Handbook of Management Accounting Research 2006-12-08 Christopher S. Chapman Volume one of the Handbooks of Management Accounting Research sets the context for both Handbooks, with three chapters outlining the historical development of management accounting as a discipline and as a practice in three broad geographic settings. The bulk of the first volume then draws together a series of contributions that analyse the scholarly literature in terms of distinct intellectual and theoretical social science perspectives. The volume includes a chapter which looks at work informed by psychology as a base discipline. The volume also includes a set of chapters that seek to evaluate and explain issues of research method for the different approaches to research found within management accounting. Special pricing available if purchased as a set with Volume 2. Documents the scholarly management accounting literature Publishing both in print, and online through Science Direct International in scope

Accounting Essentials for Hospitality Managers 2022-02-27 Chris Guiding For non-accountant hospitality managers, accounting and financial management is often perceived as an inaccessible part of the business. Yet having a grasp of accounting basics is a key part of management. Using an easy-to-read style, this book provides a comprehensive overview of the most relevant accounting techniques and information for hospitality managers. It demonstrates how to organise and analyse accounting data to help make informed decisions with confidence. With its highly practical approach, this new fourth edition: Quickly develops the reader's ability to adeptly use and interpret accounting information to enhance organisational decision-making and control. Demonstrates how an appropriate analysis of financial reports can drive your business strategy forward from a well-informed base. Presents new accounting problems in the context of a range of countries and currencies throughout. Develops mastery of the key accounting concepts through financial decision-making cases that take a hospitality manager's perspective on a range of issues. Includes accounting problems at the end of each chapter to be used to test knowledge and apply understanding to real-life situations. Offers extensive web support for instructors and students that includes PowerPoint slides, solutions to end-of-chapter problems, a test bank and additional exercises. The book is written in an accessible and engaging style and structured logically with useful features throughout to aid students' learning and understanding. It is a key resource for all future hospitality managers.

Innovative Business Practices 2013-07-16 Alkis Thrassou This second decade of the millennium finds the world changing at a once unimaginable pace. Businesses, tangled in the interwoven threads of galloping globalization, technological advances, cultural diversity, economic recession and deep-rooted human social evolution, struggle to keep up with incessant changes; consequently and inexorably experiencing severe difficulties and disorientation. Executives, much bewildered, habitually turn to conventional, time-honoured strategies and practices, which increasingly fail to offer the much-sought answers and means to survival, competitiveness and growth. We are currently experiencing a business era of turbulence and dynamic change – an era that inherently rejects conventionality and orthodox business theory to reward businesses embracing agility, reflex-style adaptability, innovation and creativity. This turbulence is, however, not a parenthesis or even a pattern, but the new reality in which each business must reinvent and redefine itself. This is a new reality of stakeholders that shift focus from the external to the internal, from the tangible to the intangible, and from fact to perception. This book presents research and paradigms that transcend classical theory in order to examine how business practice is positively affected by these conditions. Across a multitude of sectors and organisational types, scholars of different business specialisations set the theoretical foundations of contemporary thinking and present their practical implementations.

Ethics in Accounting: A Decision-Making Approach 2015-12-17 Gordon Klein This book provides a comprehensive, authoritative, and thought-provoking examination of the ethical issues encountered by accountants working in the industry, public practice, nonprofit service, and government. Gordon Klein's, Ethics in Accounting: A Decision-Making Approach, helps students understand all topics commonly prescribed by state Boards of Accountancy regarding ethics literacy. Ethics in Accounting can be utilized in either a one-term or two-term course in Accounting Ethics. A contemporary focus immerses readers in real world ethical questions with recent trending topics such as celebrity privacy, basketball point-shaving, auditor inside trading, and online dating. Woven into chapters are tax-related issues that address fraud, cheating, confidentiality, contingent fees and auditor independence. Duties arising in more commonplace roles as internal auditors, external auditors, and tax practitioners are, of course, examined as well.

