The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a highly regarded vocabulary assessment that has been in use for almost half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to measure receptive vocabulary for Standard American English. It is swift and easy to carry out, saving important time so that focus can be set on applying successful interventions. The PPVT-4 test material includes a broad array of vocabulary comprehension grades, extending from preschool through adult age. The evaluation questions extensively sample words that depict 20 content domains (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary. The assessment provides two equivalent forms which include various vocabulary terms, ensuring that the person has not “memorized” the test. One form can be employed prior to intervention implementation to measure test-takers’ vocabulary knowledge and the alternative edition can be employed for re-evaluation to measure and record improvement. The PPVT-4 also includes a special Growth Scale Value (GSV) which is reactive to minor changes in time.
