Multicriteria Location Analysis H. A. Eiselt 2023-03-01 This book applies Multicriteria Decision Making (MCDM) tools and techniques to problems in location analysis. It begins with a generic model for MCDM and subsequently develops specific versions of the technique for particular location problems. Throughout the book, MCDM is understood to encompass all tools and techniques that choose or rank existing or feasible solutions, including discrete multi-attribute decision making (MADM) problems, which typically include an attribute table that specifies the consequences of each decision with regard to the given criteria, as well as multi-objective linear problems (MOLPs), which incorporate all objectives in a single optimization problem. The book is organized as follows: the first four chapters introduce readers to the basic tools and techniques used in single-objective optimization, multicriteria decision making, location analysis, and other tools, such as statistical regression and geographical information systems. This is followed by ten chapters on model applications, each of which introduces readers to a specific location problem and applies one technique to solve it. The book is then wrapped up in a closing chapter that looks at the location process from a practitioner's point of view. This book is intended as a textbook for upper-undergraduate and master-level courses on location analysis. It will also benefit decision-makers who actually need to locate facilities.

Timeshare Resort Operations Randall S. Upchurch 2006 This book provides a complete overview of timeshare development and operation models. The authors take a comprehensive look at the present and future of this growing segment of the hospitality industry, including specialized approaches to marketing,

human resources, service quality, finance, legal considerations and professional ethics. Timeshare, or vacation ownership, is a relatively recent leisure phenomenon. It emerged in the late 1950s as a way to secure extra capital resources to fund property expansion. Shareholders had the right to use these properties on a regular basis. Although arrangements have grown in complexity and variation, the model allows for customers to buy rights to use a property for a fixed time period each year. Timeshare arrangements have experienced rapid international growth particularly in the last fifteen to twenty years and are now an important vacation arrangement. Most of the world's major hotel and resort developers now operate timeshare properties. Firms like Marriott, Hilton, Hyatt, Disney and Ramada have brought a new formality and legitimacy to timeshare development and operation. * Covers the fastest growing area in the hospitality industry * Takes operational approach the entire timeshare product, not just marketing & sales * Clarifies the mystery of the timeshare product, cuts through preconceptions

Tourism and Colonization in Indochina (1898-1939) Aline Demay 2015-01-12 Direct flights to former imperial capitals, continued visits to the same tourist sites, and the emergence of tours dedicated to the imperial past all pose the question of the heritage of tourism in the former colonies. Lesser-known as a field of research, the study of tourism in colonial situations has begun to impose itself over the past decade as an important issue. Interestingly, in the colonial era, tourism was one element of the policies used by the colonial power to highlight its colony. The use of tourist activities for political ends was first confirmed in an October 2 1922 circular composed by the Minister of the Colonies, Albert Sarraut. This circular required all French overseas territories to organize and develop the tourism sector because, along with its economic benefits, "the tourist of today can be the colonist of tomorrow". This theme, along with knowledge related more specifically to tourism – such as the creation of sites and tours, and the background of tourists – also contributes to sanitary, environmental, and planning questions, as well as issues concerning the construction of national sentiment. How did tourism develop in a territory during the period of colonial expansion? How are tourism and colonization related? What connections can be found between the two? Using archives and tourist publications, this book marks an unprecedented work of research into the enactment of tourism in Indochina. It places the establishment of tourism in this former French colony along with the tourism policies of Metropolitan France and the attempts to reproduce the organizations established in the Dutch East Indies and in Japan. The book, which focuses on events in the period from the turn of the twentieth century to the eve of the Second World War, analyses the transfer of European tourism practices to Indochina, their establishment, their integration with policies of valorisation in the 1920s, their spatial consequences, and the communication established by the state to promote Indochina as a tourist destination for both Indochinese and foreign tourists.

Coastal Tourism, Sustainability, and Climate Change in the Caribbean, Volume I Martha Honey 2017-03-24 The Caribbean is the most tourism-dependent region in the world, and its tourism attractions and infrastructure and three-quarters of its people are concentrated along its coastlines. While the Caribbean contributes to less than 1 percent of global carbon emissions, its beaches and hotels are among the most vulnerable to climate impacts, including increasingly fierce and frequent hurricanes, sea-level rise, and loss of coral and mangroves. This book details many techniques for mitigating and adapting to climate impacts and demonstrates how socially and environmentally responsible companies are proving resilient in coping with climate change.

