più recenti problematiche relative alla lettura a scuola (biblioteche scolastiche, iniziative ministeriali), lo sviluppo dei generi di maggior successo (dalla poesia alla prosa di divulgazione scientifica e al fantasy) e l'analisi di alcuni personaggi letterari 'di culto' come Harry Potter e Geronimo Stilton, divenuti in breve tempo veri e propri fenomeni mediatici.

## *Body Music*

2017-11-20 Julie Maroh Julie Maroh's first book, *Blue Is the Warmest Color*, was a graphic novel phenomenon; it was a New York Times bestseller and the controversial film adaptation by French director Abdellatif Kechiche won the Palme d'Or at the Cannes Film Festival in 2013. Maroh's latest book, *Body Music*, marks her return to the kind of soft, warm palette and impressionistic sensibility that made her debut book so sensational. Set in the languid, European-like neighborhoods of Montreal, *Body Music* is a beautiful and moving meditation on love and desire as expressed in their many different forms?between women, men, and gender non-conformists alike, all varying in age and race. In twenty separate vignettes, Maroh explores the drama inherent in relationships at different stages: the electricity of initial attraction, the elation of falling in love, the trauma of breaking up, the sweet comfort of a long-standing romance. Anyone who's ever been in a relationship will see themselves in these intimate stories tinged with raw emotion. *Body Music* is an exhilarating and passionate graphic novel about what it

### **Storia del nuovo cognome**

2012-10-03T00:00:00+02:00 Elena Ferrante L'amica geniale - Volume secondo «Capii che ero arrivata fin là piena di superbia e mi resi conto che - in buona fede certo, con affetto - avevo fatto tutto quel viaggio soprattutto per mostrarle ciò che lei aveva perso e ciò che io avevo vinto. Lei naturalmente se ne era accorta fin dal momento in cui le ero comparsa davanti e ora stava reagendo spiegandomi di fatto che non avevo vinto niente, che al mondo non c'era alcunché da vincere, che la sua vita era piena di avventure diverse e scriteriate proprio quanto la

ma, e che il tempo semplicemente scivolava via senza alcun senso, ed era bello solo vedersi ogni tanto per sentire il suono folle del cervello dell'una echeggiare dentro il suono folle del cervello dell'altra». Ecco *Storia del nuovo cognome*, secondo romanzo del ciclo dell'Amica geniale. Cominciate a leggere e la scrittura vi catturerà. Ritroverete subito Lila ed Elena, il loro rapporto di amore e odio, l'intreccio inestricabile di dipendenza e volontà di autoaffermazione. Lila ed Elena hanno sedici anni e si sentono entrambe in un vicolo cieco. Lila si è appena sposata ma, nell'assumere il cognome del marito, ha l'impressione di aver perso se stessa. Elena è ormai una studentessa modello ma, proprio durante il matrimonio dell'amica, ha scoperto che non sta bene né nel rione né fuori. Le vicende dell'Amica geniale riprendono a partire da questo punto e ci trascinano nella vitalissima giovinezza delle due ragazze, dentro il ritmo travolgente con cui si tallonano, si perdono, si ritrovano. Il tutto sullo sfondo di una Napoli, di un'Italia che preparano i connotati allarmanti di oggi. Della trama non anticiperemo niente. Storia e forza della scrittura fanno tutt'uno al punto che ci pare sconveniente guastare al lettore il piacere di leggere sorprendendosi a ogni pagina. Meglio dunque abbandonarsi a Lila ed Elena: conoscerle a fondo, riconoscersi sia nella tendenza alla conformità acquiescente sia nella caparbia determinazione a prendere in mano il proprio destino. Dell'Amica geniale hanno detto: «È un libro che trabocca dall'anima come un'eruzione del Vesuvio». (Paolo Mauri - *La Repubblica*) «Una scrittura densa, sotterranea, odorosa. Che incanta come una danza». (Chicca Gagliardo - *Glamour*) «È un bellissimo Bildungsroman, anzi due, anzi più di due. Il romanzo di una generazione di amici-nemici». (Paolo Di Stefano - *Corriere della Sera*) «Una meraviglia senza margini e senza generi». (Valerio Calzolaio - *Il Salvagente*) «Elena Ferrante se ne sta lì a dimostrare che la letteratura può guarire dai mali del presente, curare lo spirito, fungere da antidoto all'affanno di riconoscersi nella contemporaneità di un Paese sempre più respingente». (Titti Marrone - *il Mattino*) «Ha il respiro lungo della memoria l'ultimo romanzo di Elena Ferrante». (Anna Maria Crispino - *Leggendaria*) «Se potessi tornare indietro, non lo leggerei, m'è piaciuto troppo». (Marina Vitale -

