The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary assessment that has been in practice for nearly 50 years. Created by Lloyd M. Dunn and Douglas M. Dunn, the test is designed to measure receptive vocabulary for Standard American English. It is quick and simple to administer, saving important time so that attention can be set on implementing effective interventions.

The PPVT-4 assessment subject matter encompasses a broad scope of vocabulary comprehension levels, ranging from preschool through adulthood. The test questions widely include words that depict 20 topic domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and home and school vocabulary.

The assessment gives two identical versions which hold different vocabulary items, making sure that the individual has not “mastered” the test. One form can be used before intervention to assess test-takers’ vocabulary understanding and the alternative edition can be used for re-evaluation to evaluate and document improvement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is reactive to minor changes with time.

When grading a term paper, there are three important aspects to consider. First, the paper should be passionately written and captivating to read. Second, it should have good grammar and style (following MLA, APA, or CMS style). Third, it should be well documented with in-text references (in parentheses) linking their assertions to scholarly articles in the list of references at the end of the paper.
