Web Indicators for Research Evaluation 2022-05-31 Michael Thelwall In recent years there has been an increasing demand for research evaluation within universities and other research-based organisations. In parallel, there has been an increasing recognition that traditional citation-based indicators are not able to reflect the societal impacts of research and are slow to appear. This has led to the creation of new indicators for different types of research impact as well as timelier indicators, mainly derived from the Web. These indicators have been called altmetrics, webometrics or just web metrics. This book describes and evaluates a range of web indicators for aspects of societal or scholarly impact, discusses the theory and practice of using and evaluating web indicators for research assessment and outlines practical strategies for obtaining many web indicators. In addition to describing impact indicators for traditional scholarly outputs, such as journal articles and monographs, it also covers indicators for videos, datasets, software and other non-standard scholarly outputs. The book describes strategies to analyse web indicators for individual publications as well as to compare the impacts of groups of publications. The practical part of the book includes descriptions of how to use the free software Webometric Analyst to gather and analyse web data. This book is written for information science undergraduate and Master's students that are learning about alternative indicators or scientometrics as well as Ph.D.

students and other researchers and practitioners using indicators to help assess research impact or to study scholarly communication.

Managing Digital Records in Africa 2022-05-23 Mpho Ngoepe
Managing Digital Records in Africa draws on the research work of the InterPARES Trust (ITrust) project that investigated interrelated archival issues focusing on legal analysis, infrastructure, trust, authentication, and education within the African context. This research-focused book provides a legal analysis and systematic assessment of how African institutions manage digital records in four countries (i.e., Botswana, Kenya, South Africa, and Zimbabwe). It also examines the extent to which records are managed using Internet-based applications, trust in such records, and digital record authentication to support the auditing process. Finally, it provides a curriculum analysis in digital records at institutions of higher learning in 38 African countries. The book's

case studies illustrate the threads of discussion, which span the ITrust domains of legislation, infrastructure, authentication, trust, and education in archives and records management. The book can be used as a premier reference source by private and public organizations, researchers, educators, archivists, records managers, and postgraduate students to make informed decisions about digital records, records management systems, cloud-based services, authenticating records, and identifying universities on the continent that offer archival programmes. The book may also find expression to practitioners in other fields such as law and auditing.

Management Science Featuring Micro-Macro Economics and Management of Information Technology 2020-10-09 W.Y. Dornyo This book is one of a series of various doctoral research project papers and has been further refined and converted into a book. The book has been deemed one of further versions of management science that are to come. These further versions focus more on

information technology and its effects as agile tools for management, including software engineering, algorithms and data structures, computer architecture and electronics, systems science, artificial intelligence and robotics, quantum science, statistics, and web-internet and multimedia design and building. Managers are usually multifaceted with multiple disciplines even though they have one or two areas as majors, specialties, or experience. It is in the light of this that Management Science Featuring Micro-Macro Economics and Management of Information Technology was designed in this context to contain economics with IT as a course of study. In the future, further versions will be pure courses instead of combinations. The world has changed gear for the better due to the advanced mysteries of information technology innovations so that we could even conduct scientific laboratory experiments, medical diagnoses, and rule of law adjudications online. That means we could not forget information technology as one major tool in hand that should be a pivot on and around which all other areas in management should dwell and revolve, and this was one of the sole reasons of this book. It is therefore worthy of note for readers aspiring as systems analysts, managers, and professionals to accustom themselves to the subject areas in the book to instill understanding of numerous important terms and points in economics and IT. This will help to build further courage and understanding toward advancement in these fields. All topics indicated in the table of contents have been made reader friendly and treated to focus easy understanding. We highly acknowledge all the intellectual materials used.

Typological Studies 2014-02-04 Guglielmo Cinque In this book, Cinque takes a generative perspective on typological questions relating to word order and to the syntax of relative clauses. In particular, Cinque looks at: the position of the Head vis à vis the relative clause in relation to the position of the verb vis à vis his object; a general cross-linguistic analysis of correlatives; the need to

distinguish a sentence-grammar, from a discourse-grammar, type of non-restrictives (with languages differing as to whether they possess both, one, the other, or neither); a selective type of extraction from relative clauses; and a tentative sketch of a more ample work in progress on a unified analysis of externally headed, internally headed, and headless relative clauses.

