[Freedom in the World 2005](#) Freedom House 2005 Freedom in the World, the Freedom House flagship survey whose findings have been published annually since 1972, is the standard-setting comparative assessment of global political rights and civil liberties. The survey ratings and narrative reports on 192 countries and a group of select territories are used by policy makers, the media, international corporations, and civic activists and human rights defenders to monitor trends in democracy and track improvements and setbacks in freedom worldwide. Press accounts of the survey findings appear in hundreds of influential newspapers in the United States and abroad and form the basis of numerous radio and television reports. The Freedom in the World

political rights and civil liberties ratings are determined through a multi-layered process of research and evaluation by a team of regional analysts and eminent scholars. The analysts used a broad range of sources of information, including foreign and domestic news reports, academic studies, nongovernmental organizations, think tanks, individual professional contacts, and visits to the region, in conducting their research. The methodology of the survey is derived in large measure from the Universal Declaration of Human Rights, and these standards are applied to all countries and territories, irrespective of geographical location, ethnic or religious composition, or level of economic development. Freedom House is a nonprofit, nonpartisan organization that supports democratic change, monitors freedom, and advocates for democracy and human rights.

Social Theory for Alternative Societies Matt Dawson 2017-09-16 This book traces a unique story of social theory: one which focuses on its role in offering ideas for alternative societies. In charting this story, Matt Dawson argues that the differences in alternatives offered by social theorists not only demonstrate the diversity in, and value of, sociological perspectives, but also emphasize competing ideas of the role of intellectuals in social change. The text discusses a collection of social theorists –from key figures such as Marx, Durkheim and Du Bois to less well known or now commonly overlooked writers such as Levitas, Lefebvre and Mannheim. It explains their use of the tools of sociology to critique society and provide visions for alternatives, highlighting elements of the intellectual backgrounds of movements such as socialism, anti-racism, feminism and cosmopolitanism. Social Theory for Alternative Societies not only explores in detail a variety of thinkers, but also reflects on the relevance of sociology today and on the connection between social theory and the 'real world.' Thus it will be of interest to students of sociology and those interested in ideas for a better society.

Strengthening Forensic Science in the United States National Research Council 2009-07-29 Scores of talented and dedicated people serve the forensic science community, performing vitally important work. However, they are often constrained by lack of adequate resources, sound policies, and national support. It is clear that change and advancements, both systematic and scientific, are needed in a number of forensic science disciplines to ensure the reliability of work, establish enforceable standards, and promote best practices with consistent application. Strengthening Forensic Science in the United States: A Path Forward provides a detailed plan for addressing these needs and suggests the creation of a new government entity, the National Institute of Forensic Science, to establish and enforce standards within the forensic science community. The benefits of improving and regulating the forensic science disciplines are clear: assisting law enforcement officials, enhancing homeland security, and reducing the risk of wrongful conviction and exoneration. Strengthening Forensic Science in the United States gives a full account of what is needed to advance the forensic science disciplines, including upgrading of systems and organizational structures, better training, widespread adoption of uniform and enforceable best practices, and mandatory certification and accreditation programs. While this book provides an essential call-to-action for congress and policy makers, it also serves as a vital tool for law enforcement agencies, criminal prosecutors and attorneys, and forensic science educators.

Selected Themes in African Political Studies Lucky Asuelime 2014-08-04 Against the background of a long and continuing record of political instability in Africa, this edited collection presents a multi-disciplinary approach to selected issues in African political studies. The contributions explore a range of political and conflict situations, discuss efforts to develop indigenous conflict resolution mechanisms and consider some of the key political and economic issues facing the continent. The specific country studies illuminate the diversity of the African continent and indicate the ways in which the political and socio-economic contexts of African states bear directly upon the ability of states to solve political and economic challenges. The volume seeks to present and promote novel analytical frameworks, conceptual approaches and empirical accounts of relevance to scholars working on Africa and to practitioners and policy makers in politics, governance and peace initiatives in Africa.

Forging Two Nations Insights on Sudan and South Sudan Grawert, Elke 2014-03-16 Most of the papers in this book were presented during the 9th International South Sudan and Sudan Studies Conference of the Sudan Studies Association USA and the Sudan Studies Society UK. 150 scholars from numerous academic disciplines, experts in conflict transformation and development, staff of non-governmental organisations (NGOs), former and current senior officers from ministries and military institutions from Sudan, South Sudan, and seventeen further countries participated in the conference. They engaged in vivid discussions on historical and recent cleavages in the societies of Sudan and South Sudan, inequality and exclusion in numerous variations, and on rapid social change accompanied by urbanisation and land conflicts. The severe economic crisis following the separation and the importance of creating political solutions instead of using technical approaches to work on the multitude of challenges affecting each of the two countries and the interrelations between them were also scrutinised. The participants intensely exchanged views and experiences on the difficulties and successes in taking responsibility rather than being dependent on foreign assistance. Discussions revealed strong potentials in both societies to overcome such problems; to initiate processes of reconciliation, and to consolidate peace. They shed light on the complex processes of nation-building and the creation of meaningful constitutions. This book attempts to capture at least some of this multitude of insights and aspects that had shaped the conference.