Handbook of Cost and Management Accounting 2005 Zahirul Hoque In order to survive in the changing business environment, organisations should rethink their strategic philosophy and the role of management accounting. The primary focus of this book is on techniques and concepts of cost and management accounting for strategic business decisions. It focuses on both conventional and contemporary issues. The book will serve as a reference source for practicing accountants, senior executives and managers working in human resources, operations, and accounting divisions. As the principal focus of this book is on conceptual foundations, it would also be ideal for courses in graduate programs such as master's degree, MBA or Executive MBA.

Accounting and Financial Management 2012-05-31 Peter Harris Accounting and Financial Management: developments in the international hospitality industry presents new and innovative research and developments in the field of accounting and financial management as it relates to the work of managing enterprises and organisations in the international hospitality industry. The content contains contributions from a rich source of international researchers, academics and practitioners including, university and college lecturers, professional accountants and consultants and senior managers involved in a wide range of teaching, scholarship, research, and consultancy in the hospitality industry worldwide. Probability & Statistics with R for Engineers and Scientists 2018-03-21 Michael Akritas This title is part of the Pearson Modern Classics series. Pearson Modern Classics are acclaimed titles at a value price. Please visit www.pearsonhighered.com/math-classics-series for a complete list of titles. This text grew out of the author's notes for a course that he has taught for many years to a diverse group of undergraduates. The early introduction to the major concepts engages students immediately, which helps them see the big picture, and sets an appropriate tone for the course. In subsequent chapters, these topics are revisited, developed, and formalized, but the early introduction helps students build a true understanding of the concepts. The text utilizes the statistical software R, which is both widely used and freely available (thanks to the Free Software Foundation). However, in contrast with other books for the intended audience, this book by Akritas emphasizes not only the interpretation of software output, but also the generation of this output. Applications are diverse and relevant, and come from a variety of fields.

Integrating Innovation 2015-05-06 Göran Roos South Australia is a small economy that faces a fundamental need to re-shape its approach to innovation. The manufacturing sector, as the backbone of the state's economy, has and will continue to change in its nature and form. This necessitates a re-think about how innovation happens and how the respective actors within an economy interact and engage with each other. In effect, innovation relies on intersections between people, knowledge, information sharing, ideas, financial and other resources. Innovation happens through regional social and economic system dynamics; innovation relies on a system view of entrepreneurship. Entrepreneurship can be taken as a study of the entrepreneur and new business creation. However, this conception of entrepreneurship misses the critical link to economic outcomes; the ebb and flow of social and economic fortunes that are underpinned by the actions, reactions and engagement of individuals in a specific social and economic system that brings about innovation and change. In this book the authors are exploring how the linkages within the system can be conceptualised and made transparent.

Organizational Control 2010-09-16 Sim B. Sitkin Organization scholars have long acknowledged that control processes are integral to the way in which organizations function. While control theory research spans many decades and draws on several rich traditions, theoretical limitations have kept it from generating consistent and interpretable empirical findings and from reaching consensus concerning the nature of key relationships. This book reveals how we can overcome such problems by synthesising diverse, yet complementary, streams of control research into a theoretical framework and empirical tests that more fully describe how types of control mechanisms (e.g., the use of rules, norms, direct supervision or monitoring) aimed at particular control targets (e.g., input, behavior, output) are applied within particular types of control systems (i.e., market, clan, bureaucracy, integrative). Written by a team of distinguished scholars, this book not only sheds light on the long-neglected phenomenon of organizational control, it also provides important directions for future research.

Methods of Geometry 2011-03-01 James T. Smith A practical, accessible introduction to advanced geometry Exceptionally well-written and filled with historical and bibliographic notes, Methods of Geometry presents a practical and proof-oriented approach. The author develops a wide range of subject areas at an intermediate level and explains how theories that underlie many fields of advanced mathematics ultimately lead to applications in science and engineering. Foundations, basic Euclidean geometry, and transformations are discussed in detail and applied to study advanced plane geometry, polyhedra, isometries, similarities, and symmetry. An excellent introduction to advanced concepts as well as a reference to techniques for use in independent study and research, Methods of Geometry also features: Ample exercises designed to promote effective problem-solving strategies Insight into novel uses of Euclidean geometry More than 300 figures accompanying definitions and proofs A comprehensive and annotated bibliography Appendices reviewing vector and matrix algebra, least upper bound principle, and equivalence relations An Instructor's Manual presenting detailed solutions to all the problems in the book is available upon request from the Wiley editorial department.

