Concepts of Biology

2018-01-07 Samantha Fowler Concepts of Biology is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, Concepts of Biology is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

Metabolic Syndrome and Complications of Pregnancy

2015-06-24 Enrico Ferrazzi This book explores the nature of pregnancy and metabolic syndrome as proinflammatory conditions and explains how pregnancy provides a window of opportunity for preventing the lifelong complications of metabolic syndrome, during which key risk factors can be identified and beneficial dietary changes can be implemented. The book's opening sections discuss inflammation in the context of pregnancy, including the nature of the placenta as a proinflammatory tissue. In the main body, it points to new possible connections to truncal obesity, inflammation, metabolic syndrome, and major obstetrical syndromes, including preeclampsia, gestational diabetes and pre-term delivery. Based on the insights offered by this analysis, the remainder of the book focuses on a variety of nutritional measures and diets that can be of benefit during and beyond pregnancy. Readers will learn how the higher level of compliance with medical instructions during pregnancy can be capitalized on to ensure enduring health benefits for mother and child alike.

Bringing the Common Core Math Standards to Life

2014-11-20 Yvelyne Germain-McCarthy As high school math teachers shift to the Common Core State Standards, the question remains: What do the standards actually look like in the classroom? This book answers that question by taking you inside of real Common Core classrooms across the country. You'll see how exemplary teachers are meeting the new requirements and engaging students in math. Through these detailed examples of effective instruction, you will uncover how to bring the standards to life in your own classroom! Special Features: A clear explanation of the big shifts happening in the classroom as a result of the Common Core State Standards Real examples of how exemplary teachers are using engaging strategies and tasks to teach algebra, geometry, trigonometry, statistics, mathematics across the curriculum, and more A detailed analysis of each example to help you understand why it is effective and how you can try it with your own students Practical, ready-to-use tools you can take back to your classroom, including unit plans and classroom handouts

What Makes a World-Class School and How We Can Get There

2017-06-15 James H. Stronge For years, students in the United States have lagged behind students in many other countries on such measures of achievement as the PISA and TIMSS assessments. In an increasingly globalized world, such a gap is worrisome. Armed with statistics, examples, and cautionary tales from Scandinavia to Japan, James H. Stronge and Xianxuan Xu have written a book that can help educators better prepare students and close that gap. In What Makes a World-Class School and How We Can Get There, you will find * Careful analysis of recent international assessment results—what they mean and what can be done to improve them. * In-depth profiles of high-achieving education systems around the globe—their histories, their lessons learned, and what they can teach educators and policymakers in the United States. * Strategies for aligning successful educational approaches from international systems to U.S. schools—which strategies to use, in which subjects, and with which students. * Transformative ideas for cultivating a truly world-class system of schooling—both simple and complex ways to raise the bar for all students, no matter what their background. Educators in every country must ensure that their students are as prepared as possible to lead a future generation of citizens. This thought-provoking and copiously researched book provides educators with a blueprint for radical improvement based on the hard-learned experiences of their peers around the world.

The battle of Transshipment Hubs: PSA vs. PTP

2014-05-13 Janina Bohling Seminar paper from the year 2014 in the subject Business economics - Supply, Production, Logistics, grade: 1,5, Heriot-Watt University Edinburgh, course: Maritime Logistics, language: English, abstract: This assignment reviews the latest status between the Port of Singapore (PSA) and the Port of Tanjung Pelepas (PTP). In November 1999, PTP was officially opened and declared its goal of challenging PSA to become East Asia's leading transshipment hub. Up to then, PSA was the dominant transshipment hub, thus enjoying a monopoly in this business of Southeast Asia. **Study Guide for CTET Paper 2 (Class 6 - 8 Teachers) Social Studies/ Social Science with Past Questions 4th Edition** 2019-10-10 Disha Experts The new edition of the book Study Guide for CTET Paper 2 - English 4th edition (Class 6 - 8 Social Studies/ Social Science teachers), has been updated with the CTET Solved Papers of July 2013 to Sep 2018. • The languages covered in the book are English (1st language) and Hindi (2nd language). • The book provides separate sections for Child Development & Pedagogy, English Language, Hindi Language and Social Studies/ Social Science. • Each section has been divided into chapters.
