About the salary of accountants, the lowest rate is roughly \$35,000 per year and that is for starters only. Once you're hired and you've been with a company for many years, the salary will naturally increase. Did you know that the senior accountants can earn as much as \$80,000 per year on the average? That's a lot of money, right? Being an accountant has its benefits, especially in term of salaries.

It seems that accountancy graduates of today are given more job opportunities. You should be thankful because unemployment is prevalent in many areas. If you're a graduate of accountancy, it means that you have better chances of finding a good paying job as compared to graduates of other courses. If you try to analyze the business situation, accountancy is essential to the success of a business organization or company. With the growing number of business worldwide, big scale or small scale, accountants are badly needed.

For those who are just going to start college, why don't you consider an accountancy course? According to statistics, the demand for knowledgeable accountants will increase in the years to come, so why not join the force? It will only take a couple of years to graduate. Make sure that you have excellent grades so that you will have an edge when you apply for a job. It pays to study hard now because you can use the knowledge in the future. You can be one of the assets of the biggest company in the world - now who wouldn't want that?

*Study symbiosis entrance test general sample papers file*\_\_The earliest account of this is found in the book called Nei Jing which in English means the Yellow Emperor's Classic of Internal Medicine. The contents of this book date somewhere around 200 BC. Back then, they did not use metal needles and instead used those made out of stone, moxibustion and herbs to treat a patient.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

**Discovery symbiosis entrance test general sample papers file:**Most of the auditing services are secured, private, and cheap. New companies are opting for these financial accounting services. These accounting services are cheap and you get a lot of benefits. It would be best to choose a financial accounting service locally because some laws differ in other countries. So while you're conducting a search online, you have to check the location of the accounting service and if ever you choose a foreign accounting service, you have to provide all the necessary information so that nothing goes wrong.

The various services offered by these chartered accountants are quite helpful especially in taxation, financial accounting, preparation of account statements, and a lot more. You don't have to worry about privacy issues because all business dealings are confidential and safe. These chartered accountants can be trusted.

However, it is a good idea to check out the background of these financial accounting services, just to be sure. You can check out the customer testimonials to see if the previous clients are satisfied with their services. it is one way of telling if the financial service can be trusted and if it is reputable in the industry.

But acupuncture is not risk free. Hematoma may develop if the needle punctures a circulatory structure. It is also possible that pneumothorax may occur if the needle is inserted too deep. There is also the risk of HIV and hepatitis if the needle was not properly sterilized.

Now that you know what acupuncture is, you must not forget that it is merely an alternative and not a proper form of medical treatment. This means you should still be examined by a professional in the medical field who can determine the severity of your illness or disease.

**Challenge symbiosis entrance test general sample papers file-**Acupressure is another example and here, the fingers are used to relieve the pain. This can be used by itself or with other manual healing techniques. Impulses of electromagnetic energy are used because our bodies generate tiny but electrical discharges which influence the function, growth and maturity of certain types of cells. By inserting the needles in these areas, it stimulates and alters the neurotransmitters in the body thus making the patient feel better after treatment. This is also sometimes used for diagnosis and testing.

According to the World Health Organization or WHO, here is a list of some illnesses where acupuncture is used. These include acute bronchitis, the common cold, cataract, toothaches, gingivitis, hiccups, ulcers, constipation, diarrhea, headache and migraine, Meniere's disease, osteoarthritis and a lot more. In the US, acupuncture is often used to treat chronic pain conditions and mind body disorders.

## **Transformation symbiosis entrance test general sample papers file.Types of Accountancy Career**

Now that you've taken up a course in accountancy, you probably know that there are various types of careers in accountancy waiting for you after you've graduated. If you pass the CPA examination, you will have higher chances in securing a position as a professional accountant.

Accounting in itself is considered an art. It involves analysis and interpretation of financial data. Do you believe that individuals and businesses need accounting one way or another? Aside from business establishments, individuals also make use of accounting in their everyday life. For instance, when you compute or evaluate your expenses, income, and other financial information, that is already considered accounting. Accounting is very important and because of that, it is considered an indispensable business tool. Big and small businesses, as well as individuals, need accounting.

