How to Read Like a Writer Mike Bunn
When you Read Like a Writer (RLW) you work to identify some of the choices the author made so that you can better understand how such choices might arise in your own writing. The

idea is to carefully examine the things you read, looking at the writerly techniques in the text in order to decide if you might want to adopt similar (or the same) techniques in your writing. You are reading to learn about writing. Instead of reading for content or to better understand the ideas in the writing (which you will automatically do to some degree anyway), you are trying to understand how the piece of writing was put together by the author and what you can learn about writing by reading a particular text. As you read in this way, you think about how the choices the author made and the techniques that he/she used are influencing your own responses as a reader. What is it about the way this text is written that makes you feel and respond the way you do?

The New Art Museum Library 2021-04-13
Amelia Nelson The New Art Museum
Library addresses the issues facing
today's art museum libraries through
a series of scholarly essays written
by top librarians in the field. In
2007, the publication, Art Museum
Libraries and Librarianship, edited
by Joan Benedetti, was the first to
solely focus on the field of art

museum librarianship. In the decade since then, many changes have occurred in the field--both technological and ideological--prompting the need for a follow-up publication. In addition to representing current thinking and practice, this new publication also addresses the need to clearly articulate and define the art museum library's value within its institution. It documents the broad changes in the environment that art museum libraries now function within and to celebrate the many innovative initiatives that are flourishing in this new landscape. Librarians working in art museum face unique challenges as museums redefine what object-based, visitor-centric learning looks like in the 21st century. These unique challenges mean

that art museum libraries are developing new strategies and initiatives so that they can continue to thrive in this environment. The unique nature of these initiatives mean that they will be useful to librarians working in a wide range of special libraries, as well as more broadly in academic and public libraries. The New Art Museum Library is uniquely positioned to present new strategies and initiatives including digital art history initiatives, the new norms in art museum library staffing, and the public programming priorities that are core to many art museum libraries today. This book is an endorsed project of ARLIS/NA.
