This is the second edition of William Schabas's highly-praised study of the abolition of the death penalty in international law. The Implementation of Quotas 2005 Julie Ballington This report examines women's political representation in Europe and announces a surprising problem with gender quotas, which elsewhere in the world have been an important measure for boosting the number of women in legislative bodies. In the newly democratic countries of eastern Europe, however, quotas often are rejected as negative reminders of the hollow declarations of state-

Caring Democracy  
2013-04-12 Joan C. Tronto  
Americans now face a caring deficit: there are simply too many demands on people's time for us to care adequately for our children, elderly people, and ourselves. At the same time, political involvement in the United States is at an all-time low, and although political life should help us to care better, people see caring as unsupported by public life and deem the concerns of politics as remote from their lives. Caring Democracy argues that we need to rethink American democracy, as well as our fundamental values and commitments, from a caring perspective. The idea that production and economic life are the most important political

ignores the reality that caring, for ourselves and others, should be the highest value that shapes how we view the economy, politics, and institutions such as schools and the family. Care is at the center of our human lives, but Tronto argues it is currently too far removed from the concerns of politics. Caring Democracy traces the reasons for this disconnection and argues for the need to make care, not economics, the central concern of democratic political life. Joan C. Tronto is a Professor in the Political Science Department at the University of Minnesota. She is the author of *Moral Boundaries: A Political Argument for an Ethic of Care* (Routledge).

How To Watch Television  
2013-09-16 Ethan  
Thompson Examines social and cultural phenomena through the lens of different television shows We all have opinions about the television shows we watch, but television criticism is about much more than simply evaluating the merits of a particular show and deeming it 'good' or 'bad.' Rather, criticism uses the close examination of a television program to explore that program's cultural significance, creative strategies, and its place in a broader social context. How to Watch Television brings together forty original

leading scholars on television culture, writing about the programs they care (and think) the most about. Each essay focuses on a particular television show, demonstrating one way to read the program and, through it, our media culture. The essays model how to practice media criticism in accessible language, providing critical insights through analysis—suggesting a way of looking at TV that students and interested viewers might emulate. The contributors discuss a wide range of television programs past and present, covering many formats and genres, spanning fiction and non-fiction, broadcast and cable, providing a broad representation of the programs that are likely to be covered in a media studies course.

Liberia. Everywhere experience suggests that parents are 'active choosers' they make rational and considered decisions, drawing on available evidence and responding to incentives which vary from context to context. Government educators frequently downplay the importance of choice and try to constrain the options parents have. But they face increasing resistance: the evidence is that informed parents drive improvements in school quality. Where state education in some developing countries is particularly bad, private bottom-up provision is preferred even though it costs parents money which they can ill-afford. This book is both a collection of inspiring case studies and a call to action.

that victims of bullying are our own friends, neighbors and classmates, and those at every level in the community are challenged to be part of the solution. The hatred carried out by those who bully impacts all of us, not only the individual victims. Students, Teachers, and Leaders Addressing Bullying in Schools captures the tragedy victims face and the urgency of creating a new dialogue amongst our educators.— Judy Shepard, Founder, Matthew Shepard Foundation The most important experts on bullying are the students, parents, and educators who wrestle with its impact every day. In this book, Boske and Osanloo place them at the center of the dialogue to design lasting solutions and spur the national conversation into action.

Bias-based bullying complicates systemic solutions by activating the “isms” and “phobias” that plague us all. The bold collective behind this book calls us to get over our own stuff and double down on our efforts to create safe and affirming schools for all students.— Eliza Byard, PhD, Executive Director, GLSEN The brilliance and boldness of this book lie in two distinguishing features. First, inspired by the Boske and Osanloo’s vision, the contributors discuss bullying as precisely what it is: not an interpersonal challenge, not a cross-cultural tension, not an issue that can be conflict-mediated away, but a social justice concern that is connected to bigger societal conditions and injustices. Secondly, Boske and Osanloo reject the idea that

The Death Penalty  
2009-06-30 Stuart BANNER  
The death penalty arouses our passions as does few other issues. Some view taking another person's life as just and reasonable punishment while others see it as an inhumane and barbaric act. But the intensity of feeling that capital punishment provokes often obscures its long and varied history in this country.