Environmental Politics in Latin America Benedicte Bull 2014-11-13 Since colonial times the position of the social, political and economic elites in Latin America has been intimately connected to their control over natural resources. Consequently, struggles to protect the environment from over-exploitation and contamination have been related to marginalized groups' struggles against local, national and transnational elites. The recent rise of progressive, left-leaning governments – often supported by groups struggling for environmental justice – has challenged the established elites and raised expectations about new regimes for natural resource management. Based on case-studies in eight Latin American countries (Argentina, Brazil, Chile, Ecuador, Colombia, Bolivia, El Salvador and Guatemala), this book investigates the extent to which there have been elite shifts, how new governments have related to old elites, and how that has impacted on environmental governance and the management of natural resources. It examines the rise of new cadres of technocrats and the old economic and political elites' struggle to remain influential. The book also discusses the challenges faced in trying to overcome structural inequalities to ensure a more sustainable and equitable governance of natural resources. This timely book will be of great interest to researchers and masters students in development studies, environmental management and

governance, geography, political science and Latin American area studies.

Techno-economic performance review of selected fishing fleets in Asia Van Anrooy, R., Mukherjee, R., Wakamatsu, H., Song, L., Muawanah, U., Jin Cha, B., Narayana Kumar, R., Parappurathu, S., Yadava, Y.S., Tietze, U.

2020-10-26 This techno-economic performance review of selected fishing fleets in Asia presents the findings of six country level studies of fishing fleets in Bangladesh, China, India, Indonesia, Japan and the Republic of Korea. The review includes financial and economic information of 27 major fishing fleet segments, including trawlers, gillnetters, long liners, jiggers, purse seiners, as well as pole and line fishing vessels. An analysis of the costs and earnings data of these important fishing fleet segments in Asia was carried out using national statistics of 2017 for the Japanese and the Korean fleet segments and 2018-19 survey data for the other countries. Eighty-nine percent of the 27 fishing fleet segments reported positive net cash flows. Seventy percent of the fishing fleets realized net profit margins of more than 10 percent. Eighty-one percent of the fishing fleets reported positive results in terms of their capital productivity, as their returns on fixed tangible assets (ROFTAs) were positive. The review shows that investments in fishing vessels and fishing operations of these major Asian fishing fleets are generally profitable. Marine capture fishing is a financially viable economic activity in all six major fishing nations included in the review. It generates enough income to cover depreciation costs, interest and loan repayments, and provides sufficient financial resources for reinvestment. Nearly 60 percent of the fishing fleets generated returns on investment (ROIs) of 15 percent and higher, which signals an attractive sector for investments. The total gross value added (GVA) of the 27 fishing fleets to the Asian regional economy was substantial and estimated at around USD 66 billion. The review also reveals a need for adequate management measures, including fleet capacity management plans, to improve the status of fish stock in the region and maintain a healthy and profitable fishing sector.

Anyone interested in Californian biodiversity or grassland ecosystems in general will find this book to be an invaluable resource and a major inspiration for further research, management, and restoration efforts."—Bruce G. Baldwin, W. L. Jepson Professor and Curator, UC Berkeley "Grasses and grasslands are among the most important elements of the California landscape. This is their book, embodying the kind of integrated view needed for all ecological communities in California. Approaches ranging across an incredibly broad spectrum -- paleontology and human history; basic science and practical management techniques; systematics, community ecology, physiology, and genetics; physical factors such as water, soil nutrients, atmospheric, and fire; biological factors such as competition, symbiosis, and grazing -- are nicely tied together due to careful editorial work. This is an indispensable reference for everyone interested in the California environment."—Brent Mishler, Director of the University & Jepson Herbaria and Professor of Integrative Biology, UC Berkeley "The structure and function of California grasslands have intrigued ecologists for decades. The editors of this volume have assembled a comprehensive set of reviews by a group of outstanding authors on the natural history, structure, management, and restoration of this economically and ecologically important ecosystem."—Scott L. Collins, Professor of Biology, University of New Mexico

The Disappearance of Hong Kong in Comics, Advertising and Graphic Design Wendy Siuyi Wong 2018-10-23 This book examines Hong Kong's struggle against the disappearance of its unique identity under the historical challenges of colonialism, in addition to the more recent reimposition of Chinese authoritarian government control, as reflected in three under-researched forms of visual media: comics, advertising and graphic design. Each section of the book focuses on one of these three forms, and each chapter focuses on one stage of Hong Kong's changing cultural identity. The articulative position of this book is on studies of visual cultural history and media communication. Its case studies will broaden readers' own cultural knowledge for a more international understanding. The Disappearance of Hong Kong in Comics, Advertising and Graphic Design advances the development of its three key subjects in terms of identity, communication and cultural politics, aiming to reach a wide range of multidisciplinary readers.

