needs of young minds of 21 century. The AICTE model curriculum and National Education Policy has driven a new wave in the technical education. The textbook is designed not only to cater the need of the syllabus but also to look things in a different perspective. The Workshop is the place where the core of learning about different materials, equipment, tools and techniques takes place. Basically the workshop used to prepare the small components by hand tools. Sometimes they may be parts of the large machines or may be parts for replacement/repairs. In this text book an attempt has been made to connect the conventional tools usage to advanced machine tools usage. The relevant practical examples are quoted to make the readers more

Human Dimension and
Interior Space
2014-01-21 Julius Panero
The study of human body
measurements on a
comparative basis is
known as
anthropometrics. Its
applicability to the
design process is seen

human body and the

of design. The use of
anthropometric data,
although no substitute
for good design or sound
professional judgment
should be viewed as one
of the many tools
required in the design
process. This
comprehensive overview
of anthropometrics
consists of three parts.
The first part deals
with the theory and
application of
anthropometrics and
includes a special
section dealing with
physically disabled and
elderly people. It
provides the designer
with the fundamentals of
anthropometrics and a
basic understanding of
how interior design
standards are
established. The second
part contains easy-to-

anthropometric tables,

percentile groupings. Also included is data relative to the range of joint motion and body sizes of children. The third part contains hundreds of dimensioned drawings, illustrating in plan and section the proper anthropometrically based relationship between user and space. The types of spaces range from residential and commercial to recreational and institutional, and all dimensions include metric conversions. In the Epilogue, the authors challenge the interior design profession, the building industry, and the furniture manufacturer to seriously explore the problem of adjustability in design. They expose the fallacy of designing to accommodate the so-called average man, who, in fact, does not exist. Using government data,

including studies prepared by Dr. Howard Stoudt, Dr. Albert Damon, and Dr. Ross McFarland, formerly of the Harvard School of Public Health, and Jean Roberts of the U.S. Public Health Service, Panero and Zelnik have devised a system of interior design reference standards, easily understood through a series of charts and situation drawings. With Human Dimension and Interior Space, these standards are now accessible to all designers of interior environments.

Carlson Although the injunction "Know thyself" was inscribed over the site of the Delphic Oracle, the concept is of much more ancient lineage. Thousands of years ago, the wise men of the East had learned to exert authority over a broad range of bodily experiences and functions using techniques that are still taught today. But it is only in the past few decades that the West has become aware once again of the range of control that the central nervous system can maintain over sensation and body function. Medicine has moved slowly in integrating these concepts into the classic medical model of disease despite a growing body of evidence that links emotional state, thought, and imagery to

immunocompetence, tissue healing, and bodily vigor. It is precisely the role of a volume such as this, reflecting a fascinating conference in Munich, to emphasize and reemphasize these ideas. We are fortunately well beyond the sterile behaviorism of Watson with its complete negation of the significance of mental operations. But many still consider suspect those forces and mechanisms, however powerful, that seem to originate from brain-mind activity. The chapters in this book, with their emphases on the mind-body continuum as a bridge to self regulation and health, provide a modern "School of Athens" in bringing these concepts to wider acquaintance.
