Making Sense of "bad English" 2019 Elizabeth Peterson Why is it that some ways of using English are considered "good" and others are considered "bad"? Why are certain forms of language termed elegant, eloquent or refined, whereas others are deemed uneducated, coarse, or inappropriate? Making Sense of "Bad English" is an accessible introduction to attitudes and ideologies towards the use of English in different settings around the world. Outlining how perceptions about what constitutes "good" and "bad" English have been shaped, this book shows how these principles are based on social factors rather than linguistic issues and highlights some of the real-life consequences of these perceptions. Features include: an overview of attitudes towards English and how they came about, as well as real-life consequences and benefits of using "bad" English; explicit links between different English language systems, including child's English, English as a lingua franca, African American English, Singlish, and New Delhi English; examples taken from classic names in the field of sociolinguistics, including Labov, Trudgill, Baugh, and Lambert, as well as rising stars and more recent cutting-edge research; links to relevant social parallels, including cultural outputs such as holiday myths, to help readers engage in a new way with the notion of Standard English; supporting online material for students which features worksheets, links to audio and news files, further examples and discussion questions, and background on key issues from the book. Making Sense of "Bad English" provides an engaging and thought-provoking overview of this topic and is essential reading for any student studying sociolinguistics within a global setting.

Warraparna Kurna! 2016-02-22 Rob Amery This book tells the story of the renaissance of the Kurna language, the language of Adelaide and the Adelaide Plains in South Australia, principally over the earliest period up until 2000, but with a summary and brief discussion of developments from 2000 until 2016. It chronicles and analyses the efforts of the Nunga community, and interested others, to reclaim and relearn a linguistic heritage on the basis of mid-nineteenth-century materials. This study is breaking new ground. In the Kurna case, very

little knowledge of the language remained within the Aboriginal community. Yet the Kurna language has become an important marker of identity and a means by which Kurna people can further the struggle for recognition, reconciliation and liberation. This work challenges widely held beliefs as to what is possible in language revival and questions notions about the very nature of language and its development.

Cognitive Exploration of Language and Linguistics 2004-06-30 René Dirven Cognitive Exploration of Language and Linguistics is designed as a comprehensive introductory text for first and second-year university students of language and linguistics. It provides a chapter on each of the more established areas in linguistics such as lexicology, morphology, syntax, phonetics and phonology, historical linguistics, and language typology and on some of the newer areas such as cross-cultural semantics, pragmatics, text linguistics and contrastive linguistics. In each of these areas language is explored as part of a cognitive system comprising perception, emotion, categorisation, abstraction processes, and reasoning. All these cognitive abilities may interact with language and be influenced by language. Thus the study of language in a sense becomes the study of the way we express and exchange ideas and thoughts. This Second Revised Edition is corrected, updated and expanded. Cognitive Exploration of Language and Linguistics is clearly presented and organized after having been tested in several courses in various countries. Includes exercises (solutions to be found on the Internet).

Children's Literature in Translation 2020-10-30 Jan Van Coillie For many of us, our earliest and most meaningful experiences with literature occur through the medium of a translated children's book. This volume focuses on the complex interplay that happens between text and context when works of children's literature are translated: what contexts of production and reception account for how translated children's books come to be made and read as they are? How are translated children's books adapted to suit the context of a new culture? Spanning the disciplines of Children's Literature Studies and Translation Studies, this book brings together established and emerging voices to provide an overview of the analytical, empirical and geographic richness of current research in this field and to identify and reflect on common insights, analytical perspectives and trajectories for future interdisciplinary research. This volume will appeal to an interdisciplinary audience of scholars and students in Translation Studies and Children's Literature Studies and related disciplines. It has a broad geographic and cultural scope, with contributions dealing with translated children's literature in the United Kingdom, the United States, Ireland, Spain, France, Brazil, Poland, Slovenia, Hungary, China, the former Yugoslavia, Sweden, Germany, and Belgium.