Letteratu.it) «Un testo che va letto e riletto (ma per farlo ancora più tuo lo si dovrebbe copiare e ricopiare)». (Marina Terragni - Via Dogana) «Un'epopea da non perdere». (Bia Sarasini - Società italiana delle letterate) «Elena e Lila. Ciascuna è per l'altra l'amica geniale: una potenzialità inespressa, un pungolo e un rimpianto, un oggetto dell'invidia e un orizzonte del desiderio». (Beatrice Manetti - L'indice dei libri)

In this condition the body gets overwhelmed with excessive heat and the efficiency of the system that regulates body heat goes down considerably which can result in a serious emergency requiring immediate medical care. The symptoms of heat stroke include dry and warm skin, very high fever generally above 104 degree Fahrenheit, increased heart rate, appetite loss, nausea, headache, vomiting, fatigue, agitation, confusion, stupor, seizures, coma and possible death. A teenager experiencing symptoms of heat stroke should stay in a cool place and have adequate rest. Heat stroke is a serious condition and emergency attention should be sought by calling 911. In the meanwhile the affected teenager should be made free of excessive clothing and should be worn with cool clothes and also put cool water on the skin to lower the temperature. Placing ice bags in armpits also helps. Make the teenager drink cool drinks if the teenager is alert.

### **Heat-Related Illnesses in Teens**

Heat related illnesses are caused due to prolonged exposure to heat and also humidity without any reprieve and due to inadequate intake of fluids. Kids and teens adjust to the variations in heat compared to adults who adapt more quickly. However the heat production is high in them when compared to adults but sweat relatively less. Sweating is the natural action of the body and cooling mechanism to counter heat. Kids and teens often ignore these facts and do not hydrate themselves enough while playing, participating in sports and exercises.

Kids and teens with health problems that are chronic or those who are on certain prescription could be more susceptible to heat related problems. Overweight adolescents or those who wear heavy clothing in times of exertion also suffer heat related illnesses. Heat related illnesses are basically classified into three types. **Liberation cronache del mondo emerso le nuove avventure**\_\_\_An infant will have a normal blood pressure reading of 80/45, where as an adolescent will have a normal blood pressure reading of 110/70. Therefore, age, gender, and height are important factor when determining the normal blood pressure level. Adults will have a higher blood pressure than the infants and teenagers. Also, boys have a higher blood pressure when compared to girls and tall people have a higher blood pressure than short people. An adolescent is said to have high blood pressure when the blood pressure is more than the blood pressure of ninety percent people of his/her age, gender and height. There are many risks associated with hypertension or high blood pressure. The risk of developing coronary heart disease increases proportionally. The arteries will develop greater resistance towards the blood flow, because of which the heart will pump blood harder. Stroke is also another risk. Adolescents who have had high blood pressure as a child, develop harmful effects on the blood vessels and heart till the time they turn twenty. The causes of high blood pressure can be classified as primary and secondary. If the causes are definite, they are primary and if the cause is linked to some illness, it is secondary. Primary causes are high blood cholesterol levels, smoking, stagnant lifestyle and overweight. Secondary causes are obesity, immobility due to chronic illness, prescription drugs, intense pain due to burns or cancer and illegal drugs. High blood pressure can develop due to hereditary reasons.

