Years passed, and the turmoil of life took them in different directions. But fate, it seems, had not forgotten their undeniable connection. At a chance encounter, at a sentimental reunion, their paths crossed once again. The moment they laid eyes on each other, the flame of their first love rekindled. The same electric spark that had drawn them together years ago was still potent. They felt the same joy that had fueled their teenage romance, but they also felt the reality of their present. Their hearts yearned for the unconditional love they had shared, but their minds grappled with the tangled web of their current lives. They were caught in a conflict of the heart, torn between the alluring memories of their first love and the stability and security of their present. The chapter starts with a conversation on the properties of groups and periods, explaining how Russian chemist Dmitri Mendeleev arranged elements by their atomic weight in increasing order¹. It then dives into the notion of outer electrons and levels of energy of atoms, emphasizing the function of valence electrons in reactions and changes to atomic structures and molecules.
