Undang-Undang Aparatur Sipil Negara

2017-04-03 Tim BIP Dalam Undang-Undang ini yang dimaksud dengan Aparatur Sipil Negara adalah profesi bagi pegawai negeri sipil dan pegawai pemerintah dengan perjanjian kerja yang bekerja pada instansi pemerintah. Aparatur sipil negara (ASN) merupakan komponen penting dalam tata laksana kegiatan pemerintahan. Sebagai salah satu komponen terpenting, profesionalisme ASN sering kali dipertanyakan. ASN sebagai unsur utama sumber daya manusia aparatur negara mempunyai peranan yang menentukan keberhasilan penyelenggaraan pemerintahan dan pembangunan. Walaupun reformasi Indonesia sudah berjalan, namun masih ada kendala lain yang harus dihadapi, antara lain: struktur organisasi yang kurang proporsional karena kelembagaan pemerintah belum sepenuhnya berprinsip pada organisasi yang efisien dan rasional, rendahnya tingkat responsibilitas di lingkungan instansi pemerintah dalam mengembangkan tugas dan amanahnya, praktik KKN belum sepenuhnya teratasi, pelayanan publik belum sesuai dengan harapan masyarakat, terabaikannya nilai etika dan budaya kerja serta sistem dan prosedur kerja yang kurang efektif dan efisien di lingkungan instansi pemerintah. Dan, juga karena image yang tercipta dari ASN terlanjur buruk. ASN diharapkan mampu untuk bekerja secara optimal sesuai dengan tugas yang telah di amanahkan, namun masih banyaknya permasalahan yang dilakukan oleh oknum-oknum pemerintah sehingga perlu adanya reformasi atau perubahan peraturan yang tegas untuk menindak lanjut permasalahan tersebut, contohnya adalah masalah kedisiplinan dalam bekerja. Untuk itu kami menyusun antara Undang-Undang dan Peraturan Pemerintah agar mudah dipahami dan disosialisasikan kepada masyarakat Indonesia.

DPR dan Defisit Demokrasi

2022-04-30 Poltak Partogi Nainggolan DPR dan Defisit Demokrasi adalah memori kolektif bangsa dan negeri. Kedua penulisnya bukan orang yang punya kuasa dan hidup bergelimpang kekuasaan dan materi, melainkan hanya bagian dari saksi sejarah yang masih selalu berusaha mempertahankan idealisme. Pandangan di buku ini adalah cermin untuk melakukan evaluasi perjalanan demokrasi Indonesia di era baru yang diklaim sebagai ‘era reformasi’, yang penuh kegalauan bagi anak bangsa yang menyadarinya. Melaporkan keadaan negeri dan penghuninya ke luar gedung dengan apa yang penulis lihat dan alami sehari-hari di pusat kekuasaan politik nasional, bukanlah sebuah kesalahan,

khususnya membahas kinerja parlemen yang longgar akuntabilitas dan parameter capaian kerjanya. Kedua penulis menuangkannya dalam buku ini sebagai warisan berharga bagi bangsa ini. Harapannya adalah, buku menjadi modal bagi generasi baru untuk terus terpanggil membongkar dan memperbaiki praktik politik yang buruk, agar defisit demokrasi tidak berkelanjutan, sehingga konsolidasi demokratis hanya tinggal impian. Karya ini adalah bagian dari pekerjaan rumah yang belum selesai, sebagai bagian dari refleksi pemikiran dan analisis yang berlanjut, dari kedua penulis sebagai periset/peneliti yang mendalami isu strategis mengenai parlemen dan tata kelola negara dalam rezim demokratis. Kedua penulis berusaha melanjutkan tradisi intelektual masyarakat beradab ini, sebelum memulai aktivitasnya dengan status yang baru sebagai peneliti di institusi pemerintah, karena melanjutkan aktivitas yang sama atas nama institusi parlemen, kini dilarang. Tidak ada negeri di dunia ini, selain Indonesia, yang melarang keberadaan institusi riset dan aktivitasnya di parlemen, selain yang dimiliki pemerintah. Menuliskan memburuknya parlemen dan hancurnya institusi risetnya, dan defisit demokrasi yang dihasilkannya adalah bagian dari tugas melengkapi collective memory bangsa ini agar tidak ada yang terputus, tercecer dan hilang,

