Proceedings of the Annual Conference on Research, Educational Implementation, Social Studies and History (AREISSH 2021) Saefur Rochmat 2023-02-10 This is an open access book. The education sector during the Covid-19 Pandemic is currently undergoing a total reformation. The education process at schools and colleges which was carried out face-to-face has now turned into virtual face-to-face learning utilizing various platforms. Also, the Covid-19 Pandemic has impacted the research and development process in the field which must be delayed due to the risk of Covid-19 transmission. In regard to this, the educational process does not run optimally. In fact, education is the process of developing the future generation of a country that are supposed to be supported by all parties while looking for solutions to the problems at hand. As part of social sciences, the objects of historical study include humans who are bound by the dimensions of space and time. This confirms that history is part of science that is tied to human life. Therefore, various policies taken by the government must also be reviewed from the past historical experience with adjustments to the conditions of the era. Moreover, historical experience will provide an idea that humans are always innovating to solve the problems they face, especially policies related to education and learning. Based on those problems, History Education Study Program of the Faculty of Social Sciences, Universitas Negeri Yogyakarta will hold an

international conference on "Future Teaching and Learning: A Disruptive Innovation." The aim of the conference is providing a forum for exchanging information and finding solutions to learning and teaching problems in the current era of disruption, considering that the Covid-19 Pandemic has changed everything. It also introduces a new outlook in the services of libraries and museums. Covering topics such as countering fake news, human rights literacies, and outreach activities, this book is essential for community-based organizations, librarians, museum administrations, education leaders, information professionals, smart city design planners, digital tool developers, policymakers engaged in diversity, researchers, and academicians.
