Making sure that they are realised, and that unanticipated benefits are maximised, is as important as the initial justification, and without that many projects have earned a bad name for project management. This publication provides comprehensive guidance on how to manage delivery of the benefits used to justify investment in change. It provides guidance for all involved in successful change delivery from senior responsible owners and directors through to portfolio, programme and project managers. 2022-09-09 National Academies of Sciences, Engineering, and Medicine Demand for tech professionals is expected to increase substantially over the next decade, and increasing the number of women of color in tech will be critical to building and maintaining a competitive workforce. Despite years of efforts to increase the diversity of the tech workforce, women of color have remained underrepresented, and the numbers of some groups of women of color have even declined. Even in cases where some groups of women of color

may have higher levels of representation, data show that they still face significant systemic challenges in advancing to positions of leadership. Research evidence suggests that structural and social barriers in tech education, the tech workforce, and in venture capital investment disproportionately and negatively affect women of color. Transforming Trajectories for Women of Color in Tech uses current research as well as information obtained through four public information-gathering workshops to provide recommendations to a broad set of stakeholders within the tech ecosystem for increasing recruitment, retention, and advancement of women of color. **Anatomy of Writing for Publication for Nurses, Fourth Edition**

2021-01-15 Cynthia L Saver "Writing well is not the result of luck or innate talent. Writing is a skill you can learn, just as you learned nursing skills such as venipuncture and suctioning. However, nurses often find it challenging to write. After all, as Margaret McClure says in Words of Wisdom From Pivotal Nurse Leaders, "One of nursing's biggest handicaps is that we are in a field where your basic practice requires that you never write in complete sentences" (Houser & Player, 2008, p. 70). This book is

designed to help you bridge the gap between incomplete sentences and a published manuscript. The book's contributors include the best and the brightest from publishing today. Many of the contributors have experience as editors of nursing journals, where their role is to decide which articles to accept for publication. These decision-makers share important insights that will enhance the likelihood your manuscript is accepted for publication. You also can draw a wealth of knowledge from the many years of writing experience that the contributors bring to this book. These authors have a long history of success in having their work published; the important tips they share will set you on track to seeing your work in print or online"--
