Computers and Exploratory Learning

2012-12-06 Andrea A. DiSessa Computers are playing a fundamental role in enhancing exploratory learning techniques in education. This volume in the NATO Special Programme on Advanced Educational Technology covers the state of the art in the design and use of computer systems for exploratory learning. Contributed chapters treat principles, theory, practice, and examples of some of the best contemporary computer-based learning environments: Logo, Boxer, Microworlds, Cabri-Géomètre, Star Logo, Table Top, Geomland, spreadsheets, Function Machines, and others. Emphasis is on mathematics and science education. Synthetic chapters provide an overview of the current scene in computers and exploratory learning, and analyses from the perspectives of epistemology, learning, and socio-cultural studies.

R for Data Science

2016-12-12 Hadley Wickham Learn how to use R to turn raw data into insight, knowledge, and understanding. This book introduces you to R, RStudio, and the tidyverse, a collection of R packages designed to work together to make data science fast, fluent, and fun. Suitable for readers with no previous programming experience, R for Data Science is designed to get you doing data science as quickly as possible. Authors Hadley Wickham and Garrett Golemund guide you through the steps of importing, wrangling, exploring, and modeling your data and communicating the results. You'll get a complete, big-picture understanding of the data science cycle, along with basic tools you need to manage the details. Each section of the book is paired with exercises to help you practice what you've learned along the way. You'll learn how to: Wrangle—transform your datasets into a form convenient for analysis Program—learn powerful R tools for solving data problems with greater clarity and ease Explore—examine your data, generate hypotheses, and quickly test them Model—provide a low-dimensional summary that captures true "signals" in your dataset Communicate—learn R Markdown for integrating prose, code, and results

Probability Via Expectation

1992-05-14 Peter Whittle A textbook for an introductory undergraduate course in probability theory, first published in 1970, and revised in 1976. The novelty of the approach is its basis on the subject's expectation rather than on probability measures. Assumes a fair degree of mathematical sophistication. The Grammar of Graphics

2013-03-09 Leland Wilkinson Written for statisticians, computer scientists, geographers, research and applied scientists, and others interested in visualizing data, this book presents a unique foundation for producing

almost every quantitative graphic found in scientific journals, newspapers, statistical packages, and data visualization systems. It was designed for a distributed computing environment, with special attention given to conserving computer code and system resources. While the tangible result of this work is a Java production graphics library, the text focuses on the deep structures involved in producing quantitative graphics from data. It investigates the rules that underlie pie charts, bar charts, scatterplots, function plots, maps, mosaics, and radar charts. These rules are abstracted from the work of Bertin, Cleveland, Kosslyn, MacEachren, Pinker, Tufte, Tukey, Tobler, and other theorists of quantitative graphics.

Advanced R

2015-09-15 Hadley Wickham An Essential Reference for Intermediate and Advanced R Programmers Advanced R presents useful tools and techniques for attacking many types of R programming problems, helping you avoid mistakes and dead ends. With more than ten years of experience programming in R, the author illustrates the elegance, beauty, and flexibility at the heart of R. The book develops the necessary skills to produce quality code that can be used in a variety of circumstances. You will learn: The fundamentals of R, including standard data types and functions Functional programming as a useful framework for solving wide classes of problems The positives and negatives of metaprogramming How to write fast, memory-efficient code This book not only helps current R users become R programmers but also shows existing programmers what's special about R. Intermediate R programmers can dive deeper into R and learn new strategies for solving diverse problems while programmers from other languages can learn the details of R and understand why R works the way it does.

How to Lie with Statistics

2010-12-07 Darrell Huff If you want to outsmart a crook, learn his tricks—Darrell Huff explains exactly how in the classic How to Lie with Statistics. From distorted graphs and biased samples to misleading averages, there are countless statistical dodges that lend cover to anyone with an ax to grind or a product to sell. With abundant examples and illustrations, Darrell Huff's lively and engaging primer clarifies the basic principles of statistics and explains how they're used to present information in honest and not-so-honest ways. Now even more indispensable in our data-driven world than it was when first published, How to Lie with Statistics is the book that generations of readers have relied on to keep from being fooled.

Exploratory Data Analysis with R

2012-04-19 Roger Peng This book covers the essential exploratory techniques for summarizing data with R. These techniques are typically applied before formal modeling commences and can help inform the development of more complex statistical models. Exploratory techniques are also important for eliminating or sharpening potential hypotheses about the world that can be addressed by the data you have. We will cover in detail the plotting systems in R as well as some of the basic principles of constructing informative data graphics. We will also cover some of the common multivariate statistical techniques used to visualize high-dimensional data. Some of the topics we cover are making exploratory graphs, principles of analytic graphics, plotting systems and graphics devices in R, the base and ggplot2 plotting systems in R, clustering methods, and dimension reduction techniques. The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a well-respected vocabulary test that has been in use for nearly 50 years. Created by Lloyd M. Dunn and Douglas M. Dunn, the evaluation is crafted to assess receptive vocabulary for Standard American English. It is quick and effortless to conduct, conserving important time so that concentration can be put on executing intelligent approaches.

The PPVT-4 test content encompasses a broad array of vocabulary comprehension ranks, spanning from pre-kindergarten through adulthood. The test problems widely feature words that depict 20 subject fields (e.g., actions, vegetables, tools), speech parts (nouns, verbs, attributes), and household and school vocabulary.

The test gives two identical versions which contain different vocabulary items, ensuring that the test-taker has not "learned" the assessment. One form can be utilized ahead of intervention to assess people's vocabulary understanding and the alternative form can be used for re-testing to measure and note improvement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is sensitive to slight changes with time.

The Mystery of the Missing Diamond

It was a shadowy and turbulent night. The downpour was falling heavily, and the wind was whistling. In the middle of the town, there was an exhibition, where a priceless diamond was on exhibit. The diamond was named the African Star, and it was the biggest and most beautiful diamond in the globe. It was secured by a high-tech security system, and a squad of armed guards. No one could pilfer it, or so they believed. But an individual did. Someone managed to get around the security, to evade the guards, to break the window, and to steal the diamond. And no one saw them, no one heard them, no one identified who they were. They departed from no trace, no clue, no evidence. They faded into the night, with the Star of Africa. And the enigma of the missing diamond started.
