This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The Serpent King 2017-06-06 Jeff Zentner Named to ten BEST OF THE YEAR lists and selected as a William C. Morris Award Winner, The Serpent King is the critically acclaimed, much-beloved story of three teens who find themselves--and each other--while on the cusp of graduating from high school with hopes of leaving their small-town behind. Perfect for fans of John Green's *Turtles All the Way Down*. "Move over, John Green; Zentner is coming for you." --The New York Public Library "Will fill the infinite space that was left in your chest after you finished *The Perks of Being a Wallflower*." --BookRiot.com Dill isn't the most popular kid at his rural Tennessee high school. After his father fell from grace in a public scandal that reverberated throughout their small town, Dill became a target. Fortunately, his two fellow misfits and best friends, Travis and Lydia, have his back. But as they begin their senior year, Dill feels the coils of his future tightening around him. His only escapes are music and his secret feelings for Lydia--neither of which he is brave enough to share. Graduation feels more like an ending to Dill than a beginning. But even before then, he must cope with another ending--one that will rock his life to the core. Debut novelist Jeff Zentner provides an unblinking and at times comic view of the hard realities of growing up in the Bible belt, and an intimate look at the struggles to find one's true self in the wreckage of the past. "A story about friendship, family and forgiveness, it's as funny and witty as it is utterly heartbreaking." --PasteMagazine.com "A brutally honest portrayal of teen life . . . [and] a love letter to the South from a man who really understands it." --Mashable.com "I adored all three of these characters and the way they talked to and loved one another."--New York Times

The Future of Oil 2012-05-01 Ms. Marcelle Chauvet We discuss and reconcile two diametrically opposed views concerning the future of world oil production and prices. The geological view expects that physical constraints will dominate the future evolution of oil output and prices. It is supported by the fact that world oil production has plateaued since 2005 despite historically high prices, and that spare capacity has been near historic lows. The technological view of oil expects that higher oil prices must eventually have a decisive effect on oil output, by encouraging technological solutions. It is supported by the fact that high prices have, since 2003, led to upward revisions in production forecasts based on a purely geological view. We present a nonlinear econometric model of the world oil market that encompasses both views. The model performs far better than existing empirical models in forecasting oil prices and oil output out of sample. Its point forecast is for a near doubling of the real price of oil over the coming decade. The error bands are wide, and reflect sharply differing judgments on ultimately recoverable reserves, and on future price elasticities of oil demand and supply.

Quaternary Dating Methods 2005-09-27 Mike Walker This introductory textbook introduces the basics of dating, the range of techniques available and the strengths and limitations of each of the principal methods. Coverage includes: the concept of time in Quaternary Science and related fields the history of dating from lithostratigraphy and biostratigraphy the development and application of radiometric methods different methods in dating: radiometric dating, incremental dating, relative dating and age equivalence Presented in a clear and straightforward manner with the minimum of technical detail, this text is a great introduction for both students and practitioners in the Earth, Environmental and Archaeological Sciences. Praise from the reviews: "This book is a must for any Quaternary scientist." SOUTH AFRICAN GEOGRAPHICAL JOURNAL, September 2006 "...very well organized, clearly and straightforwardly written and provides a good overview on the wide field of Quaternary dating methods..." JOURNAL OF QUATERNARY SCIENCE, January 2007

Consilience 2014-11-26 E. O. Wilson "A dazzling journey across the sciences and humanities in search of deep laws to unite them." --The Wall Street Journal One of our greatest living scientists--and the winner of two Pulitzer Prizes for *On Human Nature* and *The Ants*--gives us a work of visionary importance that may be the crowning achievement of his career. In *Consilience* (a word that originally meant "jumping together"), Edward O. Wilson renews the Enlightenment's search for a unified theory of knowledge in disciplines that range from physics to biology, the social sciences and the humanities. Using the natural sciences as his model, Wilson forges dramatic links between fields. He explores the chemistry of the mind and the genetic bases of culture. He postulates the biological principles underlying works of art from cave-drawings to *Lolita*. Presenting the latest findings in prose of wonderful clarity and oratorical eloquence, and synthesizing it into a dazzling whole, *Consilience* is science in the path-clearing traditions of Newton, Einstein, and Richard Feynman.

