observation flyers exam sample papers pdf pdf__Fifth, medical doctors do not believe in the potential of alternative medicine. This is not true because there are more doctors these days that are open to the idea that there are other ways to help patients aside from conventional medicine. In fact, some of them even recommend an acupuncturist if they know that what they have done is not effective.

Another myth is that every patient will undergo the four needle technique. This is not true and it will only be used when the specialist feels that the energy of the patient is virtually not moving as a last resort.

The seventh myth is that it is better for a medical doctor to perform acupuncture. This is wrong because the training is much different than that taught in medical school. Students who have an acupuncturist license train for 3,000 hours before they are allowed to practice this profession. So between an acupuncturist and a medical doctor, you should go with someone who has learned about this much longer.

Anyone can try facial acupuncture because it is painless and it has proven to reverse the signs of aging. However, if you are pregnant, suffer from the colds or flu, have acute herpes or an allergic reaction, it is best to wait until this has passed.

But before anyone can try facial acupuncture, they first have to be evaluated by the acupuncturist. This person will evaluate your age, lifestyle and diet. If everything looks good, then you will probably do an average of about 12 to 15 treatments. More could be done if your skin tends to sag, manifest jowls or have droopy eyes.

Facial acupuncture treatment needs to be done twice a week for about 45 minutes to 1 hour. For those who can't make two sessions in a week, they can opt for the 1 treatment that will last 90 minutes.

Miracle flyers exam sample papers pdf pdf

The eighth myth is that acupuncture is only used in third world countries. This is not true because this technique originated in China more than 2000 years ago and this has spread to developed nations in Asia such as Japan, South Korea, Singapore and Malaysia.

Here at home, acupuncture been practiced for more than 2 decades and is legal in 30 states. In fact 22 of them, license professionals after they graduate once they pass the state board examination.

Although acupuncture has been around for a very long time, there is still a need for this form of holistic healthcare which is why this is being taught in colleges and in use today. It is painless and cost efficient and a lot of studies have shown that it is effective in treating various illnesses and preventing some of them.

A Quick-Start guide to Acupuncture

Using needles to adjust bodily functions to optimum levels is the principle behind acupuncture. Both ancient Chinese and modern Western practitioners have used this technique to relieve many sufferers of chronic disease. Needling is a relatively safe, beneficial treatment strategy that can be used to reduce pain, improve healing, and increase general well-being. But exactly how is this procedure done and what sort of benefits can be obtained?

Procedure for Needle Puncture

There are two broad categories of acupuncture practice today, traditional Chinese medicine (TCM) and medical acupuncture. Both have their merits, so the choice is individual. The decision for most people hinges upon which philosophy appeals more to them and which technique holds the least apprehension.

Acupuncture for Effective Weight Loss

In a generation when physical fitness is given topmost attention, people are always on the lookout for the newest and most effective means for weight loss. Acupuncture, the method of inserting thin, filiform needles on certain points in an individual's body, has been found to be one effectual method for losing weight.

Not many people may find the idea of being inserted by needles quite comforting in their quest for weight control. However, this ancient Chinese alternative treatment seeks to deliver a control mechanism, enabling the patient to manage hunger cravings more successfully in the long run.

Acupuncture Can Help You Quit Smoking

Smoking is one hard habit to break. If nicotine patches and gum doesn't work, perhaps you should try something else like an alternative form of healthcare like acupuncture.

Acupuncture is an ancient practice involving the use of needles. This instrument is inserted into the skin to allow you energy or Qi to start flowing freely around your body and thus help you quit smoking.

When you go visit an acupuncturist for the first time and tell him or her that you want to quit smoking, after answering some questions, the specialist will carry out an examination of your ears and search for areas where the energy is low.

Acupuncture Can Help Treat Migraines

Acupuncture can help treat migraines. This was discovered after a comparative study was done with conventional medical care. In some cases, it even prevents it from happening which helps improve the quality of life for the patient.

To understand how acupuncture helps migraine sufferers, you have to understand that in traditional Chinese medicine, it is believed that an imbalance in the flow of blood and energy causes this to happen.

In order to treat it, the specialist must relieve the tension by inserting needles into the body to improve the blood flow to the brain thus reducing the pain experienced during an attack.

