comprehensive treatment of community character, offering both a tested theory of planning based on visual and physical character and practical ways to plan and measure communities. The strength of this comprehensive approach is that it is ultimately less rigid and more adaptable than many recent "flexible" zoning codes.

CPTED and Traditional Security Countermeasures Lawrence Fennelly 2018-04-17 CTPED and Traditional Security Countermeasures: 150 Things You Should Know is a handy reference for both seasoned professionals and those just starting out in security and law enforcement. Crime Prevention Through Environmental Design (CPTED) is a foundational concept to physical security and can be incorporated widely in security policies, plans, and procedures. It has proven effective over the many years insofar as building and campus design, security architecture, and creating an overall security culture in any workplace. The authors have collected a broad array of topics together, garnered through their many years of real-world experience in the field. Security solutions that address a wide range of physical security challenges are presented in an easy to follow format. Security practitioners and law enforcement professionals alike will find practical tips to understand and manage their security program, including access control, target hardening, command and control, physical security protections, and visitor management, among a myriad of other topics. This will be a must-have reference for professionals looking for real-world recommendations for physical security solutions.

The Carbon Fix Stephanie Paladino 2016-11-18 Given the growing urgency to develop global responses to a changing climate, The Carbon Fix examines the social and equity dimensions of putting the world's forests—and, necessarily, the rural people who manage and depend on them—at the center of climate policy efforts such as REDD+, intended to slow global warming. The book assesses the implications of international policy approaches that focus on forests as carbon and especially, forest carbon offsets, for rights, justice, and climate governance. Contributions from leading anthropologists and geographers analyze a growing trend towards market principles and financialization of nature in environmental governance, placing it into conceptual, critical, and historical context. The book then challenges perceptions of forest carbon initiatives through in-depth, field-based case studies assessing projects, policies, and procedures at various scales, from informed consent to international carbon auditing. While providing a mixed assessment of the potential for forest carbon initiatives to balance carbon with social goals, the authors present compelling evidence for the complexities of the carbon offset enterprise, fraught with competing interests and interpretations at multiple scales, and having unanticipated and often deleterious effects on the resources and rights of the world's poorest peoples—especially indigenous and rural peoples. The Carbon Fix provides nuanced insights into political, economic, and ethical issues associated with climate change policy. Its case approach and fresh perspective are critical to environmental professionals, development planners, and project managers; and to students in upper level undergraduate and graduate courses in environmental anthropology and geography, environmental and policy studies, international development, and indigenous studies.

Implementing a Green Recovery in Southeast Asia Asian Development Bank 2022-05-01 This report explains why Southeast Asian countries need to

design pandemic recovery policies that hit both ambitious socioeconomic and environmental goals. The third in a four-part series, the report considers the impact of COVID-19 on Cambodia, Indonesia, Myanmar, the Philippines, and Thailand to show how a green recovery can help safeguard against future health crises. Analyzing areas including agriculture, cities, and oceans, the report lays out policy measures designed to identify, create, and finance green growth opportunities. It shows how COVID-19 has presented countries with a chance to hit the reset button and build a socially, economically, and environmentally resilient future.
