Informal Finance Prabhu Ghatge 1992 In most Asian countries, there exists a dynamic informal financial sector working side by side with formal finance, which has not until now been researched carefully. Informal Finance is based on a research project that examined informal finance in Bangladesh, India, Indonesia, the Philippines, and Thailand. The issues encountered in studying each country are discussed, as are regional diversity within countries and the differences between rural and urban areas. Rather than simply summarizing the five country studies on which it is based, Informal Finance presents a synthesis based on a common framework that permits cross-country comparisons.

*The Apollo Guidance Computer* Frank O'Brien 2010-06-25 The technological marvel that facilitated the Apollo missions to the Moon was the on-board computer. In the 1960s most computers filled an entire room, but the

spacecraft's computer was required to be compact and low power. Although people today find it difficult to accept that it was possible to control a spacecraft using such a 'primitive' computer, it nevertheless had capabilities that are advanced even by today's standards. This is the first book to fully describe the Apollo guidance computer's architecture, instruction format and programs used by the astronauts. As a comprehensive account, it will span the disciplines of computer science, electrical and aerospace engineering. However, it will also be accessible to the 'space enthusiast'. In short, the intention is for this to be the definitive account of the Apollo guidance computer. Frank O'Brien's interest in the Apollo program began as a serious amateur historian. About 12 years ago, he began performing research and writing essays for the Apollo Lunar Surface Journal, and the Apollo Flight Journal. Much of this work centered on his primary interests, the Apollo Guidance Computer (AGC) and the Lunar Module. These Journals are generally considered the canonical online reference on the flights to the Moon. He was then asked to assist the curatorial staff in the creation of the Cradle of Aviation Museum, on Long Island, New York, where he helped prepare the Lunar Module simulator, a LM procedure trainer and an Apollo space suit for display. He regularly lectures on the Apollo computer and related topics to diverse groups, from NASA's computer engineering conferences, the IEEE/ACM, computer festivals and university student groups.

**To a Rocky Moon** Don E. Wilhelms 1993 When human exploration of the lunar surface began in 1969, it marked not only an unprecedented technological achievement but also the culmination of scientific efforts to understand lunar geology. Memoirs of the Apollo astronauts have preserved the exploratory aspects of these missions; now a geologist who was an active participant in the lunar program offers a detailed historical view of those events--including the pre-Apollo era--from a heretofore untold scientific

perspective. It was the responsibility of the scientific team of which Don Wilhelms was a member to assemble an overall picture of the Moon's structure and history in order to recommend where on the lunar surface fieldwork should be conducted and samples collected. His book relates the site-selection process in detail, and draws in concomitant events concerning mission operations to show how they affected the course of the scientific program. While discussing all six landings in detail, it tells the behind-the-scenes story of telescopic and spacecraft investigations before, during, and after the manned landings. Intended for anyone interested the space program, the history of science, or the application of geology to planetology, *To a Rocky Moon* will leave all readers with a better idea of what the Moon is really like. In so expertly summarizing this earlier phase of exploration, it stands as an authoritative touchstone for those involved in the next.

*The Worldbuilder's Journal of Legendary Adventures* Official Dungeons & Dragons Licensed 2020-05-12 An official Dungeons & Dragons journal featuring 365 writing prompts to help role-players of all levels get their

creative juices flowing. Building something from scratch is exciting, but it can also be a challenge. Within this journal lie 365 prompts to help you start your journey. Every page will steer you to strengthening the details of your world, whether you're playing within the vast Dungeons & Dragons cosmos or creating a landscape of your own design. You'll encounter insightful questions that encourage you to delve deep into the backstories of your characters and their enemies, and what drives them to a life of adventure. You'll also see prompts that reference D&D myths and legends, some familiar and others more obscure. Answer them as best you can or let them be the spark that starts your journey into the endless realms of D&D lore. Above all, this guided journal, like D&D itself, is driven by your imagination. There are no wrong answers, paths, or rolls here (though once the game begins there are no guarantees). Nor do you need to be a master storyteller, writer, or artist. You just need to aspire to create and have the courage to build something you may have never before imagined.