Review flyers exam sample papers pdf pdf~**Acupuncture Degrees**

If you want to pursue a career in acupuncture, you need to obtain a degree and become a licensed professional.

This can easily be accomplished in three years of schooling from an accredited alternative medicine school which prepares students in the various acupuncture techniques to treat illnesses resulting from allergies, occupational stress, emphysema, gastrointestinal stress, arthritis, headaches, depression, and hypertension to name a few.

Students who enroll in such courses will be taught through demonstration, discussion and hands on application.

What is acupuncture?

Acupuncture has surged in popularity for the last few decades as brought on by the recent health trend. Mostly known as a traditonal Chinese medical technique, acupuncture is seen as a homeopathic method of treatment. While alternative medicine does raise a lot of eyebrows for the scientifically-inclined, it does merit attention before being dismissed as a quack cure.

Basic Procedure

Basically, needles are inserted into the skin, each corresponding to one of the numerous pressure points located throughout the body. According to Traditional Chinese Medicine, by inserting a needle into the pressure point, an acupuncturist can manipulate the flow of chi or life force, thus relieving pain and gradually treating the patient. While most would say that the whole chi thing is a bunch of nonsense, science has suggested that with the needles inserted, the bodys natural painkillers called endorphins are released, thus helping with pain relief.

Best Seller : flyers exam sample papers pdf pdf~Chances are, you were consulting with a doctor prior to your visit to the acupuncturist. If there are any prescription medicines given, don't forget to take them.

You will not feel any improvement after just one or two visits with the acupuncturist. Just the same, you should write this down so you can go back to the acupuncturist on your next visit and tell him or her how you felt during the previous session. Such feedback will let the specialist know what needs to be modified in the future to help you with your problem.

The acupuncturist might give you some herbs to take as part of your treatment. Since you don't know if taking them will have any side effects with the medication you are taking, you should first consult with your doctor if it is safe to consume both.

Study flyers exam sample papers pdf pdf;There are things that patients have to be aware of before, during and after surgery. The same goes for those who undergo acupuncture because in order to enhance the value of the treatment, there are some do's and don'ts that patients have to follow.

First, you should not eat a large meal before or after treatment.

You should also avoid over exercising, engaging in a sexual activity or consume alcoholic beverages 6 hours before and after treatment.

Since the acupuncture session will last from 45 minutes to 2 hours depending on how often you have to go to the clinic, you better fix your schedule so you have time to rest.

Should you decide to change careers, it will be a lot easier because of the various advanced trainings you have undergone. Still, if you're happy and contented with your existing career, you can be promoted in the near future. Your salary will increase and you're already prepared to take new responsibilities. You will not find it hard to cope with the new working environment.

Curse flyers exam sample papers pdf pdf__**Depression in Adolescents**

Depression in adolescents is a disorder which occurs due to persistent sadness, loss of interest, loss of self worth and discouragement. Depression is normally a temporary reaction towards situations of stress. Depression is a normal part of the maturation process of adolescents. It is even induced due to production of sex hormones. Adolescent females are depressed twice more than adolescent boys according to a study.

Adolescent behavior is normally marked with good and bad moods. The transition from a good mood to bad mood and vice-versa, can take minutes, hours and even days. That is the reason why true depression is very difficult to find out. Depression in adolescents can be caused due to bad school performance, break up with boyfriend or girlfriend, and failing relations with friends and family. These causes can lead to persistent depression. Other serious causes are chronic illness, obesity, child abuse, stressful lifestyle, poor social skills, unstable care giving and depression in family history.

[example flyers exam sample papers pdf pdf](#)

Aside from that, you should also make some lifestyle changes as there are trigger factors that have been known to cause migraines. Stress is number one on the list so you get enough rest and exercise as well as a balanced diet.

Patients who are suffering from migraine should also check if acupuncture is covered by their HMO. Most insurance providers and HMO's these days cover all or part of the cost but there are restrictions so you should check what is covered by your policy.

Once these spots are identified, these sharp needles are then inserted. Usually 5 needles are placed in various acupoints.