Facilities Planning And Design: An Introduction For Facility Planners, Facility Project Managers And Facility Managers (Second Edition) Jonathan Khin Ming Lian 2022-12-28 This book focuses on the ten essentials of facilities planning and design. It covers topics such as strategic planning, space standards, architectural programming, site selection, master planning, environmental planning, capital improvement planning, workplace planning and design, and space management. Examples will be drawn from the planning and design of airports and universities which are large organisations with extensive campuses and are asset heavy in terms of buildings. This second edition has been extensively updated with current and new examples, case studies and references. By learning about the planning and design processes as it relates to facilities, students and facility professionals will be able to align facilities planning and design with the organisation's strategic priorities, manage design consultants by understanding the planning and design process, manage the planning and design of spaces at different scales, and manage the use of existing space effectively. The book is designed such that its chapters may be read either sequentially or as individual standalone references

or resources for specific aspects of facility planning, management and design.

Hotel and Restaurant Industries Judith M. Nixon 1988 Abstract: The intention of this sourcebook is to provide a list of current materials that are essential for the collections of new schools of hotel and restaurant management. More than one thousand books and journals are reviewed and annotated. Emphasis has been placed on materials published in the 1980s, but earlier works are included if they have historic value or are still useful. Two appendices are included: a list of state and national/international associations, and a list of colleges offering hotel, restaurant, and foodservice programs.

Eco-resorts Zbigniew Bromberek 2009-06-04 Eco-Resorts is a design guide for low impact, environmentally friendly tourist resorts in the tropics. The book is the first to offer architects practical, detailed guidance in developing resort buildings that work with a tropical climate and meet the needs and expectations of the client and building inhabitants. The book includes both architectural design and material solutions, supported by theoretical principles, to present a sustainable approach to resort design. It demonstrates that tropical resort buildings do not necessarily require large energy input, in compliance with green building standards. Case studies show how principles of sustainable design have been successfully applied in tropical environments. * Written by an industry insider with practical design experience, knowledge and expertise. * Demonstrates design practices related to site planning and layout, and re-assesses best practices for a tropical environment, allowing architects to apply design principles to their own projects. * Includes international case studies from several countries to illustrate best practice from a variety of tropical climate destinations around the world. Z (Zbigniew) Bromberek, PhD, is an architect educated and registered in Poland, and postgraduate-educated and residing in Australia. Z has been practising and teaching architecture for nearly 30 years. He has been involved and associated with various educational institutions and professional organizations in a number of countries around the world. Before the current appointment as Senior Lecturer in Architecture at the University of Tasmania, Z spent three years as Lecturer in Environmental Design at the University of Queensland, and two years as Guest Professor in Architectural Design in Nanjing, PR China. He was also the President of the Architectural Science Association ANZAScA for three consecutive terms in 2000–05. Z's major research interests include design–environment interaction, low-impact architecture and re-integration of architecture as an expression of a multi-disciplinary approach to design.

Masters Theses in the Pure and Applied Sciences Wade H. Shafer 2013-12-11 Masters Theses in the Pure and Applied Sciences was first conceived, published, and disseminated by the Center for Information and Numerical Data Analysis and Synthesis, (CINDAS) *at Purdue University in 1957, starting its coverage of theses with the academic year 1955. Beginning with Volume 13, the printing and dissemination phases of the activity was transferred to University Microfilms/Xerox of Ann Arbor, Michigan, with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community. After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination. Hence, starting with Volume 18, Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York, and in the same year the coverage was broadened to include Canadian universities. All back issues can also be ordered from Plenum. We have reported in Volume 19 (thesis year 1974) a total of 10,045 theses titles from 20 Canadian and 209 United States universities. We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work. The organization of Volume 19 is identical to that of past years. It consists of theses titles arranged by discipline and by university within each discipline.

Retailing Principles Second Edition Lynda Rose Poloian 2013-03-15 What is retailing today? Who are the players and how do they operate? And what will happen tomorrow? These are just some of the questions addressed by Retailing Principles: Global, Multichannel and Managerial Viewpoints, 2nd Edition, which has been thoroughly updated to reflect current trends and conditions in the global retail market. An essential companion for any student seeking a career in the world of retail, the text focuses on the strategies that retailers both large and small are employing to thrive in this challenging economic climate, and in a marketplace where globalization, multi-channel retailing, and issues of sustainability are dominant factors. **Resorts** Robert Christie Mill 2008 This updated second edition of "Resorts: Management and Operation" addresses the expansion of the resort industry and provides practical, need-to-know information on the development and management of all aspects of these properties, which include ski areas, gaming properties, cruise ships, and spas.

Event Management ASHUTOSH CHATURVEDI 2009-11-10 The book provides a proven and effective system that is not only accountable and responsible but also fosters the creativity so essential to an industry called "events". There are two trends in the modern event industry. The first is the drive for professionalism in response to internal and external forces which shows in compressed form the historical process that is occurring in events. The other trend is convergence that is the convergence of corporate and public

events. This book not only describes the best practices in corporate event project management; it also allows you to prepare for the coming changes in the corporate event industry. It introduces the basic event project management process. It also explores the importance of the venue, or event site. The simple language of this book will be very helpful for the students.