*Discovery cronache del mondo emerso le nuove avventure.*The treatment is finished after an hour and when the needles are removed, you are advised to wear ear magnets so your session continues even when you leave the clinic. While acupuncture itself is a painless procedure, some smokers have claimed that they felt a prick or get sleepy. Most smokers will have to come to the clinic 4 to 6 times before seeing any significant results. Just to give you an idea, one study shows that the respondents reported a decrease in the number of cravings to smoke just after one or two sessions. Seven out of 10 of the respondents were able to kick the habit after 5 or 6 sessions.

Because the number of test subjects is small, there are some who doubt the effectiveness of acupuncture. This is because although there are positive signs with regards to the short term effects of this technique, its effects were not sustained. This is why some medical journals have stated that it is unclear what acupuncture can do in smoking cessation.

### Transformation cronache del mondo emerso le nuove avventure; **Variations of Conventional Acupuncture**

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple acupuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

Diabetes is a disease where the human body is incapable of producing or utilizing insulin. Insulin is a hormone produced by the body in order to get energy by converting starches, sugar and other items. Since the insulin isn't used properly in diabetic people, the blood sugar level increases. This glucose buildup is found in blood and is then passed onto the urine and comes out of the body and the major source of body energy is lost. Diabetes is a serious chronic disease and should be handled at proper time; otherwise it can create serious problems. It can pose a risk and can damage parts of the human body such as eyes, teeth, gums, blood vessels, nerves, and kidneys. This is the reason why diabetes is responsible in most of the cases of adult blindness, kidney failure and lower limb amputations. And if left untreated, it can cause stroke, heart disease and eventually, death. These problems are not only faced by adults, but also adolescents who get diabetes in their childhood. The important factor in treatment of diabetes is to keep the blood sugar level normal at all times.

Every year more than one million people get eye injuries, out of which ninety percent are preventable if safety eyewear is used. One hundred and twenty five thousand eye injury cases are caused by household products. It is a good habit to wash hands regularly, especially after handling household chemicals. When using detergents and hazardous solvents, the handler must wear chemical safety goggles. Also, no children must be around while handling chemicals. While spraying, the nozzle must be turned away from the face. Fertilizers, pesticides and paints must be stored away from reach. While doing household activities proper protective gears such as goggles, gloves, boots and helmet should be worn, if required. The house must be illuminated adequately to avoid accidents in the dark. Stairs should also be illuminated and the rails must also be installed. The instructions for opening the tops of bottles must be read carefully to avoid them from popping and injuring other people. Children and adolescents should read instructions before handling operating equipment before playing games. All power equipment must be installed with guards. While playing outside, the eyes must be protected by UV protective goggles and it is a bad idea to look at the sun directly.

Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

**What is acupuncture?**

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditional Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

**Basic Procedure**

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the body's natural painkillers called endorphins are released, thus helping with pain relief.

Modern acupuncturists nowadays use disposable fine stainless steel needles that are 0.007 to 0.020 inches in

diameter which are sterilized with either ethylene oxide or by autoclave. Since they are way finer than hypodermic syringe needles, being poked by these needles are relatively painless. The upper third of the needle is covered with either a thicker bronze wire or plastic to make the needle sturdier and easier to handle. The length of the needle and how far they are inserted is all up to the acupuncturist and his practised style of acupuncture.

### **Example Of Treatment**

If a patient has a headache, he/she is diagnosed and is treated by stimulating the sensitive points located at the webs between the thumbs and palms. In acupuncture theory, these points are connected to the face and head and can be used for treatment of headaches and other ailments involved. During this treatment, a number of things may occur.

- Sensitivity to pain in where needles are inserted.

This gives some people the idea that it was used even before the Chinese did but sine there is no written text to prove that, no one is certain and credit to this ancient practice goes back to the Chinese.

In the 6th century, this knowledge moved to Japan. In the 17th century, a man by the name of Waichi Sugiyama wanted to make this procedure painless for the patient so he developed the insertion tube, a small cylindrical tube through which the needle is inserted.
