

The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary test that has been in operation for close to 50 years. Developed by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to evaluate vocabulary comprehension for Standard American English. It is swift and effortless to administer, conserving precious time so that focus can be set on executing intelligent strategies.

The PPVT-4 assessment material includes a broad scope of receptive vocabulary levels, ranging from preschool through adulthood. The evaluation questions extensively include words that depict 20 content fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The evaluation offers two equivalent versions which hold various vocabulary terms, guaranteeing that the test-taker has not “memorized” the assessment. One edition can be employed before intervention implementation to measure test-takers’ vocabulary understanding and the other edition can be employed for re-testing to evaluate and document improvement. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is responsive to minor changes over time.