Hope flyers exam sample papers pdf pdf.Eating disorders not only result in physical abnormalities, but also psychological abnormalities. Adolescents with eating disorders take onto social isolation, low self esteem, affective disorders, low self concept, substance abuse, anxiety, and depression. Usually adolescents switch to unhealthy eating habits because of depression and lack of knowledge about affective techniques to lose weight. So the patients who are being treated for eating disorders must also be treated for psychiatric illness, if they have any. Even if the habits doesn't fit the strict criteria, adolescents who limit food intake, binge, vomit or purge accompanied with or without harsh weight loss, should be monitored because of the involvement of risk of even death. Early treatment will have an improved outcome. But the level of intervention in adolescents should be less when compared to adults.

Eye problems and injuries in Adolescents

Every year more than one million people get eye injuries, out of which ninety percent are preventable if safety eyewear is used. One hundred and twenty five thousand eye injury cases are caused by household products.

It is a good habit to wash hands regularly, especially after handling household chemicals. When using detergents and hazardous solvents, the handler must wear chemical safety goggles. Also, no children must be around while handling chemicals. While spraying, the nozzle must be turned away from the face. Fertilizers, pesticides and paints must be stored away from reach. While doing household activities proper protective gears such as goggles, gloves, boots and helmet should be worn, if required. The house must be illuminated adequately to avoid accidents in the dark. Stairs should also be illuminated and the rails must also be installed. The instructions for opening the tops of bottles must be read carefully to avoid them from popping and injuring other people. Children and adolescents should read instructions before handling operating equipment before playing games. All power equipment must be installed with guards. While playing outside, the eyes must be protected by UV protective goggles and it is a bad idea to look at the sun directly.

There are two subcategories of eating disorders, anorexia nervosa and bulimia nervosa. Anorexia nervosa is the restrictive form, where the intake of food is limited severely. In bulimia nervosa is the eating disorder where the adolescent binges on food and then tries to minimize the effects by forcibly vomiting, fasting, and catharsis or over exercising. When handling adolescence eating disorders, they must be handled differently from adult eating disorders. Adolescents face problems such as growth retardation, suppressed height, abnormal weight, pubertal delay, menstrual periods absence, and menses unpredictability. When the adolescent is growing there will be critical tissue components loss like loss of body fat, muscle mass and bone mineral.

Nutritional imbalance is also caused which reflect abnormalities in the levels of vitamins, mineral and other trace elements. The problem is that these abnormalities cannot be recognized clinically. But since protein and calories are essential to the growth of the adolescent, it is important to trace their abnormalities. Because of the problems, healthy adulthood is not a possible thing. Because of all these reasons, it is important to diagnose adolescence eating disorders as early as possible. Eating disorders give rise to peak bone mass impaired acquisition in case of adolescents. When they turn into adults, this problem aggravates to osteoporosis. Even internal organs get affected due to eating disorders. All this can be prevented by early intervention so as to limit, prevent and ameliorate medical complications, which can turn become life threatening.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Although most of the physical complications caused due to eating disorders get solved with the help of nutritional rehabilitation some of the conditions become irreversible and the long term consequences of this are very dangerous. It is best if the eating disorders are recognized in the early stages as it won't result in irreparable damage. The medical monitoring should be pursued till the adolescent returns back to appropriate psychological and medical health.

[Life Lessons from flyers exam sample papers pdf pdf](#),The earliest account of this is found in the book called Nei Jing which in English means the Yellow Emperor's Classic of Internal Medicine. The contents of this book date somewhere around 200 BC. Back then, they did not use metal needles and instead used those made out of stone, moxibustion and herbs to treat a patient.

Acupuncture prevents and treats diseases by inserting very fine needles into the skin specifically at the anatomic points of the body.

The principle behind this concept is that illnesses occur because there is an imbalance in your life force otherwise known as Qi. It is believed that this flows in 14 channels in the human body known as meridians which branch out to bodily organs and functions. If there is a blockage or obstruction in any of them, this is when you succumb to a disease or an illness.

Miracle flyers exam sample papers pdf pdf;The imbalance in the Qi may go one way or the other because of Yin and Yang. The person can only be normal if there is harmony between the two which is what acupuncture is trying to achieve. This can only be restored by stimulating these acupuncture points so your Qi can be adjusted, balanced and harmonized.

