## **The Death of Expertise**

2017-02-01 Tom Nichols Technology and increasing levels of education have exposed people to more information than ever before. These societal gains, however, have also helped fuel a surge in narcissistic and misguided intellectual egalitarianism that has crippled informed debates on any number of issues. Today, everyone knows everything: with only a quick trip through WebMD or Wikipedia, average citizens believe themselves to be on an equal intellectual footing with doctors and diplomats. All voices, even the most ridiculous, demand to be taken with equal seriousness, and any claim to the contrary is dismissed as undemocratic elitism. Tom Nichols' *The Death of Expertise* shows how this rejection of experts has occurred: the openness of the internet, the emergence of a customer satisfaction model in higher education, and the transformation of the news industry into a 24-hour entertainment machine, among other reasons. Paradoxically, the increasingly democratic dissemination of information, rather than producing an educated public, has instead created an army of ill-informed and angry citizens who denounce intellectual achievement. When ordinary citizens believe that no one knows more than anyone else, democratic institutions themselves are in danger of falling either to populism or to technocracy or, in the worst case, a combination of both. An update to the 2017 breakout hit, the paperback edition of *The Death of Expertise* provides a new foreword to cover the alarming exacerbation of these trends in the aftermath of Donald Trump's election. Judging from events on the ground since it first published, *The Death of Expertise* issues a warning about the stability and survival of modern democracy in the Information Age that is even more important today.

## Dying in America

2015-03-19 Institute of Medicine For patients and their loved ones, no care decisions are more profound than those made near the end of life. Unfortunately, the experience of dying in the United States is often characterized by fragmented care, inadequate treatment of distressing symptoms, frequent transitions among care settings, and enormous care responsibilities for families. According to this report, the current health care system of rendering more intensive services than are necessary and desired by patients, and the lack of coordination among programs increases risks to patients and creates avoidable burdens on them and their families. *Dying in America* is a study of the current state of health care for persons of all ages who are nearing the end of life. Death is not a strictly medical event. Ideally, health care for those nearing the end of life harmonizes with social, psychological, and spiritual support. All people with advanced illnesses who may be approaching the end of life are entitled to access to high-quality, compassionate, evidence-based care, consistent with their wishes. *Dying in America* evaluates strategies to integrate care into a person- and family-centered, team-based framework, and makes recommendations to create a system that coordinates care and supports and respects the choices of patients and their families. The findings and recommendations of this report will address the needs of patients and their families and assist policy makers, clinicians and their educational and credentialing bodies, leaders of health care delivery and financing organizations, researchers, public and private funders, religious and community leaders, advocates of better care, journalists, and the public to provide the best care possible for people nearing the end of life.

## **The Death of Ivan Ilych**

2021-11-15 Leo Tolstoy *The Death of Ivan Ilych* Leo Tolstoy - Ivan Ilyich lives a

carefree life that is "most simple and most ordinary and therefore most terrible". Like everyone he knows, he spends his life climbing the social ladder. Enduring marriage to a woman whom he often finds too demanding, he works his way up to be a magistrate, thanks to the influence he has over a friend who has just been promoted, focusing more on his work as his family life becomes less tolerable. While hanging curtains for his new home one day, he falls awkwardly and hurts his side. Though he does not think much of it at first, he begins to suffer from a pain in his side. As his discomfort grows, his behavior towards his family becomes more irritable. His wife finally insists that he visit a physician. The physician cannot pinpoint the source of his malady, but soon it becomes clear that his condition is terminal. Confronted with his diagnosis, Ivan attempts every remedy he can to obtain a cure for his worsening situation, until the pain grows so intense that he is forced to cease working and spend the remainder of his days in bed. Here, he is brought face to face with his mortality and realizes that, although he knows of it, he does not truly grasp it. During the long and painful process of dying, Ivan dwells on the idea that he does not deserve his suffering because he has lived rightly. If he had not lived a good life, there could be a reason for his pain; but he has, so pain and death must be arbitrary and senseless. As he begins to hate his family for avoiding the subject of his death, for pretending he is only sick and not dying, he finds his only comfort in his peasant boy servant, Gerasim, the only person in Ivan's life who does not fear death, and also the only one who, apart from his own son, shows compassion for him. Ivan begins to question whether he has, in fact, lived a good life. In the final days of his life, Ivan makes a clear split between an artificial life, such as his own, which masks the true meaning of life and makes one fear death, and an authentic life, the life of Gerasim. Authentic life is marked by compassion and sympathy, the artificial life by self-interest. Then "some force" strikes Ivan in the chest and side, and he is brought into the presence of a bright light. His hand falls onto his nearby son's head, and Ivan pities his son. He no longer hates his daughter or wife, but rather feels pity for them, and hopes his death will release them. In so doing, his terror of death leaves him, and as Tolstoy suggests, death itself disappears.