Control Systems for Live Entertainment 2007 John Huntington If you are interested in how control systems and computer networks are used in all areas of live entertainment, *Control Systems for Live Entertainment* is the industry standard reference. With a unique combined focus on computers, networking, art, and practice, this book offers an in-depth examination of control for lighting, lasers, sound, , stage machinery, animatronics, special effects, and pyrotechnics for concerts, theme parks, theatre, themed-retail, cruise ships, museums, special and other events. This new edition also includes: •expanded emphasis on networking technology and practice •complete coverage of important new protocols such as ACN and RDM •completely revised and updated case studies •a completely reorganized and revised structure Drawing on his extensive experience in the field and classroom, author John Huntington clearly explains everything that goes on behind the scenes and inside the machines to bring bold visions to life in real-world settings. * Author's website is a live, updated resource for this audience - visited from control systems technicians in countries around the globe! * Systems formerly solo are now being networked together and audio and lighting techs need this knowledge * Loaded with realistic examples that readers love

International Macroeconomics in the Wake of the Global Financial Crisis 2018-06-13 Laurent Ferrara This book collects selected articles addressing several currently debated issues in the field of international macroeconomics. They focus on the role of the central banks in the debate on how to come to terms with the long-term decline in productivity growth, insufficient aggregate demand, high economic uncertainty and growing inequalities following the global financial crisis. Central banks are of considerable importance in this debate since understanding the sluggishness of the recovery process as well as its implications for the natural interest rate are key to assessing output gaps and the monetary policy stance. The authors argue that a more dynamic domestic and external aggregate demand helps to raise the inflation rate, easing the constraint deriving from the zero lower bound and allowing monetary policy to depart from its current ultra-accommodative position. Beyond macroeconomic factors, the book also discusses a supportive financial environment as a precondition for the rebound of global economic activity, stressing that understanding capital flows is a prerequisite for economic-policy decisions.

The Bottom Billion 2007-05-25 Paul Collier In the universally acclaimed and award-winning *The Bottom Billion*, Paul Collier reveals that fifty failed states--home to the poorest one billion people on Earth--pose the central challenge of the developing world in the twenty-first century. The book shines much-needed light on this group of small nations, largely unnoticed by the industrialized West, that are dropping further and further behind the majority of the world's people, often falling into an absolute decline in living standards. A struggle rages within each of these nations between reformers and corrupt leaders--and the corrupt are winning. Collier analyzes the causes of failure, pointing to a set of traps that ensnare these countries, including civil war, a dependence on the extraction and export of natural resources, and bad governance. Standard solutions do not work,

he writes; aid is often ineffective, and globalization can actually make matters worse, driving development to more stable nations. What the bottom billion need, Collier argues, is a bold new plan supported by the Group of Eight industrialized nations. If failed states are ever to be helped, the G8 will have to adopt preferential trade policies, new laws against corruption, new international charters, and even conduct carefully calibrated military interventions. Collier has spent a lifetime working to end global poverty. In *The Bottom Billion*, he offers real hope for solving one of the great humanitarian crises facing the world today. "Set to become a classic. Crammed with statistical nuggets and common sense, his book should be compulsory reading." --The Economist "If Sachs seems too saintly and Easterly too cynical, then Collier is the authentic old Africa hand: he knows the terrain and has a keen ear.... If you've ever found yourself on one side or the other of those arguments--and who hasn't?--then you simply must read this book." --Niall Ferguson, The New York Times Book Review "Rich in both analysis and recommendations.... Read this book. You will learn much you do not know. It will also change the way you look at the tragedy of persistent poverty in a world of plenty." --Financial Times

