The reason why tongue acupuncture is being experimented with is because there is a connection between the tongue and the heart through the meridians that spread to all the organs in the body. It is believed that the points on the tongue can influence the state of the other body organs thus giving relief to the one suffering from autism.

But many believe that acupuncture alone cannot help autism sufferers. It has to be combined with other things like maintaining a certain diet to help improve one's mood and communication schools. Although it is only short term, it is better than nothing until a cure is found.

#### **Cholesterol in Adolescents**

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily,

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done. Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint disorder, and incorrect or misaligned jaw position.

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

**Legend call center management on fast forward succeeding:**There are basically 14 pathways throughout the body where chi flows continuously. These are called the meridian points. In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

A certified and trained acupuncturist will be able to carry out an excellent therapy session for the patient. Trainings for acupuncturists are given in order for them to obtain their licenses. A poor practitioner may not be proficient enough with the practice and could end up jeopardizing the results of the entire procedure. Nowadays, it is wise to verify on a practitioner's credentials to ensure a safe and effective acupuncture treatment.

A good massage would help give you a very relaxing sleep that night and an acupuncturist could help you with your sleep as well. You might be asking yourself how you'd be able to relax if you're suffering from the pain of the needles attached to your body. What you might not realize is that because of the thinness of the needles, you would hardly feel anything. The most that many people claim they feel is a kind of tingling feeling where the needles are. And that is actually a sign that the process is working,

Acupuncture is a practice that helps you use your bodies own ability to manage stress properly. This leaves you healthier, and more importantly, prevents any of the serious diseases that could come from unbalanced, stressful lifestyles.

Have you ever had an uncontrollable urge to be pierced by a dozen needles? This is the image most people get when someone mentions the word "acupuncture". It comes as no surprise that most view this technique with suspicion, even downright horror. The fact is, however, that this relatively painless ancient Chinese technique has helped relieve the symptoms of millions of people. Properly used, it can help in the management of many medical conditions including chronic pain and fatigue.

How does needle puncture work?

Practitioners of Chinese traditional medicine believe in energy flows. This energy, called Qi, circulates around the body using pathways called meridians. Meridians run very close to the surface of the skin in certain areas and can be accessed by needles. Much like plumbing, these pipes can get blocked or go the wrong way, causing health problems. The insertion of needles at these points is aimed to help loosen blocks and normalize flow.

Usually x-ray of the teeth is taken to evaluate the disease. Periodontal disease is classified into different types based on what stage the disease is in. The mildest form of gum disease is known as “gingivitis” in which gums become swollen, red and tender resulting in bleeding while daily brushing and flossing. Gingivitis is again divided into 4 groups primarily acute, sub-acute, recurrent and chronic. Acute gingivitis is nothing but sudden appearance which lasts for shorter duration and could be painful. Sub-acute gingivitis is less severe type of gingivitis. Recurrent gingivitis is the one that comes back after treatment. Chronic gingivitis is the one that onsets slowly, lasts longer and is generally painless. A dentist’s treatment and proper and continuous care can easily solve the problem of gingivitis but if left untreated could result in periodontitis. Periodontitis is further classified into mild and moderate to advance. Periodontitis results from untreated gingivitis. In this stage the deterioration of the bone in the vicinity of the tooth becomes evident. The common symptoms include red gums that bleed; mouth tastes bad; loose teeth; tooth loss. Proper treatment is a must to control the disease and prevent further deterioration. Periodontitis which is in moderate to advanced stage shows signs of major loss of tissue and bone loss near the teeth. There are various treatments available for periodontal disease which is decided by the dentist depending on teenager’s age, medical history and health in general. The method of treatment also depends on the extent to which disease has reached. The tolerance of the teenager to certain medicines, therapies and procedures are also taken into consideration. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.