Now, for the first time, we have a comprehensive history of the death penalty in the United States. Law professor Stuart Banner tells the story of how, over four centuries, dramatic changes have taken place in the ways capital punishment has been administered and experienced. In the seventeenth and eighteenth centuries, the penalty was standard for a laundry list of crimes--from adultery to murder, from arson to stealing horses. Hangings were public events, staged before audiences numbering in the thousands, attended by women and men, young and old, black and white alike. Early on, the gruesome spectacle had explicitly religious purposes--an event replete with sermons, confessions, and last minute penitence--to promote the salvation of

both the condemned and the crowd. Through the nineteenth century, the execution became desacralized, increasingly secular and private, in response to changing mores. In the twentieth and twenty-first centuries, ironically, as it has become a quiet, sanitary, technological procedure, the death penalty is as divisive as ever. By recreating what it was like to be the condemned, the executioner, and the spectator, Banner moves beyond the debates, to give us an unprecedented understanding of capital punishment's many meanings. As nearly four thousand inmates are now on death row, and almost one hundred are currently being executed each year, the furious debate is unlikely to diminish. The Death Penalty is invaluable in

1961. Not long after graduating from high school in the Bronx, he entered the New York City Police Department, quickly rising through the ranks to become the youngest four-star chief in the history of that department. Timoney and the rest of the command assembled under Police Commissioner Bill Bratton implemented a number of radical strategies, protocols, and management systems, including CompStat, that led to historic declines in nearly every category of crime. In 1998, Mayor Ed Rendell of Philadelphia hired Timoney as police commissioner to tackle the city's seemingly intractable violent crime rate. Philadelphia became the great laboratory experiment: Could the systems and policies employed in New York work elsewhere?

leadership, crime declined in every major category, especially homicide. A similar decrease not only in crime but also in corruption marked Timoney's tenure in his next position as police chief of Miami, a post he held from 2003 to January 2010. Beat Cop to Top Cop: A Tale of Three Cities documents Timoney's rise, from his days as a tough street cop in the South Bronx to his role as police chief of Miami. This fast-moving narrative by the man Esquire magazine named "America's Top Cop" offers a blueprint for crime prevention through first-person accounts from the street, detailing how big-city chiefs and their teams can tame even the most unruly cities. contemporary patterns of women's and men's involvement in crime; as well as biological, psychological, and social science perspectives on gender, sex, and criminal activity. An important theme throughout The Handbook is the intersection of sex and gender with ethnicity, class, age, peer groups, and community as influences on crime and justice. Individual chapters investigate both conventional topics - such as domestic abuse and sexual violence - and topics that have only recently drawn the attention of scholars - such as human trafficking, honor killing, gender violence during war, state rape, and genocide.

Capital Punishment in Twentieth-Century Britain 2014-03-05  
Lizzie Seal Capital punishment for murder was abolished in Britain in 1965. At this time, the way people in Britain perceived and understood the death penalty had changed – it was an issue that had become increasingly controversial, high-profile and fraught with emotion. In order to understand why this was, it is necessary to examine how ordinary people learned about and experienced capital punishment. Drawing on primary research, this book explores the cultural life of the death penalty in Britain in the twentieth century, including an exploration of the role of the popular press and a discussion of portrayals of the death penalty in plays, novels

and television. Popular

protest against capital punishment and public responses to and understandings of capital cases are also discussed, particularly in relation to conceptualisations of justice. Miscarriages of justice were significant to capital punishment's increasingly fraught nature in the mid twentieth-century and the book analyses the unsettling power of two such high profile miscarriages of justice. The final chapters consider the continuing relevance of capital punishment in Britain after abolition, including its symbolism and how people negotiate memories of the death penalty. Capital Punishment in Twentieth-Century Britain is groundbreaking in its attention to the death penalty and the effect it had on everyday life and it is the only text

"Brown" in Baltimore  
2011-01-15 Howell S. Baum  
In the first book to present the history of Baltimore school desegregation, Howell S. Baum shows how good intentions got stuck on what Gunnar Myrdal called the "American Dilemma." Immediately after the 1954 Brown v. Board of Education decision, the city's liberal school board voted to desegregate and adopted a free choice policy that made integration voluntary.

desegregation proceeded peacefully, without the resistance or violence that occurred elsewhere. However, few whites chose to attend school with blacks, and after a few years of modest desegregation, schools resegregated and became increasingly segregated. The school board never changed its policy. Black leaders had urged the board to adopt free choice and, despite the limited desegregation, continued to support the policy and never sued the board to do anything else. Baum finds that American liberalism is the key to explaining how this happened. Myrdal observed that many whites believed in equality in the abstract but considered blacks inferior and treated them unequally. School officials were classical liberals who saw the world in terms of individuals, not races.