Accounting is of several types and therefore, when you decide to look for an accountancy career in the future, you will notice that there are also several types of accountancy careers available.

## **First symbiosis entrance test general sample papers file Successful Career in Accounting Even if You're Hit Forty!**

You're never too old to dream, right? If it is your ambition to become a well-known and most sought-after accountant in the business industry, you can turn that dream into reality even if you're 40 years + already.

If you started planning your career path when you were still younger, your dream is within your arm's reach. In order to experience continuing success, you must have excellent knowledge in accountancy. You must work accurately and you should gather work experience through the years in the profession. Check these steps so that you can at least evaluate your situation right now:

1. You must excel in Mathematics - you must know how to manipulate numbers. Did you excel the subject when you were still in high school or college? As an accountant, you should love mathematics. If you hate it, then you're not an efficient accountant and you're bound to commit mistakes especially in the computation and analysis of financial data.

## **Obsession symbiosis entrance test general sample papers file The Benefits of an Accountancy Career**

There is an increase in demand for knowledgeable CPAs all over the world. When you say knowledgeable, the accountant must know how to perform various duties like bookkeeping, tax preparation, company audits, and even project management. The demand for the best CPAs in different industries is due to the updated laws, business practices, and the reliance to technology.

Here's great news to those accountancy graduates who love to work with numbers and who are willing to learn the newest accounting software - there are a lot of job opportunities out there, waiting for qualified accountants. According to statistics, the accountancy field is growing at a very fast rate. Control of pain is the most well researched of all of the indications for acupuncture. There is a definite beneficial effect for a majority of patients using this method. Migraines, premenstrual syndrome, arthritis, carpal tunnel syndrome, and neuralgias are but a few examples. The theory behind its effectiveness is also medically accepted and well researched, called the gate-control theory of pain. It states that the needles can stimulate nerves so that they block the impulses from pain triggers.

### Expected Puncture Session Result

It is important to emphasize that acupuncture is used only on top of existing medical therapy. At no time should a patient discontinue medication or ignore medical instructions in favor of needle puncture. After undergoing a needle puncture regimen, the primary care physician can make an evaluation with regards to decreasing dependence on other therapies.

symbiosis entrance test general sample papers file; Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of

career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

### **Anemia in Adolescents**

To understand what is anemia one should begin with breathing. The oxygen that is inhaled simply doesn't stop in lungs. It circulates though out the body and fuels the brains also. Oxygen travels to all parts of the body though bloodstream and to be precise in the RBCs I.e. red blood cells. Now, these RBCs are produced in the bone marrow of the body and they serve as boats carrying oxygen in the bloodstream. RBCs have something called hemoglobin, a protein which holds oxygen. To make adequate hemoglobin body requires iron in plenty. The iron is supplied by the foods that we take along with other nutrients. When these RBCs are fewer in number than what is needed anemia occurs in the body. There can be 3 primary reasons: RBCs are lost due to some reason, the production of RBCs is slower than what is needed and lastly the body is destroying the RBCs. Different types of anemia are linked to at least one of these causes.

#### **Common Oral Health Problems in Adolescents**

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done.

Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint disorder, and incorrect or misaligned jaw position.

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

This depends upon the complexity of the particular medical condition. Results also vary, so it is important to have a frank discussion with the acupuncturist regarding expected results and their time frame. In general, the patient will begin to feel beneficial effects after three or four session. Certain specific conditions will actually get a little worse before improving so keeping informed is key.

In modern medicine, the use of traditional techniques with proven results has become a widely accepted practice. Acupuncture has proven its worth time and again. Modern practice guidelines make it effective, reproducible, and safe. It is a gift of healing form ancient sages that has the potential to bring relief to millions of people.

Preliminary studies have shown that acupuncture may provide symptomatic relief to children suffering from autism. Although difficult at first, it is believed that it is rewarding in the long run. This is because while conventional therapy and treatment requires that the child stay still, acupuncture doesn't. Some say it's a quick prick at the vital points in the body.

