It had been the time 2023, and the world stood on the edge of war. The United States and PRC, the pair of world powers, had been engaged in a ferocious contest, contending for supplies, influence, and control. They had developed sophisticated armaments, including lasers, drones, and spacecrafts, that could strike any place, any moment. They had secretly established space stations, that can deploy nuclear missiles, that can destroy the world. They were both prepared to utilize these weapons, if required. But they were not the only ones. There existed a third power, a hidden power, which had been observing them both,

The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary evaluation that has been in practice for nearly 50 years. Formulated by Lloyd M. Dunn and Douglas M. Dunn, the assessment is made to evaluate vocabulary comprehension for Standard American English. It is fast and easy to conduct, saving valuable time so that concentration can be put on applying successful strategies.

The PPVT-4 test subject matter includes a broad array of receptive vocabulary grades, ranging from preschool through adulthood. The assessment questions extensively sample words that portray 20 content fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and household and educational vocabulary.

The test gives two equivalent forms which contain various vocabulary words, ensuring that the person has not “learned” the assessment. One form can be utilized prior to intervention implementation to assess people’s vocabulary understanding and the second edition can be used for re-assessment to evaluate and note progress. The PPVT-4 also includes a special Growth Scale Value (GSV) which is sensitive to slight changes in time.