PERLINDUNGAN HUKUM BAGI PEGAWAI APARATUR SIPIL NEGARA DALAM PELAKSANAAN TUGAS JABATAN DI PROVINSI JAWA TIMUR
2023-07-20 Permadi Setyonagoro, S.H., M.H. Perihal perlindungan hukum bagi pegawai Aparatur Sipil Negara ini mengarah pula pada pentingnya menciptkakan kondisi kenyamanan bagi pegawai Aparatur Sipil Negara dalam menjalankan tugas jabatannya. Setiap pegawai Aparatur Sipil Negara akan merasa tenang jika pelaksanaan kerja jabatannya dilandasi dengan kepastian hukum. Kepastian peraturan perundang-undangan yang mengatur mereka. Perlindungan hukum menjadi salah satu kata kunci dalam penyelenggaraan negara termasuk juga dalam penyelenggaraan pemerintahan daerah. Dalam berbagai literatur hukum kita dapat menemuka konsep tertang perlindungan hukum yang menempatkan rakyat sebagai objek utama dalam perlindungan hukum. Namun demikian, dalam perkembangannya, perilah perlindungan hukum tidak saja hanya diberikan terhadap masyarakat yang memang secara eksistensi berada pada posisi subordinatif dengan pemerintah sebagai penyelenggara negara. Perihal perlindungan hukum juga perlu diberikan terhadap penyelenggara negara itu sendiri yang dalam hal ini dijalankan oleh aparaturnya, salah satunya dilakukan oleh pegawai Aparatur Sipil Negara.

Etika Pemerintahan

Dr. Drs. ISMAIL NURDIN, M.Si Pasca-Reformasi 1998, Indonesia menghadapi situasi dilematis. Demokratisasi membuka luas keran bagi setiap orang, termasuk para penyelenggara negara, untuk berekspresi dan mengaktualisasikan diri di ruang publik. Rekrutmen jabatan publik terbuka untuk umum. Struktur dan pola penyelenggaraan pemerintahan yang semula tertutup dan didominasi oleh birokrasi telah diubah. Publik diberi akses seluas-luasnya. Akhirnya, hubungan kelembagaan antara birokrasi dan non-birokrasi kian cair dan fleksibel. Akan tetapi, perubahan di atas seringkali memunculkan ekspresi yang berseberangan dengan tata berperilaku yang mengakar kepada nilai dan norma sosial, agama, dan hukum. Maka muncullah fenomena-fenomena baru berupa perilaku, tindakan, dan bahkan kebijakan pemerintahan yang tidak sesuai dengan standar etika bangsa Indonesia. Di sisi lain, tuntutan publik terhadap tampilan pemerintahan dan penyelenggara pemerintahan yang beretika dan melayani semakin tinggi. Karenanya pemahaman tata kelola pemerintahan yang beretika menjadi keniscayaan. Institusi pemerintahan dengan berbagai kelembagaannya yang diselenggarakan para praktisi pemerintahan termasuk aparatur sipil negara perlu memahami konsep, norma, dan praktek etika pemerintahan. Buku ini menjadi panduan bagi penyelenggara pemerintahan serta menjadi kajian bagi pembelajar pemerintahan khususnya mahasiswa yang menekuni kajian pemerintahan dan yang akan menjadi praktisi pemerintahan. Buku ini membahas konsep etika pemerintahan, moralitas, sumber etika, azas penyelenggaraan pemerintahan yang baik, kekuasaan dan demokratisasi, kode etik pembinaan etika aparatur sipil negara, serta etika pelayanan pemerintahan. Mengulas tema sentral etika pemerintahan dengan cara yang mudah difahami, buku ini sangat direkomendasikan sebagai bahan bacaan bagi para akademisi seperti dosen, peneliti dan mahasiswa, juga kalangan penyelenggara negara baik di jajaran eksekutif, legislatif, maupun yudikatif, dan khalayak umum. Other things that are checked will be the color and texture of the skin and your posture as this will give clues to your health.

Only then will you be told to lie down on a padded examining table and the needles are inserted to the skin. The difference with this kind of needle is that they twirl and jiggle each time they are pushed further into the body.

You may not feel them at all and if you do, it will only be a twitch that soon goes away. Once they are in place, this will be left there for 15 to 60 minutes that may make you feel very relaxed and sleepy that you may even doze off. Once the session is complete, the needles are removed and you will be on your way.

