Manufacturing Processes for Design Professionals Rob Thompson 2007-11-30 An encyclopaedic guide to production techniques and materials for product and industrial designers, engineers, and architects. Today's product designers are presented with a myriad of choices when creating their work and preparing it for manufacture. They have to be knowledgeable about a vast repertoire of processes, ranging from what used to be known as traditional "crafts" to the latest technology, to enable their designs to be manufactured effectively and efficiently. Information on the internet about such processes is often unreliable, and search engines do not usefully organize material for designers. This fundamental new resource explores innovative production techniques and materials that are having an impact on the design industry worldwide. Organized into four easily referenced parts—Forming, Cutting, Joining, and Finishing—over seventy manufacturing processes are explained in depth with full technical descriptions; analyses of the typical applications, design opportunities, and considerations each process offers; and information on cost, speed, and environmental impact. The accompanying step-by-step case studies look at a product or component being manufactured at a leading international supplier. A directory of more than fifty materials includes a detailed technical profile, images of typical applications and finishes, and an overview of each material's design characteristics. With some 1,200 color photographs and technical illustrations, specially commissioned for this book, this is the definitive reference for product designers, 3D designers, engineers, and architects who need a convenient, highly accessible, and practical reference.

Playing the Race Card Linda Williams 2020-10-06 The black man suffering at the hands of whites, the white woman sexually threatened by the black man. Both images have long been burned into the American conscience through popular entertainment, and today they exert a powerful and disturbing influence on Americans' understanding of race. So argues Linda Williams in this boldly inquisitive book, where she probes the bitterly divisive racial sentiments aroused by such recent events as O. J. Simpson's criminal trial. Williams, the author of *Hard Core*, explores how these images took root, beginning with melodramatic theater, where suffering characters acquire virtue through victimization. The racial sympathies and hostilities that surfaced during the trial of the police in the beating of Rodney King and in the O. J. Simpson murder trial are grounded in the melodramatic forms of Uncle Tom's Cabin and The Birth of a Nation. Williams finds that Stowe's beaten black man and Griffith's endangered white woman appear repeatedly throughout popular entertainment, promoting interracial understanding at one moment, interracial hate at another. The black and white racial melodrama has galvanized emotions and fueled the importance of new media forms, such as serious, "integrated" musicals of stage and film, including *The Jazz Singer* and *Show Boat*. It also helped create a major event out of the movie *Gone With the Wind*, while enabling television to assume new moral purpose with the broadcast of *Roots*. Williams demonstrates how such developments converged to make the televised race trial a form of national entertainment. When prosecutor Christopher Darden accused Simpson's defense team of "playing the race card," which ultimately trumped his own team's gender card, he feared that the jury's sympathy for a targeted black man would be at the expense of the abused white wife. The jury's verdict, Williams concludes, was determined not so much by facts as by the cultural forces of racial melodrama long in the making. Revealing melodrama to be a key element in American culture, Williams argues that the race images it has promoted are deeply ingrained in our minds and that there can be no honest discussion about race until Americans recognize this predicament.
