Created by Lloyd M. Dunn and Douglas M. Dunn, the test is made to evaluate vocabulary comprehension for Standard American English. It is quick and simple to carry out, preserving important time so that concentration can be set on executing successful interventions.

The PPVT-4 test subject matter covers a extensive range of vocabulary comprehension ranks, spanning from pre-kindergarten through adulthood. The assessment problems broadly sample words that represent 20 subject fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary. The evaluation provides two equal forms which hold distinct vocabulary items, ensuring that the individual has not "learned" the test. One version can be employed ahead of intervention implementation to evaluate test-takers' vocabulary understanding and the alternative version can be utilized for re-evaluation to assess and document improvement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is reactive to small changes over time.
