Discovery Tools: The Next Generation of Library Research 2016-03-16 John S. Spencer Discovery tools are now becoming more common in the academic library landscape, and more products are now available from vendors. As a result, it addresses the selection and implementation of such a tool, its relationship to information literacy and catalog maintenance, usability testing, and assessment. Issues such as database and catalog searching and the quality of searching queries are also addressed. A comprehensive review of the literature serves as a valuable resource. Librarians will appreciate the highly practical nature of the volume as it is enriched by a number of varied case studies. This book was published as a special triple issue of College & Undergraduate Libraries.

The Framework for Teaching Evaluation Instrument, 2013 Edition 2013 Charlotte Danielson The framework for teaching document is an evolving instrument, but the core concepts and architecture (domains, components, and elements) have remained the same. Major concepts of the Common Core State Standards are included. For example, deep conceptual understanding, the importance of student intellectual engagement, and the precise use of language have always been at the foundation of the framework for teaching, but are more clearly articulated in this edition. The language has been tightened to increase ease of use and accuracy in assessment. Many of the enhancements to the framework are located in the possible examples, rather than in the rubric language or critical attributes for each level of performance.

Exploring Children's Learning 2016-12-08 Christine Ritchie Exploring Children's Learning: 3-11 Years is essential reading for those passionate about supporting children's learning environments from early years to key stage 2. By combining learning with important aspects of a broad curriculum content it will inspire and enhance an interest in supporting children's learning. Individual chapters focus on key areas of the curriculum such as literacy and history, numeracy and science, as well as more general topics such as creativity, assessment and the emotional and behavioural aspects of learning. The book takes an objective view on control over curriculum and offers practical insights into how supportive learning opportunities can create enjoyable and satisfying lifelong learning habits, preparing children for the challenges they may face in their adult working life. Whether you dip into chapters, or read through the book as a whole, you will develop your understanding of the complexity of learning and the lifelong effects implicit in this, not only from the individual basis that each child faces in terms of learning how to learn, but also concerning the differences in learning strategies required to successfully negotiate subject knowledge across a range of disciplines. This book is a must-read for students of childhood and education studies programmes, those undertaking initial teacher training as well as general readers with an interest in supporting children's learning.

Emotional Labour and Lesson Observation 2016-11-21 Ursula Edgington This book presents research on emotion work and the emotional labour of teaching and learning based in England's further education sector, where an increasing emphasis on marketised systems means accountability and audit cultures have become embedded within everyday teaching practice. Uniquely, this book explores micro-level issues of the managerial policies relating to classroom lesson observations as well as the profoundly emotional, philosophical aspects of these situations, which research asserts cause stress and anxiety for many staff. Drawing on theoretical psychosocial concepts exploring the interplay of hidden or 'underground' micro and macro elements of teaching and learning contexts, the book illuminates how the presence of an observer fundamentally alters the dynamics of a classroom. The author argues that it is not necessarily the performativity that creates the stress and anxiety in an observation but the individual's perception of this performativity and how it relates to a wider consideration of their emotional labour in the classroom. For this reason, the book puts forward a case for ending the formal, graded method of lesson observations in favour of a developmental, holistic approach that is sensitive to the emotional nuances of the individuals involved as well as the social and historical contexts of the institutions in which they are situated. The diverse use of lesson observations as a tool for staff development and quality assurance policies make this a valuable resource for educational researchers, policy-makers, teachers and managers from many different sectors and backgrounds.

Global Perspectives on Teacher Motivation 2017-09-08 Helen M. G. Watt Many studies of teacher motivation have been conducted in different contexts over time. However, until fairly recently there has not been a reliable measure available to allow comparisons across samples and settings. This has resulted in an abundance of findings which cannot be directly compared or synthesised. The FIT-Choice instrument offers the opportunity to examine motivations across settings. The various studies in this book suggest that people who choose teaching as a career are motivated by a complex interaction of factors embedded within communities and cultural expectations, but seem generally to embrace a desire to undertake meaningful work that makes for a better society. Unlike some careers, where rewards are in the form of salary and status, by and large these factors are not strong drivers for people who want to become teachers. They want to work with children and adolescents, and believe they have the ability to teach.

Constructing Self-Discovery Learning Spaces Online: Scaffolding and Decision Making Technologies 2011-11-30 Hai-Jew, Shalin As an increasing amount of information is made available online, the assumption is that people who visit web sites will be able to strategize their learning to optimize access to this information. Constructing Self-Discovery Learning Spaces Online: Scaffolding and Decision Making Technologies raises awareness of the strategies supporting self-driven learner efficacy on a number of site types. This book reflects on existing literature about self-discovery learning and what learners need in terms of scaffolding to help them make the right decisions, assess their own level of learning, vet information strategically, collaborate with other learners, and build their own skill sets.

Exploring Innovative Pedagogy in the Teaching and Learning of Chinese as a Foreign Language 2015-11-07 Robyn Moloney Teachers of Chinese as a foreign language in many international contexts are searching for pedagogic solutions to promote effective learning. Models of innovative and successful approaches are urgently needed. This volume presents a collection of compelling and empirically rich research studies that showcases innovative developments in the practice of teaching Chinese as a foreign language. The studies focus on three interrelated areas: learners, teachers, and applications of new technologies. Specifically, the studies explore methods for fostering learner-centred classrooms, autonomous learners, intercultural learning, the role of teacher views and identities, the nature of a 'middle ground' approach, and technologies that accommodate the unique aspects of the Chinese language, with new options for mobile and interactive learners. Providing both inspiration and practical models for language practitioners and researchers, it offers a vital resource for teachers' professional development, and for pre-service teacher education.