### **What is acupuncture?**

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

### **Basic Procedure**

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the body's natural painkillers called endorphins are released, thus helping with pain relief.

### **Acupuncture For All Those Simple Aches And Pains**

If, like me, you have quite a fear of needles and injections, then acupuncture, that practice of sticking needles onto different parts of your body to cure sicknesses might seem scary at first.

However, if you've been long been suffering from some problems like headaches or chronic pains and your regular visits to the doctor don't seem to be helping you, then why not consider a trip to an acupuncture specialist? After all, who hasn't heard of somebody's aunt somewhere suffering from arthritis and trying out everything that the doctors recommended all to no avail, only to finally be cured by a really good acupuncturist?

Perhaps you were wondering if it could actually work for you. You might feel a bit skeptical since traditional Chinese medicine doesn't immediately coincide with theories in modern Western medicine. In fact, the use of needles to cure people was discovered thousands of years ago in China long before microscopes or x-ray machines were invented or before bacteria and germs were discovered.

#### **Acupuncture Closely Revealed**

The foundation of acupuncture rests on the relevance of an individual's chi in maintaining bodily and mental health. It is believed that chi is present in every living creature, and flows through specific pathways in the body. Health problems arise when the flow of chi on the body is blocked. As a result, a person may feel persistent headaches, muscle pain, fever, weakness, or in the worst case, becomes afflicted with more serious health conditions.

A Deeper Explanation of Acupuncture

Acupuncture has its origins in ancient Chinese philosophy and practice. More than ten thousand years ago, during the Old Stone Age of China, stones were fashioned into knives for medical purposes. After several years, during the New Stone Age, these stones were eventually made into needles intended for the same therapeutic end. These accounts are further evidenced by unearthed stone needles found to be of the same types used during the New Stone Age.

The placement of needles is usually located behind the ear, or on the ear cartilage. This is where the calming effect takes place, curbing the patient's cravings for more cigarettes. People who have a smoking habit are bound to take up the nicotine stick more often whenever they feel stressed, bored, or depressed. Needles are also often inserted on the hand and wrists to promote a steadier flow of bodily energy. The feeling of relaxation will help an individual think twice about lighting a cigarette again.

Furthermore, this treatment has been found to help an individual deal with the withdrawal symptoms better. This alternative medicine promotes better tolerance to pain and discomfort during smoking cessation.

Withdrawal symptoms can range from mild to severe and may involve nausea, palpitations, and dizziness. Oftentimes, these same conditions will propel an individual back to his smoking tendencies sooner than later.

**Liberation symbiosis entrance test general sample papers file**-There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won't result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. Eye shadows which are glittery, pearlized, frosted or iridescent contain ground tinsel or oyster shell, which should be always avoided. Eyeliner should not be applied in the inner lid edge. Loose powder should be avoided. Cream should not be applied near the eyes. The wearer should wash hands while handling contact lens. High blood pressure is a condition where the blood pressure is more than normal. It is also known as hypertension. Heart pumps out blood, so that oxygen can reach to different parts of the body via blood. The pressure

with which heart pumps blood is known as blood pressure. The blood pressure comprises of two measures, the systolic pressure and diastolic pressure. Systolic pressure is the larger figure and represents the pressure within the artery of the heart, when contractions take place which pump blood to different parts of the body. Diastolic pressure is the pressure within the artery of the heart, when the blood is filling in the heart and it is at rest. Both the pressures are measured in millimeters of mercury or mmHg. High blood pressure is abnormal increase in systolic pressure or diastole pressure.

Blood pressure is measured by putting a blood pressure cuff on the arm and placing a stethoscope on the chest. There can be very little variation in blood pressure depending upon the time, emotional moods, age, gender, weight, height, physical activity, stress and other illness such as heart disease and kidney disease. Children and adolescents become anxious when they visit the doctor. This is also an important factor which affects the blood pressure and the readings taken get tampered because of it. That is the reason why many blood pressure readings are taken in order to determine whether the adolescent has high blood pressure or not. The nurse may even ask the adolescent to calm down while taken the readings. Time gap is given between each reading, so as to give time to the adolescent to calm down. Emotions can also affect the blood pressure reading.

