The Northstar motor, manufactured by General Motors (GM) from 1993 until 2011, was a high-quality 90° V engine line and GM's first production V-8 with overhead camshafts<sup>1</sup>. However, regardless of its initial achievement, the Northstar engine has been associated with a variety of issues over the years.

One of the most frequent problems is getting too hot, which can result in substantial harm to the engine block. An additional issue is oil use, which can lead to bad fuel economy and expensive repairs. A lot of Northstar engine proprietors also report troubles with head gaskets, which can cause getting too hot problems and lead to expensive repairs.

Specifically, the Northstar engine models from 1993 to 2005 have been reported to have seepage troubles, broken seals, damaged head gaskets, extra oil loss, damaged valve cover, faulty water pumps, and carbon buildup. These troubles are not major, but the cost to fix the issues was considerably higher than the majority of other engines because of the complex engineering.

Mystery of the Missing Diamond

It was a dark and turbulent night. The rain was pouring down, and the gale was whistling. In the middle of the city, there was a museum, where a priceless diamond was on exhibit. The diamond was named the Star of Africa, and it was the greatest and most gorgeous diamond in the world. It was guarded by a sophisticated security setup, and a squad of equipped guards. No one could steal it, or so they believed. But someone did. Someone managed to bypass the protection, to elude the sentinels, to shatter the window, and to take the diamond. And no one noticed them, no one heard them, no one identified who they were. They left no sign, no lead, no testimony. They vanished into the nightfall, with the African Star. And the riddle of the missing diamond commenced.
