Imaginary Bodies

2013-01-11 Moira Gatens Moira Gatens investigates the ways in which differently sexed bodies can occupy the same social or political space. Representations of sexual difference have unacknowledged philosophical roots which cannot be dismissed as a superficial bias on the part of the philosopher, nor removed without destroying the coherence of the philosophical system concerned. The deep structural bias against women extends beyond metaphysics and its effects are felt in epistemology, moral, social and political theory. The idea of sexual difference is contextualised in *Imaginary Bodies* and traced through the history of philosophy. Using her work on Spinoza, Gatens develops alternative conceptions of power, new ways of conceiving women's embodiment and their legal, political and ethical status.

The Politics of Women's Health

1998 Susan Sherwin Examines the real world of women's health status and health-care delivery in different countries, and the assumptions behind the dominant medical model of solving problems without regard to social conditions. This book asks what feminist health-care ethics looks like if we start with women's experiences and concerns.

Feminism & Bioethics

1996-04-11 Susan M. Wolf Bioethics tackles the most vexing problems in health care and the biological sciences: from reproductive technologies to euthanasia, the AIDS epidemic, mapping the human genome, human subjects research, and health care

reform. Yet surprisingly little attention has been paid to the special problems faced by women and to feminist analyses of current health care issues other than reproduction. This breakthrough volume of original essays authored by leading figures in bioethics and feminist theory moves beyond the areas of reproduction and nursing, taking bioethics into new territory. The book starts with an investigation of the relationship between feminism and bioethics and introduces different approaches to the problem. These chapters stress the importance of liberal feminism that prefers feminist over feminine analysis, integrates the experience of women of color, draws from the women's self-help movement, and uses the feminist stand-point theory.; In the second part of the book, the authors apply the feminist perspective to different bioethics problems: euthanasia, AIDS, the definition of health, doctor-patient communication, the Human Genome Project, the conduct of biomedical research, and health care reform. They demonstrate the gain and benefit that results when bioethics pays attention to gender and feminism. This volume will change the way bioethicists, students, patients, and the public think about these profoundly challenging problems.

Citizenship and the Ethics of Care

2003-09-02 Selma Sevenhuijsen Care and women's emancipation have often been seen as opposed. Politicians have begun to look again at the issue of care in the context of new reforms in the welfare state, health care policies and family law. Using concrete examples taken from parental rights cases, health care education and the public health sector. Using concrete examples taken from the practice and discourse of care, those found in parental rights issues, health care education, the family and in the public health sector, Sevenhuijsen argues for reevaluation of care from a feminist perspective.

Property in the Body

2007-04-19 Donna Dickenson New developments in biotechnology radically alter our relationship with our bodies. Body tissues can now be used for commercial purposes, while external objects, such as pacemakers, can become part of the body. *Property in the Body: Feminist Perspectives* transcends the everyday responses to such developments, suggesting that what we most fear is the feminisation of the body. We fear our bodies are becoming objects of property, turning us into things rather than persons. This book evaluates how well-grounded this fear is, and suggests innovative models of regulating what has been called 'the new Gold Rush' in human tissue. This is an up-to-date and wide-ranging synthesis of market developments in body tissue, bringing together bioethics, feminist theory and lessons from countries that have resisted commercialisation of the body, in a theoretically sophisticated and practically significant approach.

Linking Visions

2004 Rosemarie Tong This collection brings together fourteen contributions by authors from around the globe. Each of the contributions engages with questions about how local and global bioethical issues are made to be comparable, in the hope of redressing basic needs and demands for justice. These works demonstrate the significant conceptual contributions that can be made through feminists' attention to debates in a range of interrelated fields, especially as they formulate appropriate responses to developments in medical technology, global economics, population shifts, and poverty. Feminist Ethics and Natural Law

1999-04-28 Cristina L. H. Traina Heated debates over such issues as abortion, contraception, ordination, and Church hierarchy suggest that feminist and natural law ethics are diametrically opposed. Cristina L.H. Traina now reexamines both

Roman Catholic natural law tradition and Anglo-American feminist ethics and reconciles the two positions by showing how some of their aims and assumptions complement one another. After carefully scrutinizing Aquinas's moral theology, she analyzes trends in both contemporary feminist ethics, theological as well as secular, and twentieth-century Roman Catholic moral theology. Although feminist ethics reject many of the methods and conclusions of the scholastic and revisionist natural law schools, Traina shows that a truly Thomistic natural law ethic nonetheless provides a much-needed holistic foundation for contemporary feminist ethics. On the other hand, she offers new perspectives on the writings of Josef Fuchs, Richard McCormick, and Gustavo Gutierrez, arguing that their failure to catch the full spirit of Thomas's moral vision is due to inadequate attention to feminist critical methods. This highly original book proposes an innovative union of two supposedly antagonistic schools of thought, a new feminist natural law that would yield more comprehensive moral analysis than either existing tradition alone. This is a provocative book not only for students of moral theology but also for feminists who may object to the very notion of natural law ethics, suggesting how each might find insight in an unlikely place.

Feminist Ethics and Social Policy

1997-08-22 Patrice DiQuinzio A collection of essays representing diverse approaches to feminist ethical analysis of social policy. Subjects include the Family and Medical Leave Act, combat exclusion and the role of women in the military, unwed fathers' rights, mail-order brides, pornography, breast implants, and sex-selective abortion. Paper edition (unseen), \$17.95. Annotation copyrighted by Book News, Inc., Portland, OR

Women and Values

1999 Marilyn Pearsall "With twelve new essays, this Third Edition of Marilyn Pearsall's landmark

collection continues to offer readers the vanguard thinking of today's outstanding feminist philosophers. The book's thirty-six readings (all by contemporary feminists) reflect their views on such topics as abortion, sexual harassment, religion, aesthetics, motherhood, lesbianism, rights, and caring. For ease of reference, the essays are organized topically into eight chapters: feminist theory and practice, women's nature and values, social philosophy, political philosophy, philosophy of law, philosophy of religion, philosophy of art, and feminist ethics. With substantive introductions to each chapter, this provocative collection offers enticing coverage of a full range of feminist issues in a format accessible to readers." --From back cover