In order for chi to course through the body unobstructed, there has to be a balance between the strengths of yin and yang. In ancient Chinese philosophy, yin and yang represent the forces of the universe- yin is for feminine, while yang is for masculine. Every single thing in the universe is believed to contain both yin and yang for harmony.

When the yin and yang are not balanced, chi cannot stream through the body liberally. Therefore, the meridian points through which chi courses through need to be stimulated. This is done by the insertion of hair-thin, disposable needles in specific areas on a person's body to induce bodily harmony and bring about healing.

A certified and trained acupuncturist will be able to carry out an excellent therapy session for the patient. Trainings for acupuncturists are given in order for them to obtain their licenses. A poor practitioner may not be proficient enough with the practice and could end up jeopardizing the results of the entire procedure. Nowadays, it is wise to verify on a practitioner's credentials to ensure a safe and effective acupuncture treatment.

**Analysis symbiosis entrance test general sample papers file**...Amenorrhea is the condition in which the female skips her menses for more than three consecutive menstrual cycles. Amenorrhea is also classified as primary amenorrhea and secondary amenorrhea. Primary amenorrhea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhea is a condition where periods become irregular after a period of time and not from the start.

There are many causes of amenorrhea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy.

Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

### **Obsessive Compulsive Disorder in Adolescents**

Obsessive compulsive disorder or OCD starts from adolescence onwards. OCD is feeling of strong obsessions and compulsions which result in intense discomfort and affects daily functioning. Obsessions are thoughts which are persistent and recurrent. They even include unwanted images and impulses which lead to distress and anxiety. These feelings and thoughts are usually irrational or unrealistic. Compulsions are repetitive rituals or behavior such as checking something again & again, or mental acts such as counting. These obsessions & compulsions cause intense distress and anxiety and can interfere with the daily activities, relationships, social activities and academic functioning. The person with OCD thinks that he has no control over his actions. OCDs are relapsing and chronic illness.

The thoughts change as the adolescent grows. Younger children suffering from OCD often have thoughts of harm befalling on them and their family such as thief getting into the house through an unlocked door. This will make the children to recheck the door and windows again and again fearing that they might have left the door unlocked accidentally. Teenagers suffering from OCD fear that they might get fall sick due to germs, contaminated food and AIDS. The adolescent develops certain rituals, such as washing hands innumerable times, in order to get over the fear. These rituals help them to think that they have overcome the problem for the time being and give them temporary relief. If they do not perform these rituals, they become more and more anxious.

The brain activity patterns of such people differ from normal people and people with other mental disorders. Researchers have concluded that OCD is usually a family problem and is a disorder of the brain. Streptococcal bacterial infection can create or worsen the condition of OCD. Adolescents with no family history of OCD can also develop it. Most of the adolescents feel embarrassed to talk about their OCDs. They think that people will label them as crazy and this will make them feel ashamed. This will make it difficult for the parents to talk to their children about their OCD, in order to solve them. Parents need to develop good communication skills for this purpose. Parent's support is also very important to the adolescent. Cooperation is extremely important along with treatment, because if the problem is not treated the adolescent will grow into a disturbed adult.

Most of the adolescents with OCD can receive effective treatment. The treatment can include psychotherapy and intake of medications such as fluoxetine, clomipramine, fluvoxamine, paroxetine, sertraline and other serotonin reuptake inhibitors. When OCD is caused due to streptococcal infection, the adolescent can be administered with antibiotics to kill the bacterium which is causing it. Exposure and response prevention behavioral therapy is very useful in solving OCD. In this therapy, the adolescent is wotedly exposed to his/her fears which give him/her obsessive thought. After that he/she is trained to avoid these thoughts and the rituals which he/she carries out to tackle the anxiety.

An adolescent having OCD can also have depression, substance abuse, attention deficit hyperactivity disorder, eating disorders, and other types of anxiety disorders. When a person with OCD and other mental illness, is treated, OCD becomes more difficult to treat and even diagnose.