Receptive Ecumenism as Transformative Ecclesial Learning 2022-05-26 Paul D. Murray Receptive Ecumenism asks not what other churches can learn from us, but 'what can we learn and receive with integrity from our ecclesial others?' Since the publication of Receptive Ecumenism and the Call to Catholic Learning: Exploring a Way for Contemporary Ecumenism (OUP, 2008), this fresh ecumenical strategy has been adopted, critiqued, and developed in different Christian traditions, and in local, national, and international settings, including the most recent bilateral dialogue of the Anglican-Roman Catholic International Commission (ARCIC III). The thirty-eight chapters in this new volume, by academics, church leaders, and ecumenical practitioners who have adopted and adapted Receptive Ecumenism in various ecclesial and cultural contexts, show how Receptive Ecumenism has grown and matured. Part One demonstrates how Receptive Ecumenism itself is capable of being received with integrity into very different ecclesiologies and ecclesial traditions. In Part Two, this approach to transformative ecumenical learning is applied to some recurrent ecclesial problems, such as the understanding and practice of ministry, revealing new insights and practical opportunities. Part Three examines the potential and challenges for Receptive Ecumenism in different international settings. Part Four draws on scripture, hermeneutics, and pneumatology to offer critical reflection on how Receptive Ecumenism itself implements transformative ecclesial learning. Addressing the 70th Anniversary of the World Council of Churches, Archbishop Justin Welby, said that 'One of the most important of recent ecumenical developments has been the concept of "Receptive

Ecumenism". This volume provides an indispensable point of reference for understanding and applying that concept in the life of the Christian churches today.

Epistemologies of Ignorance in Education 2011-03-01 Erik Malewski Epistemologies of Ignorance provide educators a distinct epistemological view on questions of marginalization, oppression, relations of power and dominance, difference, philosophy, and even death among our youth. The authors of this edited collection challenge the ambivalence – ignorance – found in the construction of curriculum, teaching practices, research guidelines, and policy mandates in our schools. Further, ignorance is also considered a necessary by-product of knowledge production. In this sense, the authors explore not only

issues of complicity but also issues of oppression in spite of educators' liberatory intentions. While this is the first systematic effort to transfer epistemologies of ignorance to the educational scene, this movement has its roots in race, class, gender, and sexuality studies, particularly the work of Charles Mills, Eve Kosofsky Sedgwick, Shannon Sullivan, and Nancy Tuana. It is our unequivocal belief that, while this is transformative and powerful scholarship, the study of ignorance remains understudied and under-theorized in education scholarship, from curriculum studies and cultural foundations to science education and educational psychology. This collection highlights without apology why this dangerous state of affairs cannot continue.

Legal Protection for Computer-Implemented Inventions 2016-04-24 Sabine Kruspig As a result of the incorporation of computer software into countless commercial and industrial products, the patentability of software has become a vital issue in intellectual property law. This indispensable book provides an overview on the current status of computer-implemented inventions in patent law across Europe and major jurisdictions worldwide. A hugely practical field research tool with guidance based on case law, it examines the major hurdles in each particular country and describes the best practice to be adopted. Clearly showing how enforceable software patent applications can be competitively drafted and how a patent portfolio for computer-implemented inventions can be established in several countries without spending money unnecessarily on problematic examination proceedings, this book covers such issues and topics as the following: • claim categories for patent applications; • sufficient level of abstraction/breadth of the claimed invention; • fundamental terms of computing and terminological traps; • probability for patents dependent on software application areas; and • patents in core areas of computing. With separate chapters for the key countries, Germany, the United Kingdom, France, the United States, China, Korea, Japan, India, and the European Patent Office the legal situation for computer-implemented inventions in each country or region, this book includes guidance on prosecution under national law, analyses of relevant court decisions, practice checklists, and an outlook on future developments.. The authors describe claim formulation based on actual cases and on principles of computer science in order to show what might be or might not be patentable in each jurisdiction. With this incomparable resource, patent attorneys and patent professionals in companies will get a basis for making decisions about the most appropriate jurisdictions in which to file patent applications. This book will also be of great value to computer professionals who are affected by the protection of software or who are actively involved in the protection of software by patent law.

Prose Poetry 2020-10-13 Paul Hetherington An engaging and authoritative introduction to an increasingly important and popular literary genre Prose Poetry is the first book of its kind—an engaging and authoritative introduction to the history, development, and features of English-language prose poetry, an increasingly important and popular literary form that is still too little understood and appreciated. Poets and scholars Paul Hetherington and Cassandra Atherton introduce prose poetry’s key characteristics, chart its evolution from the nineteenth century to the present, and discuss many historical and contemporary prose poems that both demonstrate their great diversity around the Anglophone world and show why they represent some of today’s most inventive writing. A prose poem looks like prose but reads like poetry: it lacks the line breaks of other poetic forms but employs poetic techniques, such as internal rhyme, repetition, and compression. Prose Poetry explains how this form opens new spaces for writers to create riveting works that reshape the resources of prose while redefining the poetic. Discussing prose poetry’s precursors, including William Wordsworth and Walt Whitman, and prose poets such as Charles Simic, Russell Edson, Lydia Davis, and Claudia Rankine, the book pays equal attention to male and female prose poets, documenting women’s essential but frequently unacknowledged contributions to the genre. Revealing how prose poetry tests boundaries and challenges conventions to open up new imaginative vistas, this is an essential book for all readers, students, teachers, and writers of prose poetry.
