The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a widely recognized vocabulary evaluation that has been in practice for close to half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the test is crafted to assess vocabulary comprehension for American English. It is quick and simple to conduct, conserving valuable time so that attention can be set on executing successful approaches.

The PPVT-4 evaluation subject matter includes an extensive array of receptive vocabulary levels, ranging from pre-kindergarten through adulthood. The assessment items extensively sample words that portray 20 subject areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and educational vocabulary. The evaluation offers two equivalent editions which hold different vocabulary terms, ensuring that the individual has not “memorized” the assessment. One edition can be employed ahead of intervention implementation to measure individuals’ vocabulary understanding and the other form can be employed for re-testing to evaluate and document advancement. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is sensitive to minor changes in time.
