Marc Chagall

2009-04-22 Jonathan Wilson Part of the Jewish Encounter series Novelist and critic Jonathan Wilson clears away the sentimental mists surrounding an artist whose career spanned two world wars, the Russian Revolution, the Holocaust, and the birth of the State of Israel. Marc Chagall's work addresses these transforming events, but his ambivalence about his role as a Jewish artist adds an intriguing

wrinkle to common assumptions about his life. Drawn to sacred subject matter, Chagall remains defiantly secular in outlook; determined to "narrate" the miraculous and tragic events of the Jewish past, he frequently chooses Jesus as a symbol of martyrdom and sacrifice. Wilson brilliantly demonstrates how Marc Chagall's life constitutes a grand canvas on which much of twentieth-century Jewish history is vividly portrayed. Chagall left Belorussia for Paris in 1910, at the dawn of

modernism, looking back dreamily on the world he abandoned. After his marriage to Bella Rosenfeld in 1915, he moved to Petrograd, but eventually returned to Paris after a stint as a Soviet commissar for art. Fleeing Paris steps ahead of the Nazis, Chagall arrived in New York in 1941. Drawn to Israel, but not enough to live there, Chagall grappled endlessly with both a nostalgic attachment to a vanished past and the magnetic pull of an uninhibited secular present. Wilson's portrait of Chagall is altogether more historical, more political, and edgier than conventional wisdom would have us believe—showing us how Chagall is the emblematic Jewish artist of the twentieth century. Marc Chagall, 1887-1985

1998 Jacob Baal-Teshuva FINE ARTS A time traveler who left an ancient way of life in a remote Russian village for the sophisticated world of 20th-century Paris and its inner circle of literary and artistic innovators,

Marc Chagall (1887-1985) superseded nature through metaphor. He reinvented his past and his dreams over and over as a chronicler of the Jewish experience. Baal-Teshuva, whose previous works include a monograph on Warhol (Andy Warhol 1928-1987, LJ 4/1/93), affectionately conveys the details of the artist's life, his roots in Vitebsk, his lovers, and his many works in paint, poetry, lithography, ceramics, tapestry, mosaics, sculpture, and stained glass with the intimacy and naturalness of a friend of 35 years. Written in clear, accessible prose and lavishly illustrated with reproductions that demonstrate the brilliant colors of the artist's palate, this book is an excellent choice as an introductory text for students. Chagall

2008-10-21 Jackie Wullschlager "When Matisse dies," Pablo Picasso remarked in the 1950s, "Chagall will be the only painter left who understands what color really is." As a pioneer of modernism and one of the greatest figurative artists of the twentieth century, Marc Chagall achieved fame and fortune, and over the course of a long career created some of the best-known and most-loved paintings of our time. Yet behind this triumph lay struggle, heartbreak, bitterness, frustration, lost love, exile—and above all the miracle of survival.

Born into near poverty in Russia in 1887, the son of a Jewish herring merchant, Chagall fled the repressive "potato-colored" tsarist empire in 1911 for Paris. There he worked alongside Modigliani and Léger in the tumbledown tenement called La Ruche, where "one either died or came out famous." But turmoil lay ahead—war and revolution; a period as an improbable artistic commissar in the young Soviet Union; a difficult existence in Weimar Germany, occupied France, and eventually the United States. Throughout, as Jackie Wullschlager makes plain in this groundbreaking biography, he never ceased giving form on canvas to his dreams, longings, and memories. His subject, more often than not, was the shtetl life of his childhood, the wooden huts and synagogues, the

goatherds, rabbis, and violinists—the whole lost world of Eastern European Jewry. Wullschlager brilliantly describes this world and evokes the characters who peopled it: Chagall's passionate, energetic mother, Feiga-Ita; his eccentric fellow painter and teacher Bakst; his clever, intense first wife, Bella; their glamorous daughter, Ida; his tough-minded final companion and wife, Vava; and the colorful, tragic array of artist, actor, and writer friends who perished under the Stalinist regime. Wullschlager explores in detail Chagall's complex relationship with Russia and makes clear the Russian dimension he brought to Western modernism. She shows how, as André Breton put it, "under his sole impulse, metaphor made its triumphal entry into modern painting," and