Topics in Random Matrix Theory 2012-03-21 Terence Tao The field of random matrix theory has seen an explosion of activity in recent years, with connections to many areas of mathematics and physics. However, this makes the current state of the field almost too large to survey in a single book. In this graduate text, we focus on one specific sector of the field, namely the spectral distribution of random Wigner matrix ensembles (such as the Gaussian Unitary Ensemble), as well as iid matrix ensembles. The text is largely self-contained and starts with a review of relevant aspects of probability theory and linear algebra. With over 200 exercises, the book is suitable as an introductory text for beginning graduate students seeking to enter the field.

The Barristers of Toulouse in the Eighteenth Century (1740-1793) 2019-12-01 Lenard Berlanstein Originally published in 1975. Following the vein of French historiography, many twentieth-century scholars of the French Revolution believed that the middle class of lawyers played a crucial role in the Revolution. In *The Barristers of Toulouse*, Lenard Berlanstein contends with that notion in a case study examining the response of the Toulousian legal community to the French Revolution. Using tax rolls, marriage contracts, and court records as primary sources, Professor Berlanstein argues that class interests--such as a desire to preserve their status in the cultured, conservative urban elite--led many Toulousian judges and lawyers to reject the Revolution and to remain loyal to the aristocratic Parlement. In other words, those in the legal community of Toulouse conducted themselves in ways that were consistent with other members of their social and economic class. To supplement his argument, Berlanstein's integrates methods from the New Social History movement.

Recognition and Management of Pesticide Poisonings (5th Ed.) 2009-06 J. Rount Reigart This 5th ed. is an update and expansion of the 1989 4th ed. This EPA manual provides health professionals with information on the health hazards of pesticides currently in use, and current consensus recommendations for management of poisonings and injuries caused by them. As with previous updates, this new ed. incorporates new pesticide products that are not necessarily widely known among health professionals. Contents: (1) General Information: Introduction; General Principles in the Management of Acute Pesticide Poisonings; Environmental and Occupational History; (2) Insecticides; (3) Herbicides; (4) Other Pesticides; (5) Index of Signs and Symptoms; Index of Pesticide Products. Charts and tables.

The World Until Yesterday 2013-01-10 Jared Diamond From the author of No.1 international bestseller *Collapse*, a mesmerizing portrait of the human past that offers profound lessons for how we can live today Visionary, prize-winning author Jared Diamond changed the way we think about the rise and fall of human civilizations with his previous international bestsellers *Guns, Germs and Steel* and *Collapse*. Now he returns with another epic - and groundbreaking - journey into our rapidly receding past. In *The World Until Yesterday*, Diamond reveals how traditional societies around the world offer an extraordinary window onto how our ancestors lived for the majority of human history - until virtually yesterday, in evolutionary terms - and provide unique, often overlooked insights into human nature. Drawing extensively on his decades working in the jungles of Papua New Guinea, Diamond explores how tribal societies approach essential human problems, from childrearing to conflict resolution to health, and discovers we have much to learn from traditional ways of life. He unearths remarkable findings - from the reason why modern afflictions like diabetes, obesity and Alzheimer's are virtually non-existent in tribal societies to the surprising benefits of multilingualism. Panoramic in scope and thrillingly original, *The World Until Yesterday* provides an enthralling first-hand picture of the human past that also suggests profound lessons for how to live well today. Jared Diamond is the Pulitzer Prize-winning author of the seminal million-copy-bestseller *Guns, Germs, and Steel*, which was named one of TIME's best non-fiction books of all time, and *Collapse*, a #1 international bestseller. A professor of geography at UCLA and noted polymath, Diamond's work has been influential in the fields of anthropology, biology, ornithology, ecology and history, among others.