Academic Leadership 2023-03-28 Marmar Mukhopadhyay This book provides contemporary knowledge on school effectiveness and proposes strategic interventions for enhancing it. It focuses on improving academic leadership for enhancing the effectiveness of schools and discusses how national education policies are helpful in providing a vision towards improving school effectiveness. It highlights the role of teachers as academic leaders in the implementation of policy recommendations at school and classroom levels. It offers methods and mechanisms for academic leaders to measure the learning of students for school assessment. The author also discusses how academic leadership involves creating a vision and mission based on science and research data for the organisation, inspiring innovation and creative ideas, developing teamwork, and a safe environment for staff to express their views. While providing an understanding of school as an organization, the volume outlines its management functions such as processes and quality of planning, management of curriculum, learner evaluation, institutional networks, and human resource management, among others. The volume is a guidebook for training and capacity building for school-level practitioners and leaders in education management. Embedded with real-life cases and episodes, this volume will be of interest to teachers, students, and practitioners of education, management, and education management. It will also be useful for academicians, educationalists, practitioners, management professionals, educational leaders, and policymakers.

Creativity, Technology & Education: Exploring their Convergence 2017-12-04 Punya Mishra In this collection of beautifully written essays, Mishra, Henriksen, and the Deep-Play Research Group challenge myths about technology and creativity, debate time-honored instructional practices, and play with new ideas for schools to care for and nurture, rather than constrain, creativity. These essays are provocative ... refreshing, [and] insightful —Dr. Yong Zhao, Foundation Distinguished Professor, University of Kansas and Fellow, Mitchell Institute for Health and Education Policy, Victoria University, Australia. What is creativity? Why is it important? What does it look like across different disciplines and contexts? What role does technology play, if any, in the creative process? And finally, what do creativity and technology have to do with education? These are the questions that underlie the collection of articles in this book. These essays provide a broad analytic frame for thinking about creativity, technology and education and describe classroom examples as well as strategies for evaluating creative artifacts and creative environments. All of these are grounded in specific examples from across a wide range of disciplines and contexts—art, mathematics, engineering, computer science, graphic design, architecture, science to name just a few. The final essays take a broader perspective on creativity and technology focusing both on our highly inter-connected YouTube world but also possibilities for the future. Creativity, Technology & Education: Exploring their Convergence is a vital resource for educators and practitioners as they seek to incorporate creative work and thoughtful pedagogy in their personal and professional lives.

Exploring Learning Ecologies 2019-10-20 Norman Jackson Learning ecologies are a new way of interpreting our presence and actions in the world. An ecology of practice for the purpose of learning and performing provides us with opportunities for action, information, knowledge and other resources. It includes the contexts and places we inhabit and the spaces we create to reason and imagine. It includes our processes and activities for performing and creating new value. It includes our relationships and the tools and technologies we use and it enables us to connect and integrate our past and current experiences. While the first edition of the book was aimed primarily at educators working in higher education, this shortened version has in mind the people who support learning and development in organisations that are not primarily educational.

The Importance of Being Little 2017-02-07 Erika Christakis “Christakis . . . expertly weaves academic research, personal experience and anecdotal evidence into her book . . . a bracing and convincing case that early education has reached a point of crisis . . . her book is a rare thing: a serious work of research that also happens to be well-written and personal . . . engaging and important.” --Washington Post “What kids need from grown-ups (but aren't getting)...an impassioned plea for educators and parents to put down the worksheets and flash cards, ditch the tired craft projects (yes, you, Thanksgiving Handprint Turkey) and exotic vocabulary lessons, and double-down on one, simple word: play.” --NPR The New York Times bestseller that provides a bold challenge to the conventional wisdom about early childhood, with a pragmatic program to encourage parents and teachers to rethink how and where young children learn best by taking the child's eye view of the learning environment To a four-year-old watching bulldozers at a construction site or chasing butterflies in flight, the world is awash with promise. Little children come into the world hardwired to learn in virtually any setting and about any matter. Yet in today's preschool and kindergarten classrooms, learning has been reduced to scripted lessons and suspect metrics that too often undervalue a child's intelligence while overtaxing the child's growing brain. These mismatched expectations wreak havoc on the family: parents fear that if they choose the “wrong” program, their child won't get into the “right” college. But Yale early childhood expert Erika Christakis says our fears are wildly misplaced. Our anxiety about preparing and safeguarding our children's future seems to have reached a fever pitch at a time when, ironically, science gives us more certainty than ever before that young children are exceptionally strong thinkers. In her pathbreaking book, Christakis explains what it's like to be a young child in America today, in a world designed by and for adults, where we have confused schooling with learning. She offers real-life solutions to real-life issues, with nuance and direction that takes us far beyond the usual prescriptions for fewer tests, more play. She looks at children's use of language, their artistic expressions, the way their imaginations grow, and how they build deep emotional bonds to stretch the boundaries of their small worlds. Rather than clutter their worlds with more and more stuff, sometimes the wisest course for us is to learn

HOW TO GET OUT OF THEIR WAY. CHRISTAKIS’S MESSAGE IS ENERGIZING AND REASSURING: YOUNG CHILDREN ARE INHERENTLY POWERFUL, AND THEY (AND THEIR PARENTS) WILL FLOURISH WHEN WE LEARN NEW WAYS OF RESTORING THE VITAL EARLY LEARNING ENVIRONMENT TO ONE THAT IS BEST SUITED TO THE LITTTLEST LEARNERS. THIS BOLD AND PRAGMATIC CHALLENGE TO THE CONVENTIONAL WISDOM PEELS BACK THE MYSTERY OF CHILDHOOD, REVEALING A PLACE THAT’S RICH WITH POSSIBILITY.