Managerial Accounting 2006 Thomas L. Albright Unlike any other text, Ingram presents managerial accounting as a crucial communication tool for management decision making. Additionally, students learn that service-oriented and product-oriented organizations apply similar approaches to gain accurate, timely information. Throughout the book, managerial accounting is viewed as a key component of multi-disciplinary management-with accountants working as part of a team to resolve questions of costing, pricing, and production.

Insiders' Guide to Technology-Assisted Review (TAR) 2015-01-26 Ernst & Young LLP Understand TAR mechanics, processes, and technologies, as taught by EY experts Insider's Guide to Technology-Assisted Review provides professionals with a thorough understanding of the process that is becoming increasingly important to the legal industry. With detailed discussion of the methods, technologies, and practices involved in TAR, readers without advanced degrees in linguistics or related technologies will gain a solid knowledge base upon which to evaluate both current practices and the new tools and technology continually hitting the market. Written by the world-renown experts at Ernst & Young's Technology and Discovery Services, this book provides a valuable resource for professionals seeking a more efficient way to handle the discovery and analysis process. Technology-Assisted Review streamlines the discovery and document review process by essentially "training" a computer to evaluate documents as required. The term "predictive coding" is used in a narrower sense, but both terms have several meanings, and can mean different things to different firms. Insider's Guide to Technology-Assisted Review cuts through the confusion, differentiating the different types of TAR and explaining the process and mechanics of each. Readers will: Understand the fundamental concepts of technology-assisted review Simplify ediscovery, documentation, and storage of large document sets Learn how TAR tools work, and the resources they require to function Consider the specialized skillset required to fully exploit TAR technology Technology-Assisted Review is here to stay, as the legal industry evolves to take full advantage of the cutting-edge technology becoming more widely available. As

TAR becomes standard practice, it's important for professionals to understand its possibilities and limitations. Insider's Guide to Technology-Assisted Review provides clear, comprehensive guidance toward this complex topic.

Criminology 2014-03-21 Eamonn Carrabine Building on the success of the second edition, Criminology: A Sociological Introduction offers a comprehensive overview of the study of criminology, from early theoretical perspectives to pressing contemporary issues such as the globalization of crime, crimes against the environment and state crime. Authored by an internationally renowned and experienced group of authors in the Sociology department at Essex University, this is a truly international criminology text that delves into areas that other texts may only reference. This new edition will have increased coverage of psychosocial theory, as well as more consideration of the social, political and economic contexts of crime in the post-financial-crisis world. Focusing on emerging areas in global criminology, such as green crime, state crime and cyber crime, this book is essential reading for criminology students looking to expand their understanding of crime and the world in which they live.

Management Accounting for Decision Makers 2007 Peter Atrill This text is an introductory course in management accounting for those seeking an understanding of basic principles and underlying concepts without detailed technical knowledge. It has a strong practical emphasis, with plenty of examples taken from the real world as well as numerical examples with step-by-step explanations.

Marine Biology 2015-09-16 Michael E. Huber, Dr. Marine Biology covers the basics of marine biology with a global approach, using examples from numerous regions and ecosystems worldwide. This introductory, one-semester text is designed for non-majors. Authors Castro and Huber have made a special effort to include solid basic science content needed in a general education course, including the fundamental principles of biology, the physical sciences, and the scientific method. This science coverage is integrated with a stimulating, up-to-date overview of marine biology.