The Sacraments 2016-03-24 Louis-Marie Chauvet Why, from its very beginnings, has the Church celebrated the sacraments, in particular baptism and Eucharist? Why, from its origin, has faith in Christ, which is expressed in a human, free, just, loving way of living, ruled by the gospel, also been expressed in the language of rites? The Sacraments by Louis-Marie Chauvet offers reflections on the theology, celebration, and pastoral usage of the sacraments. It is a textbook version of Chauvet's, *Symbol and Sacrament* published by The Liturgical Press in 1995 that was acclaimed by theologians as offering a fresh theology of the sacraments from a perspective other than scholastic theology.

Encyclopedia of Caves and Karst Science 2004-08-02 John Gunn The Encyclopedia of Caves and Karst Science contains 350 alphabetically arranged entries. The topics include cave and karst geoscience, cave archaeology and human use of caves, art in caves, hydrology and groundwater, cave and karst history, and conservation and management. The Encyclopedia is extensively illustrated with photographs, maps, diagrams, and tables, and has thematic content lists and a comprehensive index to facilitate searching and browsing.

Homo Symbolicus 2011-11-16 Christopher S. Henshilwood The emergence of symbolic culture, classically identified with the European cave paintings of the Ice Age, is now seen, in the light of recent groundbreaking discoveries, as a complex nonlinear process taking root in a remote past and in different regions of the planet. In this book the archaeologists responsible for some of these new discoveries, flanked by ethologists interested in primate cognition and cultural transmission, evolutionary psychologists modelling the emergence of metarepresentations, as well as biologists, philosophers, neuro-scientists and an astronomer combine their research findings. Their results call into question our very conception of human nature and animal behaviour, and they create epistemological bridges between disciplines that build the foundations for a novel vision of our lineage's cultural trajectory and the processes that have led to the emergence of human societies as we know them.

How To Think Like a Neandertal 2012-01-26 Thomas Wynn In this book, the authors provide a fascinating narrative of the mental life of Neandertals, to the extent that it can be reconstructed from fossil and archaeological remains.

Symbol and Sacrament 1995 Louis-Marie Chauvet This work comes at an opportune hour: a time in which many complain that contemporary theology lacks a general theory of sacraments. Chauvet charts a reorientation in sacramental theology from the scholastic treatments, which appropriated the metaphysical categories of causality and substance to develop an essentially instrumentalist appreciation of grace, in favor of an approach through the category of symbol." In this approach the subject is as much "grasped" (and transformed) by the symbolic representation as is the object being interpreted. Chauvet commands a wealth of scholarship which he deploys to powerful effect. His work in developing a foundational theology of sacramentality will remain the standard for years to come. "

Estimating How the Macroeconomy Works 2009-06-30 Ray C. FAIR Macroeconomics tries to describe and explain the economywide movement of prices, output, and unemployment. The field has been sharply divided among various schools, including Keynesian, monetarist, new classical, and others. It has also been split between theorists and empiricists. Ray Fair is a resolute empiricist, developing and refining methods for testing theories and models. The field cannot advance without the discipline of testing how well the models approximate the data. Using a multicountry econometric model, he examines several important questions, including what causes inflation, how monetary authorities behave and what are their stabilization limits, how large is the wealth effect on aggregate consumption, whether European monetary policy has been too restrictive, and how large are the stabilization costs to Europe of adopting the euro. He finds, among other things, little evidence for the rational expectations hypothesis and for the so-called non-accelerating inflation rate of unemployment (NAIRU) hypothesis. He also shows that the U.S. economy in the last half of the 1990s was not a new age economy.