## **Death in Literature**

2014-05-02 Outi Hakola Death is an inevitable, yet mysterious event. Fiction is one way to imagine and gain knowledge of death. Death is very useful to literature, as it creates plot twists, suspense, mysteries, and emotional effects in narrations. But more importantly, stories about death seem to have an existential importance to our lives. Stories provide fictional encounters with death and give meaning for both death and life. Thus, death is more than a physical or psychological experience in literature; it also highlights existential questions concerning humanity and storytelling. This volume, entitled *Death in Literature*, approaches death by examining the narratives and spectacles of death, dying and mortality in different literary genres. The articles consider literary representations of death from ancient Rome to the Netherlands today, and explore ways of dealing with death and dying. The discussions also transcend the boundaries of literature by studying literary representations of such socially relevant and death-related issues as euthanasia and suicide. The articles offer a broad perspective on death's role in literature as well as literature's role in

the social and cultural debates about death.

### **The Science of Near-Death Experiences**

2017-01-30 John C. Hagan What happens to consciousness during the act of dying? The most compelling answers come from people who almost die and later recall events that occurred while lifesaving resuscitation, emergency care, or surgery was performed. These events are now called near-death experiences (NDEs). As medical and surgical skills improve, innovative procedures can bring back patients who have traveled farther on the path to death than at any other time in history. Physicians and healthcare professionals must learn how to appropriately treat patients who report an NDE. It is estimated that more than 10 million people in the United States have experienced an NDE. Hagan and the contributors to this volume engage in evidence-based research on near-death experiences and include physicians who themselves have undergone a near-death experience. This book establishes a new paradigm for NDEs.

### *Life and Death at Work*

2013-11-21 Tom Dwyer This book benefited from the financial support of a French Government scholarship between 1976 and 1978. It sponsored a doctoral thesis in which initial theoretical, empirical, and historical reflections on accidents were developed and written while I was a student at the Ecole des Hautes Etudes en Sciences Sociales in Paris. The New Zealand Department of Labour funded a study on industrial accidents and night work during 1979-80. In 1982-83, the award of a postdoctoral fellowship by the University of Canterbury (New Zealand) permitted a first version of this book to be finished. In the summer of 1986-87 the Funda~ao de Amparo a Pesquisa do Estado de Sao Paulo (FAPESP) and the Laboratoire d'Ergonomie et de Neurophysiologie du Travail of the Centre National des Arts et Metiers joined forces to fund a stay in Paris where the second draft of this book was presented in a special doctoral seminar series. The third draft was completed during a 1988 research leave granted by the Conjunto de Ciencia Politica of the Universidade Estadual de Campinas (UNICAMP). On a further research leave from the same unit, and thanks to a postdoctoral fellowship from the Brazilian Conselho Nacional de Desenvolvimento Cientifico e Tecnol6gico (CNPq), final redrafting was carried out between August and October 1990 when I was a visiting fellow in the Science, Technology, and Society Program at Cornell University. I am deeply grateful to these institutions for their generosity.

### **The Post-war Novel and the Death of the Author**

2020-08-07 Arya Aryan This book not only discloses and examines different functions and concepts of authorship in fiction and theory from the 1950s and 1960s to the present but it also reveals, at least implicitly, a trajectory of some of the modes and functions of the novel as a genre in the last few decades. It

argues that the explicit terms of much of the theoretical and philosophical debate surrounding the concept of authorship in the moment of High Theory in the 1980s had already been engaged, albeit often more implicitly, in literary fictions by writers themselves. This book examines the fortunes of the authorship debate and the conceptualisations and functions of authorship before, during, and after the Death of the Author came to prominence as one of the key foci for the moment of High Theory in the 1980s.