Media, Mobilization and the Umbrella Movement Francis L. F. Lee 2018-05-16 The Umbrella Movement in Hong Kong caught the world's attention and imagination at the end of 2014. The 79-day occupation campaign took on some of the characteristics of the recent wave of large-scale protest movements around the world, including the prominent roles played by the media – both conventional and digital – in the mobilization and communication processes of the movement. This edited volume, *Media, Mobilization and the Umbrella Movement*, brings together nine contributions which examine various aspects of the media-movement nexus, including the power of televised images to mobilize people, the role of social media in the insurgent public sphere, young activists' social media strategies, media influence on citizens' understanding of civil disobedience, the government's response to digital media tactics, public discourses about the rule of law, and local and foreign media coverage of the movement. We believe that this high-quality collection can not only enhance our understanding of the Umbrella Movement, but also facilitate and trigger more research and dialogue comparing the Umbrella Movement with other similar protest movements around the world. This book was originally published as a special issue of the *Chinese Journal of Communication*.

The Handbook of Communication in Cross-cultural Perspective Donal Carbaugh 2016-08-19 This handbook brings together 26 ethnographic research reports from around the world about communication. The studies explore 13 languages from 17 countries across 6 continents. Together, the studies examine, through cultural analyses, communication practices in cross-cultural perspective. In doing so, and as a global community of scholars, the studies explore the diversity in ways communication is understood around the world, examine specific cultural traditions in the study of communication, and thus inform readers about the range of ways communication is understood around the world. Some of the communication practices explored include complaining, hate speech, irreverence, respect, and uses of the mobile phone. The focus of the handbook, however, is dual in that it brings into view both communication as an academic discipline and its use to unveil culturally situated practices. By attending to communication in these ways, as a discipline and a specific practice, the handbook is focused on, and will be an authoritative resource for understanding communication in cross-cultural perspective. Designed at the nexus of various intellectual traditions such as the ethnography of communication, linguistic ethnography, and cultural approaches to discourse, the handbook employs, then, a general approach which, when used, understands communication in its particular cultural

scenes and communities.

Educating the Children of Migrant Workers in Beijing

Myra Pong 2014-10-17 *Educating the Children of Migrant Workers in Beijing* is a timely book that addresses the gap in the provision of basic education to migrant children in China. It examines the case of Beijing, with a focus on policy implementation at the municipal and district levels and its impacts on migrant schools and their students. Rural migrant workers in the cities usually lack local hukou (household registration) and face serious obstacles in accessing basic social services, including schooling for their children. The educational situation of these children, however, can vary both across and within localities, and, despite policies and regulations from the central government, there have emerged broad and sometimes even extreme differences in the implementation of these policies at the local levels. This book uses evidence from qualitative interviews and the analysis of policy documents and materials to provide readers with a rare glimpse into the local politics surrounding migrant children's education in China's political center, including the nature of and motives behind policy implementation at the municipal and district levels and the implications for the survival and development of migrant schools in the city. *Educating the Children of Migrant Workers in Beijing* is a unique and in-depth contribution to an important area and will appeal to scholars and students across a range of disciplines, including China studies, migration studies, education, social policy, and development studies, as well as to practitioners and policymakers working on migrant issues and social welfare provision in China.

Democratizing Innovation Eric Von Hippel 2006-02-17 The process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among "lead users," who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

You'll start with the basics, like how to handle data and write simple programs, before moving on to more advanced topics, like producing statistical summaries of your data and performing statistical tests and modeling. You'll even learn how to create impressive data visualizations with R's basic graphics tools and contributed packages, like ggplot2 and ggvis, as well as interactive 3D visualizations using the rgl package. Dozens of hands-on exercises (with downloadable solutions) take you from theory to practice, as you learn: –The fundamentals of programming in R, including how to write data frames, create functions, and use variables, statements, and loops –Statistical concepts like exploratory data analysis, probabilities, hypothesis tests, and regression modeling, and how to execute them in R –How to access R's thousands of functions, libraries, and data sets –How to draw valid and useful conclusions from your data –How to create publication-quality graphics of your results Combining detailed explanations with real-world examples and exercises, this book will provide you with a solid understanding of both statistics and the depth of R's functionality. Make The Book of R your doorway into the growing world of data analysis.