Knowledge Graphs 2022-06-01 Aidan Hogan This book provides a comprehensive and accessible introduction to knowledge graphs, which have recently garnered notable attention from both industry and academia. Knowledge graphs are founded on the principle of applying a graph-based abstraction to data, and are now broadly deployed in scenarios that require integrating and extracting value from multiple, diverse sources of data at large scale. The book defines knowledge graphs and provides a high-level overview of how they are used. It presents and contrasts popular graph models that are commonly used to represent data as graphs, and the languages by which they can be queried before describing how the resulting data graph can be enhanced with notions of schema, identity, and context. The book discusses how ontologies and rules can be used to encode knowledge as well as how inductive techniques-based on statistics, graph analytics, machine learning, etc.-can be used to encode and extract knowledge. It covers techniques for the creation, enrichment, assessment, and refinement of knowledge graphs and surveys recent open and enterprise knowledge graphs and the industries or applications within which they have been most widely adopted. The book closes by discussing the current limitations and future directions along which knowledge graphs are likely to evolve. This book is aimed at students, researchers, and practitioners who wish to learn more about knowledge graphs and how they facilitate extracting value from diverse data at large scale. To make the book accessible for newcomers, running examples and graphical notation are used throughout. Formal definitions and extensive references are also provided for those who opt to delve more deeply into specific topics.

Children's Literature in Translation 2014-07-16 Jan Van Coillie Children's classics from Alice in Wonderland to the works of Astrid Lindgren, Roald Dahl, J.K. Rowling and Philip Pullman are now generally recognized as literary achievements that from a translator's point of view are no less demanding than 'serious' (adult) literature. This volume attempts to explore the various challenges posed by the translation of children's literature and at the same time highlight some of the strategies that translators can and do follow when facing these challenges. A variety of translation theories and concepts are put to critical use, including Even-Zohar's polysystem theory, Toury's concept of norms, Venuti's views on foreignizing and domesticating translations and on the translator's (in)visibility, and Chesterman's prototypical approach. Topics include the ethics of translating for children, the importance of child(hood) images, the 'revelation' of the translator in prefaces, the role of translated children's books in the establishment of literary canons, the status of translations in the former East Germany; questions of taboo and censorship in the translation of adolescent novels, the collision of norms in different translations of a Swedish children's classic, the handling of 'cultural intertextuality' in the Spanish translations of contemporary British fantasy books, strategies for translating cultural markers such as juvenile expressions, functional shifts caused by different translation strategies dealing with character names, and complex translation strategies used in dealing with the dual audience in Hans Christian Andersen's fairy tales and in Salman Rushdie's Haroun and the Sea of Stories.

Entertainment-Education Behind the Scenes 2021 Lauren B. Frank This Open Access book tracks the latest trends in the theory, research, and practice of entertainment-education, the field of communication that incorporates social change messaging into entertaining media. Sometimes called edutainment, social impact television, narrative persuasion, or cultural strategy, this approach to social and behavior change communication offers new opportunities including transmedia and digital formats. However, making media can be a chaotic process. The realities of working in the field and the rigid structures of scholarly evaluation often act as barriers to honest accounts of entertainment-education practice. In this collection of essays, experienced practitioners offer unique insight into how entertainment-education works and present a balanced view of its potential pitfalls. This book gives readers an opportunity to learn from the successes and mistakes of the experts, taking a behind-the-scenes look at the business of making entertainment-education media.

Identity 2018-09-11 Francis Fukuyama The New York Times bestselling author of The Origins of Political Order offers a provocative examination of modern identity politics: its origins, its effects, and what it means for domestic and international affairs of state In 2014, Francis Fukuyama wrote that American institutions were in decay, as the state was progressively captured by powerful interest groups. Two years later, his predictions were borne out by the rise to power of a series of political outsiders whose economic nationalism and authoritarian tendencies threatened to destabilize the entire international order. These populist nationalists seek direct charismatic connection to "the people," who are usually defined in narrow identity terms that offer an irresistible call to an in-group and exclude large parts of the population as a whole. Demand for recognition of one's identity is a master concept that unifies much of what is going on in world politics today. The universal recognition on which liberal democracy is based has been increasingly challenged by narrower forms of recognition based on nation, religion, sect, race, ethnicity, or gender, which have resulted in anti-immigrant populism, the upsurge of politicized Islam, the fractious "identity liberalism" of college campuses, and the emergence of white nationalism. Populist nationalism, said to be rooted in economic motivation, actually springs from the demand for recognition and therefore cannot simply be satisfied by economic means. The demand for identity cannot be transcended; we must begin to shape identity in a way that supports rather than undermines democracy. Identity is an urgent and necessary book—a sharp warning that unless we forge a universal understanding of human dignity, we will doom ourselves to continuing conflict.

