The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a highly regarded vocabulary test that has been in use for almost half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to assess receptive vocabulary for Standard American English. It is fast and simple to conduct, saving important time so that attention can be put on executing effective interventions.

The PPVT-4 test material covers a wide scope of vocabulary comprehension levels, ranging from preschool through adulthood. The test problems widely include words that portray 20 topic areas (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and school vocabulary.

The test offers two identical editions which hold different vocabulary words, guaranteeing that the individual has not "learned" the evaluation. One form can be employed ahead of intervention to measure people's vocabulary comprehension and the alternative edition can be employed for re-evaluation to assess and note progress. The PPVT-4 also contains a unique Growth Scale Value (GSV) which is sensitive to small changes over time.
