Global Trends 2040-A More Contested World (2021), released by the US National Intelligence Council, is the latest report in its series of reports starting in 1997 about megatrends and the world's future. This report, strongly influenced by the COVID-19 pandemic, paints a bleak picture of the future and describes a contested, fragmented and turbulent world. It specifically discusses the four main trends that will shape tomorrow's world:

- Demographics-by 2040, 1.4 billion people will be added mostly in Africa and South Asia. -
- Economics-increased government debt and concentrated economic power will escalate

problems for the poor and middleclass. - Climate-a hotter world will increase water, food, and health insecurity. - Technology-the emergence of new technologies could both solve and cause problems for human life. Students of trends, policymakers, entrepreneurs, academics, journalists and anyone eager for a glimpse into the next decades, will find this report, with colored graphs, essential reading.

People, Money and Power in the Economic Crisis

2014-10-01 Keith Hart The Cold War was fought between “state socialism” and “the free market.”

That fluctuating relationship between public power and private money continues today, unfolding in new and unforeseen ways during the economic crisis. Nine case studies -- from Southern Africa, South Asia, Brazil, and Atlantic Africa – examine economic life from the perspective of ordinary

people in places that are normally marginal to global discourse, covering a range of class positions from the bottom to the top of society. The authors of these case studies examine people’s concrete economic activities and aspirations. By looking at how people insert themselves into the actual, unequal economy, they seek to reflect human unity and diversity more fully than the narrow vision of conventional economics.

The Oxford Handbook of the Economics of

Central Banking 2019-02-15 David G. Mayes The economic influence of central banks has received ever more attention given their centrality during the financial crises that led to the Great Recession, strains in the European Union, and the challenges to the Euro. The Oxford Handbook of the Economics of Central Banking reflects the state of the art in the theory and practice and covers a wide range of topics that will provide insight to students, scholars, and practitioners. As an up to date reference of the current and potential challenges faced by central banks in the conduct of monetary policy and in the search for

the maintenance of financial system stability, this Oxford Handbook covers a wide range of essential issues. The first section provides insights into central bank governance, the differing degrees of central bank independence, and the internal dynamics of their decision making. The next section focuses on questions of whether central banks can ameliorate fiscal burdens, various strategies to affect monetary policy, and how the global financial crisis affected the relationship between the traditional focus on inflation targeting and unconventional policy instruments such as quantitative easing (QE),

foreign exchange market interventions, negative interest rates, and forward guidance. The next two sections turn to central bank communications and management of expectations and then mechanisms of policy transmission. The fifth part explores the challenges of recent developments in the economy and debates about the roles central banks should play, focusing on micro- and macro-prudential arguments. The implications of recent developments for policy modeling are covered in the last section. The breadth and depth enhances understanding of the challenges and opportunities facing central banks.

Unleashing the Second American Century

2014-02-25 Joel Kurtzman "An optimistic, fact-based look at how four transformational forces— unrivaled manufacturing depth, soaring levels of creativity, massive new energy sources, gigantic amounts of capital available—will propel the U.S. to new economic heights In Unleashing the Second American Century, business expert Joel Kurtzman shows conclusively that all the talk about the relative decline of the United States is not only baseless—it's dead wrong. A widely-held misconception is that "America doesn't make things anymore." But the U.S is by far the world's

dominant manufacturing power, and most of what we make is recession-proof. America also has a stunning level of talent and creativity in the world's fastest-growing economic sectors, such as biotech, pharmaceutical, computer hardware and software, and telecommunications. Due to shale and gas, America has the world's largest energy reserves, and is more favorably endowed than even the Middle East. Finally, America has an unprecedented amount of capital now idle— approximately \$4.4 trillion, a sum that is about \$1 trillion larger than the German economy, the world's fourth largest. As Kurtzman shows, when

the business community fully grasps the opportunities in the U.S., prosperity will return-and much faster than we now think possible"--

Reporting at the Southern Borders 2013-10-15
Giovanna Dell'Orto Undocumented immigration across the Mediterranean and the US-Mexican border is one of the most contested transatlantic public and political issues, raising fundamental questions about national identity, security and multiculturalism—all in the glare of news media themselves undergoing dramatic transformations. This interdisciplinary, international volume fills a major gap in political science and communication

literature on the role of news media in public debates over immigration by providing unique insider's perspectives on journalistic practices and bringing them into dialogue with scholars and immigrant rights practitioners. After providing original comparative research by established and emerging international affairs and media scholars as well as grounded reflections by UN and IOM practitioners, the book presents candid, in-depth assessments by nine leading European and North American journalists covering immigration from the frontlines, ranging from the Guardian's Southern Europe editor to the immigration

reporter for the Arizona Republic. Their comparative reflections on the professional, institutional and technological constraints shaping news stories offer unprecedented insight into the challenges and opportunities for 21st century journalism to affect public discourse and policymaking about issues critical to the future of the transatlantic space, making the book relevant across a wide range of scholarship on the media's impact on public affairs.
