Future of Jobs

IntroBooks Team Times are changing and the labor markets are under immense burden from the collective effects of various megatrends. Technological growth and grander incorporation of economies along with global supply chains have been an advantage for several workers armed with high skills and in growing occupations. However, it is a challenge for workers with low or obsolete skills in diminishing zones of employment. Business models that are digitalized hire workers as self-employed instead of standard employees. People seem to be working and living longer, but they experience many job changes and the peril of skills desuetude. Inequalities in both quality of job and earnings have increased in several countries. The depth and pace of digital transformation will probably be shocking. Industrial robots have already stepped in and artificial intelligence is making its advance too. Globalization and technological change predict the great potential for additional developments in labor market performance. But people should be ready for change. A progression of creative annihilation is probably under way, where some chores are either offshored or given to robots. A better world of for jobs cannot be warranted – a lot will be contingent on devising the right policies and institutes in place.

It is underpinned by the conviction that trade unions are – and should be – vital institutions for democracy and social justice. Written by leading scholars in industrial relations and labour law as well as those in political philosophy and political science, the collection tackles a range of pressing topics for trade unions including: the climate crisis; the COVID-19 pandemic; economic democracy; democracy within trade unions; precarious work; and election campaigns.

The Fourth Industrial Revolution

2017-01-03 Klaus Schwab World-renowned economist Klaus Schwab, Founder and Executive Chairman of the World Economic Forum, explains that we have an opportunity to shape the fourth industrial revolution, which will fundamentally alter how we live and work. Schwab argues that this revolution is different in scale, scope and complexity from any that have come before. Characterized by a range of new technologies that are fusing the physical, digital and biological worlds, the developments are affecting all disciplines, economies, industries and governments, and even challenging ideas about what it means to be human. Artificial intelligence is already all around us, from supercomputers, drones and virtual assistants to 3D printing, DNA sequencing, smart thermostats, wearable sensors and microchips smaller than a grain of sand. But this is just the beginning: nanomaterials 200 times stronger than steel and a million times thinner than a strand of hair and the first transplant of a 3D printed liver are already in development. Imagine “smart factories” in which global systems of manufacturing are coordinated virtually, or implantable mobile phones made of biosynthetic materials. The fourth industrial revolution, says Schwab, is more significant, and its ramifications more profound, than in any prior period of human history. He outlines the key technologies driving this revolution and discusses the major impacts expected on government, business, civil society and individuals. Schwab also offers bold ideas on how to harness these changes and shape a better future—one in which technology empowers people rather than replaces them; progress serves society rather than disrupts it; and in which innovators respect moral and ethical boundaries rather than cross them. We all have the opportunity to contribute to developing new frameworks that advance progress.

The Future of South-South Economic Relations

2012-12-13 Adil Najam In recent years, it has become apparent that South-South economic relations are increasing, and will continue to do so. There will be more trade agreements and more trade, more economic alliances and more political alliances with economic goals, more investment flows and an increasing acknowledgement that the Global South has more to offer than it has in the past. These new economics relations have great potential, both for harm and for good. In the absence of directed policies and intentional actors, imbalances of power and growing gaps in development will persist. With the right policies in place, however, these relationships could forge a new global order with greater economic and political equality. Covering a wide range of topics, including regional trade integration in Africa, the environmental impact of increased South-South trade, the changing patterns of South-South investment, and the effect of conflict on trade in South Asia, this ground-breaking volume presents an analysis of South-South economic relations, and how they might impact