What This Ancient Method Does

One of the foremost effects of acupuncture on the body is relaxation. Stress is frequently pinpointed as the main precursor for a host of physical ailments. There are particular points all over the body that direct the flow of harmony and relaxation and when these are enthused, the patient becomes more at ease.

Another positive effect of this alternative therapy is increased pain control. During a session, a patient will usually feel very minimal pain as the thin needles are being inserted gradually. However, the needles are deliberately placed in varying depths, depending on the health requirements of the patient. When the needles reach the right depth, the patient will feel deeper pain, although the entire procedure is not necessarily painful.

It is also recommended for relief from chemotherapy fatigue as well as chemotherapy-related nausea. It has also been found to be largely effective for back pains, migraines, menstrual cramps, and as a pain controller for patients after undergoing surgical operations.

Cholesterol screening helps to determine the cholesterol and fat levels in the blood. Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases. The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels. An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Cholesterol in Adolescents

Parts of adolescent's body are filled with a waxy stuff identified as cholesterol. It helps to produce vitamin D, cell membranes and certain hormones. Blood cholesterol comes from two different sources, liver within the body and food. The adolescent's liver produces enough cholesterol to carry out proper functioning.

The blood acts as the carrier of cholesterol and transports it to different parts of the body. They are transported in round particle form known as lipoproteins. There are two types of lipoproteins called the low density lipoproteins or LDL and high density lipoproteins or HDL. Low density lipoprotein or LDL cholesterol is commonly known as bad cholesterol. It helps in the building up of plaque in arteries and this condition is known as atherosclerosis. The LDL level must be low in the blood and if it is high it must be decreased. Healthy weight must be maintained and exercise should be done regularly. Food items which have high contents of calories, dietary cholesterol and saturated fat must be avoided.

High density lipoprotein or HDL cholesterol is the good cholesterol. It is actually a kind of fat in blood which helps to remove bad cholesterol from the body and stops the build up of plaque in the arteries. The more the HDL cholesterol in the blood the better it is. The HDL can be raised by at least twenty minutes of exercising daily, decreasing body mass and keeping away from food with saturated fat. Some adolescents need to take medications in order to increase HDL. In such cases, increasing HDL can be a complicated procedure and the physician can make a therapeutic plan to increase HDL in the blood stream.

They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Western acupuncturists tend to have a more limited list of indications, the most common of which is undoubtedly control of pain.

Common Oral Health Problems in Adolescents

Adolescents face many oral health problems which may require them to visit a dentist or any other healthcare professional. Irregular teeth growth is a common problem and adolescents with braces are a common sight. Another problem is wisdom teeth extraction or the removal of the third molar. Dental cavities are yet another common problem in adolescents.

Orthodontics is a specialty in dentistry which deals with correction, development and prevention of irregular teeth, jaw and bite. Orthodontics also helps to correct jaw disorders and facial abnormalities. If a general dentist feels abnormalities in the adolescent, he/she will refer the patient to an orthodontist. The American Dental Association suggests that every adolescent above the age of seven should get an orthodontic evaluation done. Problems which require orthodontic treatment are crowded or crooked teeth, extra teeth, missing teeth, under-bite, overbite, jaw joint disorder, and incorrect or misaligned jaw position.

To get braces or any other orthodontic treatments, the appropriate age is ten to fourteen years. But regardless of the age, the same physical and biological process is used in correcting and moving the teeth alignments. Braces are also known as fixed orthodontic appliances. There are three types of braces used to move and reposition the teeth. The first consists of brackets which are made out of plastic or metal. They are either of tooth color or clear and are bonded onto the teeth. The second type is the lingual type of brackets which are attached to the back teeth and cannot be seen while talking. The third type is a band. It is a metal band which covers the teeth and wraps around the last ones.

Adolescents who practice unhealthy weight control practices and are obsessive about figure, weight, food or exercise should be treated clinically. Not only should the symptoms be checked, but their duration, intensity and frequency should also be checked. Type 1 diabetes affects the immune system's function as the systems attacks the pancreas' insulin producing cells, also known as the beta cells. Because of this, the pancreas loses the ability to manufacture insulin. This is the reason why people with type 1 diabetes take insulin everyday. The symptoms are weight loss, increase in urination & thirst, blurred vision, tiredness and constant hunger. And if the adolescent isn't treated at the right time, he/she can slip in to diabetic coma which can endanger his/her life.
