An analysis of these demonstrates how a general concept can be derived from a specific context and highlighted questions provide the basis for further debate. The reader can then focus on the parts most relevant to their own needs. policy is one of the most important policy domains, and the tools of macroeconomics are among the most valuable for policy makers. Yet there has been, up to now, a wide gulf between the level at which macroeconomics is taught at the undergraduate level and the level at which it is practiced.

At the same time, doctoral-level textbooks are usually not targeted at a policy audience, making advanced macroeconomics less accessible to current and aspiring

practitioners. This

book, born out of the Masters course the authors taught for many years at the Harvard Kennedy School, fills this gap. It introduces the tools of dynamic optimization in the context of economic growth, and then applies them to a wide range of policy questions – ranging from pensions, consumption, investment and finance, to the most recent developments in fiscal and monetary policy. It does so with the requisite rigor, but also with a light touch, and an unyielding focus on their application to policy-making, as befits the authors' own practical experience.

Economy Toshiaki Hirai  
2015-02-16 Globalization  
is a phenomenon which  
has attracted much  
attention in the past,  
but there are still many  
questions that remain  
unanswered. This book  
categorizes  
globalization into three  
types: Financial  
Globalization, the  
collapse of the Cold War  
order and the ensuing  
convergence toward the  
capitalistic system; and  
the rise of the emerging  
nations. The  
globalization of  
capitalism has two  
implications. One is  
trust in the market  
economy system and  
support for a minimal  
state while another is  
an aspect of the Casino  
Capitalism as typically  
seen by the rampant  
emergence of hedge  
funds. This book  
explores both the light  
and shadows cast by  
globalization,

we would discuss and  
investigate the path  
along which important  
nations - first the

followed by the emerging