An American Utopia 2016-07-12 Fredric Jameson Controversial manifesto by acclaimed cultural theorist debated by leading writers Fredric Jameson's pathbreaking essay "An American Utopia" radically questions standard leftist notions of what constitutes an emancipated society. Advocated here are—among other things—universal conscription, the full acknowledgment of envy and resentment as a fundamental challenge to any communist society, and the acceptance that the division between work and leisure cannot be overcome. To create a new world, we must first change the way we envision the world. Jameson's text is ideally placed to trigger a debate on the alternatives to global capitalism. In addition to Jameson's essay, the volume includes responses from philosophers and political and cultural analysts, as well as an epilogue from Jameson himself. Many will be appalled at what they will encounter in these pages—there will be blood! But perhaps one has to spill such (ideological) blood to give the Left a chance. Contributing are Kim Stanley Robinson, Jodi Dean, Saroj Giri, Agon Hamza, Kojin Karatani, Frank Ruda, Alberto Toscano, Kathi Weeks, and Slavoj Žižek.

Rethinking the Andes-Amazonia Divide 2020-10-21 Adrian J. Pearce Nowhere on Earth is there an ecological transformation so swift and so extreme as between the snow-line of the high Andes and the tropical rainforest of Amazonia. The different disciplines that research the human past in South America have long tended to treat these two great subzones of the continent as self-contained enough to be taken independently of each other. Objections have repeatedly been raised, however, to warn against imagining too sharp a divide between the people and societies of the Andes and Amazonia, when there are also clear indications of significant connections and transitions between them. Rethinking the Andes-Amazonia Divide brings together archaeologists, linguists, geneticists, anthropologists, ethnohistorians and historians to explore both correlations and contrasts in how the various disciplines see the relationship between the Andes and Amazonia, from deepest prehistory up to the European colonial period. The volume emerges from an innovative programme of conferences and symposia conceived explicitly to foster awareness, discussion and co-operation across the divides between disciplines. Underway since 2008, this programme has already yielded major publications on the Andean past, including History and Language in the Andes (2011) and Archaeology and Language in the Andes (2012).

Introduction to Applied Linguistics 2007-07-12 Alan Davies This second edition of the foundational textbook An Introduction to Applied Linguistics provides a state-of-the-art account of contemporary applied linguistics. The kinds of language problems of interest to applied linguists are discussed and a distinction drawn between the different research approach taken by theoretical linguists and by applied linguists to what seem to be the same problems. Professor Davies describes a variety of projects which illustrate the interests of the field and highlight the marriage it offers between practical experience and theoretical understanding. The increasing emphasis of applied linguistics on ethicality is linked to the growth of professionalism and to the concern for accountability, manifested in the widening emphasis on critical stances. This, Davies argues, is at its most acute in the tension between giving advice as the outcome of research and taking political action in order to change a situation which, it is claimed, needs ameliorisation. This dilemma is not confined to applied linguistics and may now be endemic in the applied disciplines.

The United Nations, Peace and Security 2006-06-08 Ramesh Thakur Preventing humanitarian atrocities is becoming as important for the United Nations as dealing with inter-state war. In this book, Ramesh Thakur examines the transformation in UN operations, analysing its changing role and structure. He asks why, when and how force may be used and argues that the growing gulf between legality and legitimacy is evidence of an eroded sense of international community. He considers the tension between the US, with its capacity to use force and project power, and the UN, as the centre of the international law enforcement system. He asserts the central importance of the rule of law and of a rules-based order focused on the UN as the foundation of a civilised system of international relations. This book will be of interest to students of the UN and international organisations in politics, law and international relations departments, as well as policymakers in the UN and other NGOs.

Agency, Contingency and Census Process 2007-12-01 Frances Morphy The Indigenous Enumeration Strategy (IES) of the Australian National Census of Population and Housing has evolved over the years in response to the perceived 'difference' of the Aboriginal and Torres Strait Islander populations. Its defining characteristics are the use of locally recruited, mostly Indigenous collector interviewers, and the administration of a modified collection instrument in discrete Indigenous communities, mostly in remote Australia. The research reported here is unique. The authors, with the assistance of the Australian Bureau of

