Idea of the Temple of Painting

2013 Giovanni Paolo Lomazzo An English translation of the Renaissance treatise on painting by the Milanese artist Giovan Paolo Lomazzo (1538-1592). Drawing on a wide range of influences, including Leonardo's legacy, Neoplatonic cosmology, and the occult, Lomazzo affirms the development of every artist's unique, expressive style or maniera.

Nature Policies and Landscape Policies

2014-11-11 Roberto Gambino The book focuses on the relationship between nature conservation policies and landscape policies. This is a relevant subject due to the current need of reviving nature conservation policies, which are today affected by a general effectiveness deficiency. To this end, landscape policies can play a crucial role, bridging nature and culture, fostering more integrated approaches to nature conservation and stimulating the active participation of local communities. The book gathers reflections, researches and experiences developed on an international level on this subject by experts coming from different international contexts (Europe, U.S.A.), various disciplinary backgrounds (geographers, planners, biologists, historians, jurists, economists, etc.) and several institutional bodies (Universities, administrative bodies, international organizations such as IUCN, EUROPARC Federation, UNESCO, etc.). The overall reflections gathered in the book - which is divided in three main sections: regulations and institutional frameworks, policies, actions and tools - combine to suggest innovative visions about the relationships between nature policies and landscape policies.

Mountain Gloom and Mountain Glory

1997 Marjorie Hope Nicolson To English poets and writers of the seventeenth century, as to their predecessors, mountains were ugly protuberances which disfigured nature and threatened the symmetry of earth; they were symbols God's wrath. Yet, less than two centuries later the romantic poets sang in praise of mountain splendor, of glorious heights that stirred their souls to divine ecstasy. In this very readable and fascinating study, Marjorie Hope Nicolson considers the intellectual renaissance at the close of the seventeenth century that caused the shift from mountain gloom to mountain glory. She examines various writers from the seventeenth, eighteenth, and nineteenth centuries and traces both the causes and the process of this drastic change in perception.

Toward the Healthy City

2009-09-04 Jason Corburn A call to reconnect the fields of urban planning and public health that offers a new decision-making framework for healthy city planning. In distressed urban neighborhoods where residential segregation concentrates poverty, liquor stores outnumber supermarkets, toxic sites are next to playgrounds, and more money is spent on prisons than schools, residents also suffer disproportionately from disease and premature death. Recognizing that city environments and the planning processes that shape them are powerful determinants of population health, urban planners today are beginning to take on the added challenge of revitalizing neglected urban neighborhoods in ways that improve health and promote greater equity. In *Toward the Healthy City*, Jason Corburn argues that city planning must return to its roots in public health and social justice. The first book to provide a detailed account of how city planning and public health practices can reconnect to address health disparities, *Toward the Healthy City* offers a new decision-making framework called "healthy city planning" that reframes traditional planning and development issues and offers a new scientific evidence base for participatory action, coalition building, and ongoing monitoring. To show healthy city planning in action, Corburn examines collaborations between government agencies and community coalitions in the San Francisco Bay area, including efforts to link environmental justice, residents' chronic illnesses, housing and real estate development projects, and planning processes with public health. Initiatives like these, Corburn points out, go well beyond recent attempts by urban planners to promote public health by changing the design of cities to encourage physical activity. Corburn argues for a broader conception of healthy urban governance that addresses the root causes of health inequities.

An Introduction to the Historiography of Science

1987 Helge Kragh This book introduces the methodological and philosophical problems with which modern history of science is concerned, offering a comprehensive and critical review through description and evaluation of significant historiographical viewpoints. Incorporating discussion of key problems in general historical writing, with examples drawn from a range of disciplines, this non-elementary introduction bridges the gap between general history and history of science. Following a review of the early development of the history of science, the theory of history as applied to science history is introduced, examining the basic problems which this generates, including problems of periodisation, ideological functions, and the conflict between diachronical and anachronical historiography. Finally, the book considers the critical use, and analysis, of historical sources, and the possibility of the experiemental reconstruction of history. Aimed primarily at students, the book's broad scope and integration of historical, philosophical and scientific matters will interest philosophers, sociologists and general historians, for whom there is no alternative introduction to the subject at this level.

He was tired of his existence. He was dull, sad, and unsatisfied. He had a job he hated, a supervisor he abhorred, and a girlfriend he didn't love. He had no zeal, no goal, no value. He believed like he was wasting his time, his possibility, his existence. He desired to modify, he desired to escape, he wanted to live. He chose to leave his employment, to break up with his girlfriend, to get rid of his possessions, and to acquire a direct fare to the far end of the globe. He didn't understand where he was heading, he didn't understand what he was performing, he didn't realize what he was searching for. He only knew that he had to leave, that he had to investigate, that he had to find out. He embarked on a voyage of a thousand kilometers, a voyage of adventure, of difficulty, of learning, of progress, of alteration.

Woody Woodpecker is an animated character that first showed up in cinematic short films made by the Walter Lantz Studio and distributed by Universal Pictures between 1940 and 1971. The character was created in 1940 by Lantz and storyboard artist Ben "Bugs" Hardaway, who had prior laid the groundwork for two other crazy characters, Bugs Bunny and Daffy Duck¹. Woody Woodpecker's character and design changed over the years, from an crazy bird with an exceptionally garish design to a more refined-looking and acting character.

The stories center around Woody's mischievous and often disorderly pranks, his efforts to solve problems, and his dealings with other characters such as Andy Panda, Chilly Willy, Winnie Woodpecker, Knothead, Splinter, Buzz Buzzard, and several others². Woody Woodpecker cartoons were first aired on television in 1957 under the title The Woody Woodpecker Show.

In addition to the original series, there have been numerous spin-offs and adaptations. For example, "Wonder Toons: Woody Woodpecker And Many More" is a collection of Woody Woodpecker cartoons in addition to other animations.