They adopted a desegregation policy that explicitly ignored students' race and asserted that all students were equal in freedom to choose schools, while their policy let whites who disliked blacks avoid integration. School officials' liberal thinking hindered them from understanding or talking about the city's history of racial segregation, continuing barriers to desegregation, and realistic change strategies. From the classroom to city hall, Baum examines how Baltimore's distinct identity as a border city between North and South shaped local conversations about the national conflict over race and equality. The city's history of wrestling with the legacy of Brown reveals

of dealing with racial issues: not talking about race. This avoidance, Baum concludes, allows segregation to continue.

Modeling Phosphorus in the Environment  
2006-11-14 David E. Radcliffe  
Despite advances in modeling, such as graphical user interfaces, the use of GIS layers, and databases for developing input files, the approaches to modeling phosphorus (P) have not changed since their initial development in the 1980s. Current understanding of P processes has evolved and this new information needs to be incorporated into the current models. Filling this need, Modeling Phosphorus in the Environment describes basic approaches to modeling P, how the current models implement these

approaches, and ways to improve them. The book sets the scene with a review of general approaches to modeling runoff and erosion, P in runoff, leaching of P, stream processes that affect P, and an examination of the important issue of model uncertainty. It describes state-of-the-science watershed-scale P transport models including dynamic semi-disturbed models, models of intermediate complexity, and two lumped models.

Phosphorus Indexes (PIs) represent one end of the modeling spectrum and the book takes a comprehensive look at PIs developed in each state, and illustrates some of the problems encountered when incorporating PIs into farm-scale manure management software. The book discusses

is critical for calibrating models, and concludes with suggestions for improving the modeling of P. From researching mechanisms to applying regulations, the uses of phosphorus models have increased as our knowledge of the effects of phosphorus in the environment has increased. Drawing on contributions from experts, the book gives you the tools to select the model that best fits your needs.

Biology volume covers the various facets of soil enzymes, such as their functions, biochemical and microbiological properties and the factors affecting their activities. Enzymes in the rhizosphere, in forest soils, and in volcanic ash-derived soils are described. Soil enzymes covered include phosphohydrolases, lignocellulose-degrading enzymes, phenol oxidases, fungal oxidoreductases, keratinases, pectinases, xylanases, lipases and pectinases. Several chapters treat the soil enzymatic activities in the bioremediation of soils contaminated with pesticides and pollutants such as oil, chlorinated compounds, synthetic dyes and aromatic hydrocarbons. International Aid and Private Schools for the Poor 2013-01-01 Pauline Dixon  
Pauline Dixon has intellectual rigour and an openness to new ideas, together with compassion and practicality. A great and unusual combination which I admire enormously.  
Dame Sally Morgan, Adviser to the Board, Absolute Return for Kids and former chief advisor to Tony Blair, UK  
This fine book has a powerful message for policymakers and donors: the quality of schools matters even in poor countries; hence, the poor are abandoning failed state schools and enrolling their kids in low cost private schools. Instead of trying to close them down, the state and donors would do well to invest in children.

Using India as an example, Dr. Pauline Dixon examines the ways in which private, for-profit schools might serve as a successful alternative to state-run systems of education in impoverished communities around the world. The Contradictions of American Capital Punishment 2004-11-18 Franklin E. Zimring Why does the United States continue to employ the death penalty when fifty other developed democracies have abolished it? Why does capital punishment become more problematic each year? How can the death penalty conflict be resolved? In The Contradictions of American Capital Punishment, Frank Zimring reveals that the seemingly insoluble turmoil surrounding the

death penalty reflects a deep and long-standing division in American values, a division that he predicts will soon bring about the end of capital punishment in our country. On the one hand, execution would seem to violate our nation's highest legal principles of fairness and due process. It sets us increasingly apart from our allies and indeed is regarded by European nations as a barbaric and particularly egregious form of American exceptionalism. On the other hand, the death penalty represents a deeply held American belief in violent social justice that sees the hangman as an agent of local control and safeguard of community values. Zimring uncovers the most troubling symptom of this attraction to vigilante

mob. He shows that the great majority of executions in recent decades have occurred in precisely those Southern states where lynchings were most common a hundred years ago. It is this legacy, Zimring suggests, that constitutes both the distinctive appeal of the death penalty in the United States and one of the most compelling reasons for abolishing it. Impeccably researched and engagingly written, Contradictions in American Capital Punishment casts a clear new light on America's long and troubled embrace of the death penalty.