Apart from using needles, practitioners also use friction, heat, impulses of electromagnetic energy and pressure to stimulate these points in order to balance the movement of energy in the body to reduce one's health.

An example of this is sonopuncture where an ultrasound device that transmits sound waves is applied to these points in the body. Some use a tuning fork and other vibration devices.

In some cases, acupuncture is more effective when the needles are first heated. This technique is known as "moxibustion." Here, the acupuncturist lights a small bunch of the dried herb called moxa or mugwort and holds it above the needles. The herb, which burns slowly and gives off a little smoke and a pleasant, incense-like smell, will never directly touch your body.

Another variation is electrical acupuncture. Here, electrical wires are hooked up to the needles and a weak current runs through it which may cause no or little sensation at all.

It is also possible that herbal medications will also be prescribed by the acupuncturist for your treatment to be successful.

Common Oral Health Problems in Adolescents

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done. Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint disorder, and incorrect or misaligned jaw position.

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

Although there is an increase in the use of contraceptive methods by adolescents during their first sexual contact, only sixty three percent of the high school students have said to use condom while having sex previously. Adolescents, who use prescription contraceptives, delay their doctor's visit until the time they become sexually active for over a year.

According to a research, youngsters who have participated in sex education programs which gave them knowledge about contraception methods, abstinence, sexually transmitted diseases and youngsters who involved in discussions in order to get a clear picture, used contraceptives and condoms effectively without any increase in sexual activity. The Center for Disease Control & Prevention has said that the solution for unwanted adolescent pregnancies and STDs are barrier contraceptive use and abstinence.

Allergies in Adolescents

Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

[Guide flyers exam sample papers pdf pdf](#); There is a great consensus among the parents whether their children would outgrow asthma as they grow up. But the truth is it depends from child to child. While some children experience improvement in their teens others see asthma becoming even more severe. But almost half of the children who have asthma outgrow asthma as they grow although some symptoms may come back later.

Many parents have questions like whether their children can take part in sport activities. The answer is both yes and no. Some kids may get an asthma attack when they participate in exercises like running. But with proper management a teenager suffering from asthma can actively participate in sports. Special aerobic exercises can improve airway function. This strengthens the breathing muscles. Some of the ways that one can participate in sports is to follow the regimen of stretching the muscles prior to and after exercising, nose-breathe instead of breathing through the mouth and make sure that humidified air passes through the airways. Also parents should make sure that the adolescent has taken all prescribed medication supposed to be taken before they begin exercising. Carrying a reliever is a must for asthmatic teens which would come handy if asthma attack occurs. Asthmatic teenagers should make sure that they wear something over their mouth and nose to stop cold air from entering.

It is not easy for adolescent teens to attend school when they have asthma but it is not difficult also at the same time if proper coordination is made among the teenager, doctor, family and school employees. It is a good idea to consult teachers, nurses and other pertaining employees of the school and let them know that the teenager has asthma and may have special requirements. Also, let the school management know on medications the teenager regularly takes and how to help the teenager when an attack occurs. The school staff should be asked to treat the teen normally once the attack subsides. The physical education coach should also be informed about the condition so that he/she can let the kid stretch the muscles before any exercises or to deal with asthma attack induced due to exercises. Also, before admitting the teenager to a new school care must be taken to check the quality of air, irritants and allergens if any present in the school. The school staff should take considerations to avoid symptoms which could hamper the energy level kids. Also asthmatic teens should be assured from time to time that they are no different from others and asthma in any way does not slow them down, They need this emotional confidence otherwise they may have personality problems.

But in cases where considerable amount of blood flows in small amount of time as a result of an injury due to a serious example for instance, it may not be possible for bone marrow to replace RBCs so quickly resulting in anemia. Also, losing small amounts of blood over long periods of time may also lead to anemia. Example of this situation can be seen in girls who get heavy periods attributed mainly to deficiency of iron in the diet.

