Region-Building in Southern Africa

2013-07-04 Chris Saunders How successful have Southern African states been in dealing with the major issues that have faced the region in recent years? What could be done to produce more cohesive and effective region-building in Southern Africa? In this original and wide-ranging volume, which draws on an interdisciplinary team of mainly African and African-based specialists, the key political, socio-economic, and security challenges facing Southern Africa today are addressed. These include the various issues confronting the Southern African Development Community (SADC) and its institutions; such as HIV/AIDS, migration and xenophobia, land-grabbing and climate change; and the role of the main external actors involved with the region, including the United Nations, the European Union, the United States, and China. The book also looks at the Southern African Customs Union and Southern African Development Finance Institutions, including the Development Bank of Southern Africa and Industrial Development Corporation, and issues of gender and peacebuilding. In doing so, the book goes to the heart of analyzing the effectiveness of SADC and other regional organisation, suggesting how region-building in Southern Africa may be compared with similar attempts elsewhere in Africa and other parts of the world.

The Kingdon Pocket Guide to African Mammals

2020-09-17 Jonathan Kingdon The essential mammal guide to take on safari, covering every African land mammal. Originally published in 2004, the Kingdon Pocket Guide to African Mammals quickly became the field guide of choice to take on African safaris. Its compact format makes it ideal for use in the field, while its coverage is the most comprehensive currently possible in this format. Adapted from the Kingdon Field Guide to African Mammals, the greatly condensed text focuses on essential information such as identification and distribution, while the author's superb illustrations have been rearranged into an easy-to-use plate format and placed opposite the text. Complex and more obscure groups like the bats and certain rodent families are summarised by genera. Over 500 maps plot the distribution of all larger species, and for smaller mammals the maps show distribution by genus. This is a completely revised second edition of this popular guide. The information and taxonomy have been updated to follow the newly published second edition of the Kingdon Field Guide to African Mammals (2015), and this new edition of the pocket guide contains several new species and illustrations. The maps have been completely replaced and there are now 200 more maps than in the original edition.
