Tourism Research in Malaysia: What, Which Way and So What? (UUM Press) 2010-01-01 Kadir Din This collection offers a sample of contemporary works on tourism and its impact on the Malaysian environment, written by academics from a variety of perspectives. Given the growing body of literature on different aspects of the industry the coverage is by no means representative, let alone exhaustive, of the current discourse. Nonetheless the nineteen chapters cover a range of interests and concerns which have emerged as a consequence of spectacular growth in tourist arrival which currently places Malaysia as one of the most popular destinations in Asia. Recent forecast indicates that the growth trends will continue for at least another decade before the country as a destination approaches maturity. This volume would be a useful reference for students, academic and other researchers who are looking for detailed information to enable them to analyse the impacts and implications of tourism development on the host society.

Managing Research Data 2012-01-20 Graham Pryor This title defines what is required to achieve a culture of effective data management offering advice on the skills required, legal and contractual obligations, strategies and management plans and the data management infrastructure of specialists and services. Data management has become an essential requirement for information professionals over the last decade, particularly for those supporting the higher education research community, as more and more digital information is created and stored. As budgets shrink and funders of research demand evidence of value for money and demonstrable benefits for society, there is increasing pressure to provide plans for the sustainable management of data. Ensuring that important data remains discoverable, accessible and intelligible and is shared as part of a larger web of knowledge will mean that

research has a life beyond its initial purpose and can offer real utility to the wider community. This edited collection, bringing together leading figures in the field from the UK and around the world, provides an introduction to all the key data issues facing the HE and information management communities. Each chapter covers a critical element of data management: • Why manage research data? • The lifecycle of data management • Research data policies: principles, requirements and trends • Sustainable research data • Data management plans and planning • Roles and responsibilities – libraries, librarians and data • Research data management: opportunities and challenges for HEIs • The national data centres • Contrasting national research data strategies: Australia and the USA • Emerging infrastructure and services for research data management and curation in the UK and Europe Readership: This is essential reading for librarians and information professionals working in the higher education sector, the research community, policy makers and university managers. It will also be a useful introduction for students taking courses in information management, archivists and national library services.

Resources in Education 1990

Effective Instruction 1981 Tamar Levin The purpose of this book is to share successful instructional and learning processes with educators. The focus is on three types of variables in classroom learning and instruction: (1) active learning time; (2) feedback and corrective procedures; and (3) instructional cues. The literature on the nature of each variable is discussed, and the conditions for successful implementation, the reasons for their powerful effects on learning, and the different ways they can be used are outlined. A section on evaluating instruction examines the roles of classroom observation, rating scales, student questionnaires, content analysis and techniques for self examination. A review of the implications arising from new demands on the educational system cites the classroom climate and the concept of individual differences as major areas that need research. An annotated bibliography of research articles written since 1960 emphasizes the feasibility of implementing the ideas discussed in the book. (FG)

The Law, Politics and Theory of Treaty Withdrawal 2023-11-16 Frederick Cowell This book explores how the law of treaty withdrawal operates. Many commentators have observed a wider sense of crisis in international law as governments of different ideological stripes withdraw or threaten to withdraw from international organisations and treaties. There are different political forces behind all of these cases, but they all use the same basic device in international law – a

treaty withdrawal clause. This book focuses on withdrawal clauses within multilateral treaties, providing a detailed overview of their operation, drawing on a range of case studies including Brexit, nuclear weapons treaties and investment arbitration agreements. The obligations a withdrawal clause places on a withdrawing state help regulate the withdrawal process, providing a notional form of stability. Using insights from international relations theory and legal theory, this book unpacks how and why the law of withdrawal operates and what its limitations are.

Understanding Morphology 2013-10-28 Martin Haspelmath  
This new edition of Understanding Morphology has been fully revised in line with the latest research. It now includes 'big picture' questions to highlight central themes in morphology, as well as research exercises for each chapter. Understanding Morphology presents an introduction to the study of word structure that starts at the very beginning. Assuming no knowledge of the field of morphology on the part of the reader, the book presents a broad range of morphological phenomena from a wide variety of languages. Starting with the core areas of inflection and derivation, the book presents the interfaces between morphology and syntax and between morphology and phonology. The synchronic study of word structure is covered, as are the phenomena of diachronic change, such as analogy and grammaticalization. Theories are presented clearly in accessible language with the main purpose of shedding light on the data, rather than as a goal in themselves. The authors consistently draw on the best research available, thus utilizing and discussing both functionalist and generative theoretical approaches. Each chapter includes a summary, suggestions for further reading, and exercises. As such this is the ideal book for both beginning students of linguistics, or anyone in a related discipline looking for a first introduction to morphology.