Sampling Theory and Practice 2020-05-15 Changbao Wu The three parts of this book on survey methodology combine an introduction to basic sampling theory, engaging presentation of topics that reflect current research trends, and informed discussion of the problems commonly encountered in survey practice. These related aspects of survey methodology rarely appear together under a single connected roof, making this book a unique combination of materials for teaching, research and practice in survey sampling. Basic knowledge of probability theory and statistical inference is assumed, but no prior exposure to survey sampling is required. The first part focuses on the design-based approach to finite population sampling. It contains a rigorous coverage of basic sampling designs, related estimation theory, model-based prediction approach, and model-assisted estimation methods. The second part stems from original research conducted by the authors as well as important methodological advances in the field during the past three decades. Topics include calibration weighting methods, regression analysis and survey weighted estimating equation (EE) theory, longitudinal surveys and generalized estimating equations (GEE) analysis, variance estimation and resampling techniques, empirical likelihood methods for complex surveys, handling missing data and non-response, and Bayesian inference for survey data. The third part provides guidance and tools on practical aspects of large-scale surveys, such as training and quality control, frame construction, choices of survey designs, strategies for reducing non-response, and weight calculation. These procedures are illustrated through real-world surveys. Several specialized topics are also discussed in detail, including household surveys, telephone and web surveys, natural resource inventory surveys, adaptive and network surveys, dual-frame and multiple frame surveys, and analysis of non-probability survey samples. This book is a self-contained introduction to survey sampling that provides a strong theoretical base with coverage of current research trends and pragmatic guidance and tools for conducting surveys.

R Companion for Sampling 2021-11-25 Yan Lu The R Companion for Sampling: Design and Analysis, designed to be read alongside Sampling: Design and Analysis, Third Edition by Sharon L. Lohr (SDA; 2022, CRC Press), shows how to use functions in base R and contributed packages to perform calculations for the examples in SDA. No prior experience with R is needed. Chapter 1 tells you how to obtain R and RStudio, introduces basic features of the R statistical software environment, and helps you get started with analyzing data. Each subsequent chapter provides step-by-step guidance for working through the data examples in the corresponding chapter of SDA, with code, output, and interpretation. Tips and warnings help you develop good programming practices and avoid common survey data analysis errors. R features and functions are introduced as they are needed so you can see how each type of sample is selected and analyzed. Each chapter builds on the knowledge developed earlier for simpler designs; after finishing the book, you will know how to use R to select and analyze almost any type of probability sample. All R code and data sets used in this book are available online to help you develop your skills analyzing survey data from social and public opinion research, public health, crime, education, business, agriculture, and ecology.

Rousseau's Venetian Story 2019-12-01 Madeleine B. Ellis Originally published in 1966. This book is primarily a literary study of Rousseau's account of his diplomatic experiences in Venice, contained in book 7 of the Confessions and written in 1769. The author analyzes Rousseau's methods of achieving an artistic rendering of psychological truth in autobiography, as exemplified in his treatment of the events of 1742-1749. Professor Madeleine Ellis contributes to an understanding of Rousseau as a creative artist and positions him vis-à-vis the classical and romantic movements. Ellis collates the text of the Confessions with contemporary correspondence and other documents to show how discrepancies between the two have artistic implications. These implications lead her to define Rousseau's principles and methods as a man of letters and the interrelations of art and truth in his memoirs. In revealing that Rousseau, the memorialist, gives an artistic rendering of psychological truth, Ellis shows Rousseau's attitude toward truth. She does this by following a path of analysis unexplored by previous critics but indicated by Rousseau himself when he says, "It is the story of my soul that I have promised . . . I record not so much the events of my life as the state of my soul as they happened." Ultimately, the objective of this study is to illustrate the artistic means-literary and rhetorical-employed by Rousseau and their implications for the truth he proposed.

Advances in Cardiac Signal Processing 2007-04-25 U. Rajendra Acharya This book provides a comprehensive review of progress in the acquisition and extraction of electrocardiogram signals. The coverage is extensive, from a review of filtering techniques to measurement of heart rate variability, to aortic pressure measurement, to strategies for assessing contractile effort of the left ventricle and more. The book concludes by assessing the future of cardiac signal processing, leading to next generation research which directly impact cardiac health care.