Statistics, were able to follow the workings of the IES in the 2006 Census from the design of the collection instrument to the training of temporary census field staff at the Northern Territory's Census Management Unit in Darwin, to the enumeration in four remote locations, through to the processing stage at the Data Processing Centre in Melbourne. This allowed the tracking of data from collection to processing, and an assessment of the effects of information flows on the quality of the data, both as input and output. This study of the enumeration involved four very different locations: a group of small outstation communities (Arnhem Land), a large Aboriginal township (Wadeye), an 'open' town with a majority Aboriginal population (Fitzroy Crossing), and the minority Aboriginal population of a major regional centre (Alice Springs). A comparison between these contexts reveals differences that reflect the diversity of remote Aboriginal Australia, but also commonalities that exert a powerful influence on the effectiveness of the IES, in particular very high levels of short-term mobility. The selection of sites also allowed a comparison between the enumeration process in the Northern Territory, where a time-extended rolling count was explicitly planned for, and Western Australia, where a modified form of the standard count had been envisaged. The findings suggest that the IES has reached a point in its development where the injection of ever-increasing resources into essentially the same generic set and structure of activities may be producing diminishing returns. There is a need for a new kind of engagement between the Australian Bureau of Statistics and local government and Indigenous community-sector organisations in remote Australia. The agency and local knowledge of Indigenous people could be harnessed more effectively through an ongoing relationship with such organisations, to better address the complex contingencies confronting the census process in remote Indigenous Australia.

Epistemologies of the South 2015-11-17 Boaventura de Sousa Santos This book explores the concept of 'cognitive injustice': the failure to recognise the different ways of knowing by which people across the globe run their lives and provide meaning to their existence. Boaventura de Sousa Santos shows why global social justice is not possible without global cognitive justice. Santos argues that Western domination has profoundly marginalised knowledge and wisdom that had been in existence in the global South. She contends that today it is imperative to recover and valorize the epistemological diversity of the world. Epistemologies of the South outlines a new kind of bottom-up cosmopolitanism, in which conviviality, solidarity and life triumph against the logic of market-ridden greed and individualism.

Well positioned at the cutting edge of Cold War studies, this important work illuminates some of the striking paradoxes involved in the production and reception of culture in East and West.

Crosslinguistic Influence and Second Language Learning 2021-11-01 Kevin McManus Crosslinguistic Influence and Second Language Learning provides a comprehensive overview of what is currently known about prior language knowledge and experience in second language learning. Three bodies of research are critically reviewed to achieve this goal: (i) theories of language learning that attribute critical roles to prior experience in explaining second language development, (ii) empirical studies of second language learning that have investigated roles for crosslinguistic influence, and (iii) instructional studies that have supported second language learning by addressing the negative effects of crosslinguistic influence. Using this foundation, new research directions and theorization in the field of second language acquisition are proposed. This book will serve as an excellent resource for students and scholars with interests in (instructed) second language learning, applied linguistics, cognitive psychology, psycholinguistics, and language education.

Text Genetics in Literary Modernism and other Essays 2018-02-20 Hans Walter Gabler This collection of essays from world-renowned scholar Hans Walter Gabler contains writings from a decade and a half of retirement spent exploring textual criticism, genetic criticism, and literary criticism. In these sixteen stimulating contributions, he develops theories of textual criticism and editing that are inflected by our advance into the digital era; structurally analyses arts of composition in literature and music; and traces the cultural implications discernible in book design, and in the canonisation of works of literature and their authors. Distinctive and ambitious, these essays move beyond the concerns of the community of critics and scholars. Gabler responds innovatively to the issues involved and often endeavours to re-think their urgencies by bringing together the orthodox tenets of different schools of textual criticism. He moves between a variety of topics, ranging from fresh genetic approaches to the work of James Joyce and Virginia Woolf, to significant contributions to the theorisation of scholarly editing in the digital age. Written in Gabler's fluent style, these rich and elegant compositions are essential reading for literary and textual critics, scholarly editors, readers of James Joyce, New Modernism specialists, and all those interested in textual scholarship and digital editing under the umbrella of Digital Humanities.

English as an International Language 2009-01-08 Farzad Sharifian The rapid global spread of the English language has serious linguistic, ideological, socio-cultural, political, and pedagogical implications as it creates both positive interactions and negative tensions between global and local forces. Accordingly, debate about issues such as the native/non-native divide, the politics of an international language, communication in a Lingua Franca, the choice of a model for ELT, and the link between English and identity(ies) has stimulated scholarly inquiry in an unprecedented way. The chapters in this volume revisit, challenge, and expand upon established arguments and positions regarding the politics, policies, pedagogies, and practices of English as an international language, as well as its sociolinguistic and socio-psychological complexities.