The Next Generation of Testing 2015-11-01 Hong Jiao  
The Race To The Top (RTTP) federal education policy fostered a new generation of state tests. This policy advocated adopting common core standards which set a higher level of learning targets for students in the US K-12 education. These standards are intended to assess higher order thinking skills and prepare students ready for college and career. In the meantime, they are aligned with those for international assessments which keep US students abreast of their international peers. Furthermore, the new generation of state tests requires the use of technology enhanced items to align student assessments with student learning environment. Computer technology is indispensable to accomplish this goal. Computer based tests related to common core standards are different from previous state computer based tests in two important aspects, one is that the current version requires accurate assessment of students along all ability levels and the other is that it promotes the use of an efficient test delivery system, essentially the use of computerized adaptive assessment in K-12 state testing programs. In addition to providing summative information about student learning, the new common core tests add formative assessment component in the whole assessment system to provide timely feedback to students and teachers during the process of student learning and teacher instruction. As with its predecessor, the new assessment policy also holds teachers and schools accountable for student learning. With the requirements by the new federal education policy, states formed two consortia: Partnership for Assessment of Readiness for College and Careers (PARCC) and Smarter-Balanced Assessment Consortium (SBAC) to develop assessments in alignment with the new common core standards. This book is based on the presentations made at the Thirteenth Annual Maryland Assessment Research Center's Conference on "The Next Generation of Testing: Common Core Standards, Smarter-Balanced, PARCC, and the Nationwide Testing Movement". Experts from the consortia and nationwide overviewed the intention, history and the current status of this nationwide testing movement. Item development, test design, and transition from old state tests to the new consortia tests are discussed. Test scoring and reporting are specially highlighted in the book. The challenges related to standard setting for the new test, especially in the CAT environment and linking performance standards from state tests with consortium tests were explored. The issues of utilizing the consortium test results to evaluate students' college and career readiness is another topic addressed in the book. The last chapters address the critical issue of validity in the new generation of state testing programs. Overall, this book presents the latest status of the development of the two consortium assessment systems. It addresses the most challenging issues related to the next generation of state testing programs including development of innovative items assessing higher order thinking skills, scoring of such items, standard setting and linkage with the old state specific standards, and validity issues. This edited book provides a very good source of information related to the consortium tests based on the common core standards.

An Introduction To Quantum Field Theory 2018-05-04 Michael E. Peskin An Introduction to Quantum Field Theory is a textbook intended for the graduate physics course covering relativistic quantum mechanics, quantum electrodynamics, and Feynman diagrams. The authors make these subjects accessible through carefully worked examples illustrating the technical aspects of the subject, and intuitive explanations of what is going on behind the mathematics. After presenting the basics of quantum electrodynamics, the authors discuss the theory of renormalization and its relation to statistical mechanics, and introduce the renormalization group. This discussion sets the stage for a discussion of the physical principles that underlie the fundamental interactions of elementary particle physics and their description by gauge field theories.

The Scientific Revolution 2018-11-05 Steven Shapin This scholarly and accessible study presents "a provocative new reading" of the late sixteenth- and seventeenth-century advances in scientific inquiry (Kirkus Reviews). In The Scientific Revolution, historian Steven Shapin challenges the very idea that any such a "revolution" ever took place. Rejecting the narrative that a new and unifying paradigm suddenly took hold, he demonstrates how the conduct of science emerged from a wide array of early modern philosophical agendas, political commitments, and religious beliefs. In this analysis, early modern science is shown not as a set of disembodied ideas, but as historically situated ways of knowing and doing. Shapin shows that every principle identified as the modernizing essence of science—whether it's experimentalism, mathematical methodology, or a mechanical conception of nature—was in fact contested by sixteenth- and seventeenth-century practitioners with equal claims to modernity. Shapin argues that this contested legacy is nevertheless rightly understood as the origin of modern science, its problems as well as

its acknowledged achievements. This updated edition includes a new bibliographic essay featuring the latest scholarship. "An excellent book." —Anthony Gottlieb, New York Times Book Review

Guidance for Establishing Crisis Standards of Care for Use in Disaster Situations 2009-10-23 Institute of Medicine The influenza pandemic caused by the 2009 H1N1 virus underscores the immediate and critical need to prepare for a public health emergency in which thousands, tens of thousands, or even hundreds of thousands of people suddenly seek and require medical care in communities across the United States. Guidance for Establishing Crisis Standards of Care for Use in Disaster Situations draws from a broad spectrum of expertise—including state and local public health, emergency medicine and response, primary care, nursing, palliative care, ethics, the law, behavioral health, and risk communication—to offer guidance toward establishing standards of care that should apply to disaster situations, both naturally occurring and man-made, under conditions in which resources are scarce. This book explores two case studies that illustrate the application of the guidance and principles laid out in the report. One scenario focuses on a gradual-onset pandemic flu. The other scenario focuses on an earthquake and the particular issues that would arise during a no-notice event. Outlining current concepts and offering guidance, this book will prove an asset to state and local public health officials, health care facilities, and professionals in the development of systematic and comprehensive policies and protocols for standards of care in disasters when resources are scarce. In addition, the extensive operations section of the book provides guidance to clinicians, health care institutions, and state and local public health officials for how crisis standards of care should be implemented in a disaster situation.

Journey of a Thousand Miles

He was exhausted of his life. He was dull, depressed, and unsatisfied. He had a job he hated, a supervisor he loathed, and a girlfriend he didn't cherish. He had no zeal, no goal, no significance. He believed like he was squandering his hours, his capability, his life. He wanted to change, he wanted to escape, he wanted to live. He decided to leave his work, to break up with his significant other, to dispose of his stuff, and to buy a direct pass to the far end of the world. He didn't know where he was proceeding, he didn't understand what he was carrying out, he didn't know what he was searching for. He only realized that he had to depart, that he had to explore, that he had to uncover. He embarked on a voyage of a thousand miles, a journey of thrill, of obstacle, of knowledge, of growth, of change.

She had a dream. She wanted to be a performer. She desired to perform, to move, to entertain, to amuse. She desired to be well-known, to be adored, to be worshipped. She wanted to have it all, recognition, fortune, honor. She labored hard, she practiced, she auditioned, she astonished. She got a contract, a record deal, a manager, a director. She made an CD, a success, a wonder. She became a celebrity, a public figure, a sensation. She had it all, admirers, fortune, honors. She was on cloud nine, she was realizing her vision. But she also had a hidden side. She had a hidden truth, a dilemma, an habit. She started to lose control, to blunder, to stir up trouble. She faced condemnation, repercussions, litigations. She gave up her followers, her money, her awards. She fell from grace, she became a joke, a catastrophe. She lost it all, her recognition, her wealth, her glory. She was the rise and decline of a pop star.