Lighting for Digital Video and Television 2004-01-09 John Jackman Digital video students and enthusiasts must learn lighting fundamentals and techniques to enhance the visual quality of their work. Moreover, since lighting specifications for digital video differ significantly from those for analog video or film, professional videographers and cinematographers must learn how to adapt their lighting skills for this new digital medium to ensure that the final product meets broadcast standards. This complete course in digital video and television lighting begins with how the human eye and the camera process light and color, progresses through the basics of equipment and setups, and culminates with practical lessons on how to solve common problems. It features clear illustrations and real-world examples that demonstrate proper equipment use, safety issues, and staging techniques. Detailed diagrams, figures, and photos illustrate techniques that

enable novices to complete basic lighting setups. This new edition also features a 16-page color insert and new chapters on interview setups and lighting for low budgets.

Methods in Stream Ecology 2011-04-27 F. Richard Hauer Methods in Stream Ecology, Second Edition, provides a complete series of field and laboratory protocols in stream ecology that are ideal for teaching or conducting research. This updated edition reflects recent advances in the technology associated with ecological assessment of streams, including remote sensing. In addition, the relationship between stream flow and alluviation has been added, and a new chapter on riparian zones is also included. The book features exercises in each chapter; detailed instructions, illustrations, formulae, and data sheets for in-field research for students; and taxonomic keys to common stream invertebrates and algae. With a student-friendly price, this book is key for all students and researchers in stream and freshwater ecology, freshwater biology, marine ecology, and river ecology. This text is also supportive as a supplementary text for courses in watershed ecology/science, hydrology, fluvial geomorphology, and landscape ecology. Exercises in each chapter Detailed instructions, illustrations, formulae, and data sheets for in-field research for students Taxonomic keys to common stream invertebrates and algae Link from Chapter 22: FISH COMMUNITY COMPOSITION to an interactive program for assessing and modeling fish numbers

Geostatistics for Environmental Scientists 2007-10-22 Richard Webster Geostatistics is essential for environmental scientists. Weather and climate vary from place to place, soil varies at every scale at which it is examined, and even man-made attributes - such as the distribution of pollution - vary. The techniques used in geostatistics are ideally suited to the needs of environmental scientists, who use them to make the best of sparse data for prediction, and top plan future surveys when resources are limited. Geostatistical technology has advanced much in the last few years and many of these developments are being incorporated into the practitioner's repertoire. This second edition describes these techniques for environmental scientists. Topics such as stochastic simulation, sampling, data screening, spatial covariances, the variogram and its modeling, and spatial prediction by kriging are described in rich detail. At each stage the underlying theory is fully explained, and the rationale behind the choices given, allowing the reader to appreciate the assumptions and constraints involved.

Contemporary Research on Business and Management 2021-11-24 Siska Noviaristanti This book contains selected papers presented at the 4th International Seminar of Contemporary Research on Business and Management (ISCRBM 2020), which was organized by the Alliance of Indonesian Master of Management Program (APMMI) and held in Surubaya, Indonesia, 25-27 November 2020. It was hosted by the Master of Management Program Indonesia University and co-hosts Airlangga University, Sriwijaya University, Trunojoyo University of Madura, and Telkom University, and supported by Telkom Indonesia and Tripura. The seminar aimed to provide a forum for leading scholars, academics, researchers, and practitioners in business and management area to reflect on current issues, challenges and opportunities, and to share the latest innovative research and best practice. This seminar brought together participants to exchange ideas on the future development of management disciplines: human resources, marketing, operations, finance, strategic management and entrepreneurship.