Anemia due to iron deficiency is the most common kind of anemia in the United States. It occurs mainly due to lack of iron in a person's diet. A teen with iron deficiency would have lower hemoglobin production and consequently lower RBCs. When the production of RBCs is low the person is regarded as anemic. The signs of anemia are paleness and tiredness. There can be other reasons as to why enough RBCs are not produced in the body. Folic acid and Vitamin B-12 are also essential to produce RBCs. Getting these in adequate quantities is this important too. There can be a problem with bone marrow's working too resulting in anemia.

Hemolytic anemia occurs when a person has RBCs whose lifespan is shorter. The bone marrow may not be able to produce new blood cells if the blood cells die too early. This can result due to many reasons including person having disorders like sphenocytosis or sickle cell anemia. In some cases the immune system of the body may itself destroy the RBCs. In some cases certain antibodies can form in the blood as a result of reaction to certain drugs or infections and may attack the RBCs.

Obsessive compulsive disorder or OCD starts from adolescence onwards. OCD is feeling of strong obsessions and compulsions which result in intense discomfort and affects daily functioning. Obsessions are thoughts which are persistent and recurrent. They even include unwanted images and impulses which lead to distress and anxiety. These feelings and thoughts are usually irrational or unrealistic. Compulsions are repetitive rituals or behavior such as checking something again & again, or mental acts such as counting. These obsessions & compulsions cause intense distress and anxiety and can interfere with the daily activities, relationships, social activities and academic functioning. The person with OCD thinks that he has no control over his actions. OCDs are relapsing and chronic illness.

The thoughts change as the adolescent grows. Younger children suffering from OCD often have thoughts of harm befalling on them and their family such as thief getting into the house through an unlocked door. This will make the children to recheck the door and windows again and again fearing that they might have left the door unlocked accidentally. Teenagers suffering from OCD fear that they might get fall sick due to germs, contaminated food and AIDS. The adolescent develops certain rituals, such as washing hands innumerable times, in order to get over the fear. These rituals help them to think that they have overcome the problem for the time being and give them temporary relief. If they do not perform these rituals, they become more and more anxious.

Periodontal disease can be diagnosed by a dentist or a periodontist after reviewing the complete medical history and also physical examination of the teenager’s mouth. Usually x-ray of the teeth is taken to evaluate the disease. Periodontal disease is classified into different types based on what stage the disease is in. The mildest form of gum disease is known as “gingivitis” in which gums become swollen, red and tender resulting in bleeding while daily brushing and flossing. Gingivitis is again divided into 4 groups primarily acute, sub-acute, recurrent and chronic. Acute gingivitis is nothing but sudden appearance which lasts for shorter duration and could be painful. Sub-acute gingivitis is less severe type of gingivitis. Recurrent gingivitis is the one that comes back after treatment. Chronic gingivitis is the one that onsets slowly, lasts longer and is generally painless. A dentist’s treatment and proper and continuous care can easily solve the problem of gingivitis but if left untreated could result in periodontitis.

Periodontitis is further classified into mild and moderate to advance. Periodontitis results from untreated gingivitis. In this stage the deterioration of the bone in the vicinity of the tooth becomes evident. The common symptoms include red gums that bleed; mouth tastes bad; loose teeth; tooth loss. Proper treatment is a must to control the disease and prevent further deterioration. Periondontitis which is in moderate to advanced stage shows signs of major loss of tissue and bone loss near the teeth.

There are various treatments available for periodontal disease which is decided by the dentist depending on teenager’s age, medical history and health in general. The method of treatment also depends on the extent to which disease has reached. The tolerance of the teenager to certain medicines, therapies and procedures are also taken into consideration. Expectations and opinion of the parents or teenager is also the criteria in deciding the type of treatment. The treatment usually involves plaque removal, medication and in worse cases a surgery.

Apart from studying the medical history of the patient, the doctor will recommend diagnostic procedures such as bone scans, X-ray, magnetic resonance imaging and blood test. The bone scans will determine the arthritic changes and degenerative changes in the joints, which helps to detect tumors & bone diseases and the cause of pain and inflammation. The X-ray will give the inside picture of the bones, tissues and organs. The magnetic resonance imaging provide detailed image of the structures within the body with the help of large magnets. It is best if slipped capital femoral epiphysis is determined in the early stages, so that the femur bone’s head doesn’t slip off any further. The adolescent may need to undergo a surgery along with physical therapy.