helped shape the new surrealist movement. As art critic of the Financial Times, she provides a breadth of knowledge on Chagall's work, and at the same time as an experienced biographer she brings Chagall the man fully to life—ambitious, charming, suspicious, funny, contradictory, dependent, but above all obsessively determined to produce art of singular beauty and emotional depth. Drawing upon hitherto unseen archival material, including numerous letters from the family collection in Paris, and illustrated with nearly two hundred paintings, drawings, and photographs, Chagall is a landmark biography to rank with Hilary Spurling's Matisse and John Richardson's Picasso.

Precautions should not only be taken indoors, but outdoors too. This is because; more than forty thousand people get eye injuries outdoors. Ninety nine percent of the injuries are caused while playing sports. So it is necessary for the youngsters to wear protective eyewear while playing sports or when involved in outdoor recreational activities. A special helmet is designed with wire shield or polycarbonate face mask which is not only safe, but comfortable, too. Protective eyewear should also be worn while performing experiments in science lab. Fireworks must only be handled by adults.

Because of increasing use of computers, more and more youngsters are getting eye strains. The symptoms of eye strain caused by computer are red & watery eyes, focusing problems, aching & tired eyelids, eye muscle spasm, backache and headache. In such an environment, eye exercise must be done regularly. The eyes must be made to focus on distant objects and should be rotated from side to side. It is extremely important to give ample rest to the eyes. Glasses with UV shield must be worn when looking at the computer screen. Eye strain can be avoided by increasing the distance from the monitor.

Eye hazards are also caused when cosmetics are used improperly by contact lens wearers. Some of the adverse reactions are injury, eye irritation, allergy, dryness, infection, and lens deposition. That is the reason why adolescents must be made aware of the risk they will face when opting for contact lens. Girls should understand that they should buy hypoallergenic

cosmetics and especially the non-scented variety, manufactured by big brand names. Cosmetics should not be shared with anything else. The applicator brushes must be washed regularly and old mascara must be disposed and not refilled. There are basically two types of diabetes that will affect an adolescent. It is type 1 diabetes and type 2 diabetes. Type 1 diabetes affects the immune system's function as the system attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life. In type 2 diabetes, the body is incapable of properly using the insulin produced by the body and requires insulin from an external source, too. The symptoms of type 2 diabetes are similar to type 1 diabetes. The teenager feels sick, tired, nauseated, and thirsty. The wounds will recover very slowly; he/she will get infections frequently, will develop blurred vision and will experience weight loss. Parents play a vital role in determining the problem. They should constantly observe their child for eating disorders or signs of depression. Although cigarette, drugs and alcohol should be avoided by all adolescents and children, it is even more important that youngster with diabetes should stay away from these things as they can worsen the situation. A person with diabetes, who switches to smoking, is at risk of developing cardiovascular diseases and circulatory problems. Consumption of alcohol can cause hypoglycemia or low blood sugar. It is the duty of the parents to make their

child aware of the possible risk they would face if they start to smoke, drink alcohol or take drugs.

Children and adolescents, who have diabetes, face many challenges while trying to lead a normal life. They have to think twice before doing simple things as going to a party, playing sports and even when staying over with friends. This is because they require to intake oral medication or insulin. Their blood sugar level must be checked many times through out the day. Also, at gatherings, they have to avoid many food items. Because of this they will feel different from the crowd and can feel left out. Not only does diabetes pose behavioral challenges, but also emotional challenges.

First twenty four marc chagalls paintings collection for-Along with doctor consultation, a psychologist must also be consulted who can deal with the emotional challenges of the adolescent. The family should also play an active role in making the youngster feel better. The family should work in collaboration with physician, dietitian and diabetes educators. Teachers, counselors, school nurses, day care providers, and other community members can provide extended support and guidance. They can provide help with transportation, mental health counseling, health education, social services and financial services.