Nano-Hype 2009-12-04 David M. Berube Nanotechnology, the science of molecular engineering at the atomic scale, has captured the popular imagination. From movies to TV series to video games, utopian fantasies and horror scenarios involving nanotechnology have become a staple of the entertainment industry. The hyperbole surrounding this new technology comes not only from the media but also from scientists who exaggerate the anticipated benefits of nanotechnology to justify research funding, as well as from environmentalists and globalization opponents, who sometimes indulge in doom-and-gloom prophecies to advance their own agendas. The result is widespread misinformation and an uninformed public. In an effort to set the record straight, professor of communication studies David M. Berube has written this thoroughly researched, accessible overview of nanotechnology in contemporary culture. He evaluates the claims and counterclaims about nanotechnology by a broad range of interested parties including government officials and bureaucrats, industry leaders and entrepreneurs, scientists, journalists, and other persons in the media. Berube appraises programs and grand initiatives here and abroad, and he examines the environmental concerns raised by opponents, as well as the government and private responses to these concerns. With so much argumentation on both sides, it is difficult for anyone to determine what is true. Nano-Hype provides up-to-date, objective information to inform the public. Based on over a decade of research and interviews with many of the movers and shakers in nanotechnology, this critical study will help the reader separate the realistic prospects from the hype surrounding this important cutting-edge technology.

Proceedings of the International Conference on Business and Management Dynamics 2016: Sustainable economies in the information economy 2016-12-31 Joy E. Akahome Cape Town, South Africa, 7 Sept. 2016 – 8 Sept. 2016. Theme: Sustainable economies in the information economy. Purpose: To share the quality academic papers presented at the International Conference on Business and Management Dynamics (ICBMD) held from 7 to 8 September 2016 at African Pride Crystal Hotel and Spa in Cape Town. As grey literature, the proceedings are the contributions made by researchers at the conference and are considered the written record of the work that was presented to fellow conference delegates. Methodology: The methodology used varies from researcher to researcher but are suitable for the studies conducted. Thus, on the one hand, studies that were subjective in nature used the interpretive paradigm, where the qualitative approach adopted made use of the interview method to collect data. On the other hand, studies that were objectively inclined adopted the positivist philosophy and used survey questionnaires to collect data. However, there were some academic papers which used mixed methodology because of the nature of the study. Whatever methodology used adhered to the ethos of the philosophies underpinning the methodology. Contribution made to scholarship: The articles come from individual researchers and each article in the proceedings is unique. Mostly, there is no general argument leading from one contribution to the next. However, it is interesting to note that in the area of economic performance it was evident that real exchange rate and net foreign direct investment contribute more towards innovations in economic growth. With regard to human capital development, papers presented evidence that there exists a definite need to explore the phenomenon of personal branding as limited scientific academic research has been done within the field of personal branding or on elements of the topic. Thus, the outcome argues that personal branding has an influence on leadership style which in turn impacts on organisational performance and related hygiene factors. Furthermore, it was demonstrated that current methods or strategies for enforcing institutionalisation of knowledge sharing within an organisation have not been successful, and, as such, new strategies are needed to reinforce efforts to nurture and invigorate the institutionalisation of knowledge sharing within an organisation. With regard to technology and big data impact on organisational performance, it was evident that system performance, memory consumption and CPU utilisation can be used as criteria to compare and evaluate big data technologies to improve organisational performance. Most of the articles' contribution reemphasised technology education and training as a means of digitising business and improving effectiveness. Target audience: The target readership is academic researchers and business leaders who require access to the latest developments in the fields of economics, information management, business, education, development studies, social sciences and technology. It is also for policymakers and other stakeholders who need a better understanding of the impact of new developments on existing policies and regulations for their review or amendment.

Managerial Accounting 2011-11-22 Jerry J. Weygandt Weygandt's Managerial Accounting, Third Canadian Edition retains the same features that made it popular in the previous editions: it gives students all the necessary techniques and concepts of managerial accounting in a focused, concise framework with an excellent pedagogy that's been praised by instructors. It does this by focusing on the tools students need to succeed, whether as accountants or in other career paths. Incorporating the unique Decision Toolkit learning system, and developed around a framework of decision-making, Weygandt Managerial is the perfect fit for any one-semester undergraduate managerial accounting course. However, the authors understand that many students in this course are not accounting majors and will need to

understand how managerial accounting is used as a management tool. Therefore, Weygandt Managerial focuses on building decision-making skills, understanding how to use accounting information to make quality business decisions, and developing tools that can be used by future managers.