Periodontal Disease in Adolescents

The meaning of the word “periodontal” is around the tooth. Also known as gum diseases periodontal diseases are nothing but serious infections caused by bacteria that harm the gums and tissues in the vicinity of the mouth. While dental cavities or caries only affects the tooth Periodontal disease is devastating affecting the bones that surround the tooth, gums, coverings of teeth root and tooth membrane. A physician specializing in the treatment of periodontal disease is known as Periodontist.

Usually a person gets obese when he/she consumes more calories than the body burns. Also there are fifty percent chances of becoming obese when both one of the parent is obese and when obesity has affected both the parents, the chances increases to eighty percent. One percent of obese people can have that fat because of health reasons, as obesity can be caused due to few medical disorders. The causes of obesity in adolescence are overeating, family history, bad eating habits, little or no exercise, medical illness, low self esteem, medications, depression, emotional problems, stressful life, and family problem.

Obesity can cause many major problems. Some of them are diabetes, sleeping disorders, high blood pressure, breathing problems, emotional problems and increase in heart disease risk. Teenagers are more prone to get emotional problems. Because of the weight, they develop low self esteem. They get into depression, obsessive compulsion disorder and anxiety.

Adolescents who want to tackle the obesity problem should approach a pediatrician who will thoroughly evaluate the cause. If no physical disorder is to be blamed, the weight is reduced by limiting the calorie intake and increasing physical activity. The doctor can advice a weight management program and change the eating habits of the teenager, slowly. The patient must avoid oily, fatty, fast and junk food. The potions must be reduced in order to decrease the calorie intake. If the adolescent has developed emotional problems because of obesity, an adolescent psychiatrist can collaborate with the pediatrician in order to make a comprehensive plan for treatment. The plan includes reasonable goals, behavior modification, family participation, and management of physical activity.

You can think of a session with the acupuncturist as very much like massage therapy. A good massage would help give you a very relaxing sleep that night and an acupuncturist could help you with your sleep as well. You might immediately start to feel drowsy as soon as the right nerves are stimulated by the acupuncturists needles.

You might be asking yourself how youd be able to relax if youre suffering from the pain of the needles attached to your body. What you might not realize is that because of the thinness of the needles, you would hardly feel anything. The most that many people claim they feel is a kind of tingling feeling where the needles are. And that is actually a sign that the process is working,

Acupuncture is a practice that helps you use your bodies own ability to manage stress properly. This leaves you healthier, and more importantly, prevents any of the serious diseases that could come from unbalanced, stressful lifestyles.

Variations of Conventional Acupuncture

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staplepnuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Indeed there is growing evidence that this traditional Oriental practice can rival any modern forms of treatment. If you are one of the many people who are looking for a widely recognized and time honored therapeutic practice, acupuncture may just be the alternative treatment for you.

High Blood Pressure in Adolescents

High blood pressure is a condition where the blood pressure is more than normal. It is also known as hypertension. Heart pumps out blood, so that oxygen can reach to different parts of the body via blood. The pressure with which heart pumps blood is known as blood pressure. The blood pressure comprises of two measures, the systolic pressure and diastolic pressure. Systolic pressure is the larger figure and represents the pressure within the artery of the heart, when contractions take place which pump blood to different parts of the body. Diastolic pressure is the pressure within the artery of the heart, when the blood is filling in the heart and it is at rest. Both the pressures are measured in millimeters of mercury or mmHg. High blood pressure is abnormal increase in systolic pressure or diastole pressure.

Blood pressure is measured by putting a blood pressure cuff on the arm and placing a stethoscope on the chest. There can be very little variation in blood pressure depending upon the time, emotional moods, age, gender, weight, height, physical activity, stress and other illness such as heart disease and kidney disease. Children and adolescents become anxious when they visit the doctor. This is also an important factor which affects the blood pressure and the readings taken get tampered because of it. That is the reason why many blood pressure readings are taken in order to determine whether the adolescent has high blood pressure or not. The nurse may even ask the adolescent to calm down while taken the readings. Time gap is given between each reading, so as to give time to the adolescent to calm down. Emotions can also affect the blood pressure reading.