Eating Disorders in Adolescents

Since the adolescence is the age where bones are sprout and grow rapidly,

well nourished food must be given to the adolescent to facilitate normal growth & development. The nutritional intake must be monitored regularly and modified depending upon the growing needs. Eating disorder is the third common chronic illness, especially in adolescent females and the number has been increasing rapidly from the past thirty years.

Challenge twenty four marc chagalls paintings collection for Variations of Conventional Acupuncture

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staplepuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation. Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice,

acupuncture may just be the alternative treatment for you.

This means that acupuncture needles are placed on certain points on the ear so it can treat certain addiction disorders. Myofascially-based acupuncture is often utilized by physical therapists as it involves feeling the meridian lines in search of tender points before applying needles as this is where abnormal energy flows. The duration of your treatment varies depending on the nature of your problem. Some are easy to fix compared to others especially if you are

dealing with something long term. For instance, alcoholics and drug users may quit their vices after 3 or 4 months while those suffering from a disease like autism will take years as there is no know cure yet for the this illness.

Before the needles are inserted, you need to undergo a physical examination and answer a few questions. There are risks involved even though it is a painless procedure because the needle might hit something vital inside but if the specialist is good, then there is nothing to worry about.

You may notice a spot of blood when the needles come off. But if you are concerned about it, talk to your acupuncturist so he or she can prescribe something.

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it

must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

Allergies in Adolescents

Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

Acne in Adolescents

Acne is one of the most common problems in adolescent teens affecting nearly seventeen million people in the United States. Acne is nothing but a disorder involving sebaceous glands and hair follicles. Acne results from the clogging of sebaceous glands leading to the formation of pimples and cysts. The condition usually begins with the onset of puberty. Going by the facts, as teens attain puberty the androgens also called male sex hormones are produced in high number leading to sebaceous glands becoming over active which results

in sebum being produced in high proportions.

Sebum, which is nothing but oil is produced by sebaceous glands which travel to the skin surface through hair follicles. But, skin cells block the follicles which results in oil also being blocked. When these hair follicles are blocked it results in the development of skin bacteria known as Propionibacterium Acnes within the follicles which in turn results in swelling of the skin called Acne. If the hair follicles are partially blocked it results in blackheads. If the follicles are completely blocked they result in whiteheads. But if these plugged follicles are not treated they ultimately burst causing the oil, bacteria and skin cells to spill all over the skin resulting in irritation and formation of pimples. Acne can be shallow as well as deep in various individuals depending on the nature of skin and amount of oil produced.

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that

have proven the healing properties of acupuncture. Sceptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

Transformation twenty four marc chagalls paintings collection for Eight Myths About Acupuncture

There are a lot of myths with regards to acupuncture. Some of these are true; others are silly while the rest only have a half truth. As you read on, you will learn which ones are worth believing.

The first myth is that acupuncture is painful. This is not true because those who have tried it claimed they only experienced a tiny prick while others did not feel anything at all. There is no tissue damage when the needle is inserted into the skin or pulled out and only in very rare cases are there traces of bruising.

The second myth is that you can get hepatitis or AIDS from acupuncture. This is true only if the needles used are not sterilized. In the US, this will never happen because acupuncturists are required to use disposable needles thus you are not at risk from these two diseases.

Review twenty four marc chagalls paintings collection for

Unfortunately, standards of acupuncture have not been fully approved by the FDA due to many unregulated practices that still exist such as the re-use of needles. Furthermore, acupuncture certification today is mostly a sham, used to make money on desperate patients who have not benefited from western medical treatments. The National Council Against Health Fraud has even declared acupuncture as an unproven means of treatment whose concepts of healing are primitive and false.

Should You Try It

One thing that Western science can agree upon is that there are no proven harmful effects of acupuncture. Many doctors agree that as long as a medication is not detrimental to one's health, then there is no reason why it should not be used if there are noticeable benefits. Most scientists would also state that it is simply due to a lack of research that the therapeutic properties of acupuncture have not yet been proven.