The Film Appreciation Book 2014-11-18 Jim Piper This is a book for cinephiles, pure and simple. Author and filmmaker, Jim Piper, shares his vast knowledge of film and analyzes the most striking components of the best movies ever made. From directing to cinematography, from editing and music to symbolism and plot development, The Film Appreciation Book covers hundreds of the greatest works in cinema, combining history, technical knowledge, and the art of enjoyment to explain why some movies have become the most treasured and entertaining works ever available to the public, and why these movies continue to amaze viewers after decades of notoriety. Read about such classic cinematic masterpieces as Citizen Kane, Gandhi, Midnight Cowboy, Easy Rider, True Grit, Gone With the Wind, and The Wizard of Oz, as well as more recent accomplishments in feature films, such as Requiem for a Dream, Munich, The King's Speech, and The Hurt Locker. Piper breaks down his analysis for you and points out aspects of production that movie-lovers (even the devoted ones) would never recognize on their own. This book will endlessly fascinate, and by the time you get to the last chapter, you're ready to start all over again. In-depth analysis and thoughtful and wide-ranging film choices from every period of cinema history will ensure that you never tire of this reading companion to film. Allworth Press, an imprint of Skyhorse Publishing, publishes a broad range of books on the visual and performing arts, with emphasis on the business of art. Our titles cover subjects such as graphic design, theater, branding, fine art, photography, interior design, writing, acting, film, how to start careers, business and legal forms, business practices, and more. While we don't aspire to publish a New York Times bestseller or a national bestseller, we are deeply committed to quality books that help creative professionals succeed and thrive. We often publish in areas overlooked by other publishers and welcome the author whose expertise can help our audience of readers.

Godard On Godard 1986-03-22 Jean-luc Godard Jean-Luc Godard, like many of his European contemporaries, came to filmmaking through film criticism. This collection of essays and interviews, ranging from his early efforts for La Gazette du Cinéma to his later writings for Cahiers du Cinéma, reflects his dazzling intelligence, biting wit, maddening judgments, and complete unpredictability. In writing about Hitchcock, Welles, Bergman, Truffaut, Bresson, and Renoir, Godard is also writing about himself-his own experiments, obsessions, discoveries. This book offers evidence that he may be even more original as a thinker about film than as a director. Covering the period of 1950-1967, the years of Breathless, A Woman Is a Woman, My Life to Live, Alphaville, La Chinoise, and Weekend, this book of writings is an important document and a fascinating study of a vital stage in Godard's career. With commentary by Tom Milne and Richard Roud, and an extensive new foreword by Annette Michelson that reassesses Godard in light of his later films, here is an outrageous self-portrait by a director who, even now, continues to amaze and bedevil, and to chart new directions for cinema and for critical thought about its history.

Targets, Tracers and Translation - Novel Radiopharmaceuticals Boost Nuclear Medicine 2019-09-20 Gerald Reischl This is the fourth Special Issue in Pharmaceuticals within the last six years dealing with aspects of radiopharmaceutical sciences. It demonstrates the significant interest and increasing relevance to ameliorate nuclear medicine imaging with PET or SPECT, and also radiotherapeutic procedures. Numerous targets and mechanisms have been identified and have been under investigation over the previous years, covering many fields of medical and clinical research. This development is well illustrated by the articles in the present issue, including 13 original research papers and one review, covering a broad range of actual research topics in the field of radiopharmaceutical sciences.

Lake Pavin 2018-07-07 Télésphère Sime-Ngando This book represents the first multidisciplinary scientific work on a deep volcanic maar lake in comparison with other similar temperate lakes. The syntheses of the main characteristics of Lake Pavin are, for the first time, set in a firmer footing comparative approach, encompassing regional, national, European and international aquatic science contexts. It is a unique lake because of its permanently anoxic monimolimnion, and furthermore, because of its small surface area, its substantially low human influence, and by the fact that it does not have a river inflow. The book reflects

the scientific research done on the general limnology, history, origin, volcanology and geological environment as well as on the geochemistry and biogeochemical cycles. Other chapters focus on the biology and microbial ecology whereas the sedimentology and paleolimnology are also given attention. This volume will be of special interest to researchers and advanced students, primarily in the fields of limnology, biogeochemistry, and aquatic ecology.
