A text by a superb writer and economist that stressed the most important concepts without overwhelming students with an excess of detail was a formula that was quickly imitated, but has yet to be matched. The sixth edition features a strong revision of content in all thirty-six chapters.

Dozens of new applications emphasize the real-world relevance of economics for today's students through interesting news articles, realistic case studies, and engaging problems. The premier ancillary package is the most extensive in the industry, using a team of instructors/preparers that have been with the project since the first edition. My goal is to emphasize the material that students should and do find interesting about the

Strategic Autonomy and Economic Power

2022-08-04 Vitor Bento This book examines the effect of economic power on a state's strategic autonomy. Strategic autonomy is a fundamental condition for the availability of strategic options in the interaction of states. This book provides the first clear operational definition of the concept and offers an analysis of the relevance of the national economy to strategic autonomy. The main

sources of economic power – size of the economy, position in trade and technological networks, savings, wealth, and finance – and their impact on strategic autonomy are analyzed in depth. The strategic governance of the national economy is also addressed as a way of ensuring that national economic power can work as strategic power for a country, providing it with strategic autonomy. The strategies pursued by China – which in under four decades has gone from an underdeveloped state to the main challenger of the dominant world power – and Germany – which, despite being defeated in

World War II, having no nuclear weapons and having chosen to be a "civilian power", became the dominant power in Europe – are analyzed in depth, as two paradigmatic examples of the theory developed by the book. This book will be of much interest to students of strategic studies, economics, foreign policy and International Relations.
