100 Things to Learn Before You're 10 2017-03-29 Gail Hugman '100 Things to Learn before you're 10' is an educational book to help parents. Drawing on 40 years teaching experience, it explains why every child would benefit from the little extra help it provides during their formation years. This book is packed with examples, activities, insights and stories. It helps show you how to make sure your children learn the skills they need to get the most out of school and life. Give your child what they really need so that they become happier, more confident and self assured as they learn. They will grow to be well rounded adults! It is during the first 12 years after birth that each life develops the framework for its future. Parents who are

life and work, while they are raising their children ask many questions. They may often feel their children 'could do better' and become very concerned if a child's school report highlights this. However, many parents aren't confident with changing children's attitudes, what to teach or how to really motivate and encourage them. Especially if the children have 'switched off' and no longer respond to what their parents say. This book addresses these issues and questions and looks at the reasons why so many children underperform at school and what can be done about aligning them at core, so that they stay connected to the positive influences that are in them at birth. It puts forward tried and tested lessons, tools and strategies that have been developed during forty years of teaching experience and have been repeatedly proven effective with children.

The guide offers the fruit of my experiences, gleaned from a lifetime in the classroom. Writing this book has been a labor of love, and it is my sincere hope that all educators reading this book will find some fresh insight into the wonderful profession of teaching. Pencils Down! will take you on a journey whose itinerary begins in elementary school and spans more than four decades. I have taken that journey at the head of the class. Many an author has written a book on education without ever having stepped into a real classroom. Nevada school systems prompted me to write this book, a book packed with lessons that work, school humor, enrichment activities, and sage advice ready to be used by anyone who desires to instill a love of learning in a child. You may wish to do many of the lessons with your students. Most of the text deals with activities based on beloved children's books. I have selected more than fifty children's books I most enjoyed reading and teaching my students. Although some of these books never achieved Newbery Medal award status, each book teaches something of life's lessons, and each is a gem. My first priority was selecting excellent children's books. I have selected a broad and diverse collection of children's books with the hope that by using these books daily with all elementary school children, each child can learn to love books and appreciate the extended benefits

Welcome to Pencils Down!Part One: School Humor You are reading this either because you are contemplating a career in teaching or are curious to find out whether a veteran teacher can still be sane after spending forty-five years in the classroom. Part One presents the humorous side to an otherwise serious profession. You will get a glimpse of nineteenth and early twentieth century rules for teachers and peruse a copy of the contract teachers were made to sign. Both will make you wonder why anyone would consider a career in education. You will find out what teachers make and be privy to the public's low opinion of teachers' salaries. If you survive the reality show for educators, you may continue reading the book. School anecdotal incidents, accrued from many years in the classroom, will be shared. You will

Thinking Tools for Kids

1999-01-01 Barbara A. Cleary

Perhaps the first book of its kind written especially for young people, Thinking Tools for Kids describes everyday challenges grade school kids encounter which can be solved by a variety of quality tools. Each chapter starts out with a story that presents a problem students may come across. the authors then explain which tools can be used to overcome these problems, and give examples of how to apply these tools to other problems as well. the many illustrations aid in the students' understanding of the tools they are using, while the helpful glossary aids the parents and teachers. At the end of each chapter the authors give a home connection, which encourages kids to take what they have learned and apply it to problems at home.

The author discusses the different kinds of story that are useful in the classroom context, including traditional stories, fairy tales and sacred stories, and explores the impact of individual and group dynamics on the telling and reception of these stories. She also considers recognised therapeutic uses of storytelling. She provides a series of sample stories and gives practical tips on adapting these to suit different situations and meet different needs. She also advises on a range of techniques such as using props, allowing 'reflection' time and prompting interaction. Sections on collective stories and the child as storyteller explain how children can be inspired to compose their own tales that offer opportunities to practise self-expression and negotiation.
