The Northstar engine, produced by General Motors (GM) from 1993 until 2011, was a high-quality 90° V engine range and GM's first manufacturing V-8 with overhead camshafts¹. However, regardless of its original success, the Northstar engine has been connected with a number of problems over the years.

One of the most common issues is overheating, which can lead to substantial destruction to the engine block. An additional trouble is oil use, which can result in bad fuel economy and pricey repairs. Many Northstar engine proprietors also note issues with head gaskets, which can lead to overheating issues and result in costly repairs.

Specifically, the Northstar engine versions from 1993 to 2005 have been reported to have leakage problems, broken seals, broken head gaskets, extra oil loss, damaged valve cover, malfunctioning water pumps, and carbon accumulation. These troubles are not major, but the price to repair the problems was substantially higher than a lot of other engines because of the intricate engineering.

The field of Engineering Economics and Cost Estimation is a vital aspect of any engineering project. It involves current and upcoming economic factors, making it essential to obtain reliable estimates of future costs, benefits, and other economic parameters. Engineers frequently deal with projects whose scale, complexity, and uncertainty call for advanced approaches to planning and budgeting^[1]. A number of methods are used for cost estimation, including rough estimates, semi-detailed estimates, or detailed estimates, depending on the needs for the estimates^[2]. Key concepts in this field include overhead costs, cost driver identification, cost allocation methods, capital budgeting, flexible budgeting, zero-based budgeting, budgets, and estimates. Various models are available for developing cost (or benefit) estimates, such as the per-unit model, the segmenting model, cost indexes, the power-sizing model, and learning curve cost estimating. The quality of a cost estimate usually increases as the resources allocated to developing the estimate increase.
