The Peabody Picture Vocabulary Test 4th Edition (PPVT-4) is a widely recognized vocabulary test that has been in use for almost half a century. Created by Lloyd M. Dunn and Douglas M. Dunn, the test is made to assess vocabulary comprehension for American English. It is quick and easy to carry out, conserving precious time so that focus can be put on implementing effective strategies.

The PPVT-4 test subject matter covers a wide scope of receptive vocabulary levels, spanning from preschool through adult age. The evaluation questions widely sample words that represent 20 topic areas (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and educational vocabulary.

The test offers two identical forms which include various vocabulary items, ensuring that the individual has not “learned” the assessment. One version can be utilized before intervention implementation to assess people’s vocabulary comprehension and the other edition can be employed for re-evaluation to evaluate and document improvement. The PPVT-4 also includes a distinctive Growth Scale Value (GSV) which is reactive to small changes in time.
