It was due the next day. We were out at our family cabin in Bolinas, and he was at the kitchen table close to tears, surrounded by binder paper and pencils and unopened books on birds, immobilized by the hugeness of the task ahead. Then my father sat down beside him, put his arm around my brother's shoulder, and said, 'Bird by bird, buddy. Just take it bird by bird.'"

Performing care 2020-03-26 Amanda Stuart Fisher This electronic version has been made available under a Creative Commons (BY-NC-ND) open access license. This edited collection brings together essays presenting an interdisciplinary dialogue between theatre and performance and the fields of care ethics, care studies, health and social care. The book advances our understanding of performance as a mode of care, challenging existing debates in this area by re-thinking the caring encounter as a performed, embodied experience and interrogating the boundaries between care practice and performance. Through an examination of a wide range of different care performances drawn from interdisciplinary and international settings, the book interrogates how performance might be understood as caring or uncaring, careless or careful, and correlatively how care can be conceptualised as artful, aesthetic, authentic or even 'fake' and 'staged'.

The Yellow Wallpaper Illustrated 2019-07-03 Charlotte Perkins Gilman The story details the descent of a young woman into madness. Her supportive, though misunderstanding husband, John, believes it is in her best interests to go on a rest cure after experiencing symptoms of "temporary nervous depression". The family spends the summer at a colonial mansion that has, in the narrator's words, "something queer about it". She and her husband move into an upstairs room that she assumes was once a nursery. Her husband chooses for them to sleep there due to its multitude of windows, which provide the air so needed in her recovery. In addition to the couple, John's sister Jennie is present; she serves as their housekeeper. Like most nurseries at the time the windows are barred, the wallpaper has been torn, and the floor is scratched. The narrator attributes all these to children, as most of the damage is isolated to their reach. Ultimately, though, readers are left unsure as to the source of the room's state, leading them to see the ambiguities in the unreliability of the narrator. The narrator devotes many journal entries to describing the wallpaper in the room - its "yellow" smell, its "breakneck" pattern, the missing patches, and the way it leaves yellow smears on the skin and clothing of anyone who touches it. She describes how the longer one stays in the bedroom, the more the wallpaper appears to mutate, especially in the moonlight. With no stimulus other than the wallpaper, the pattern and designs become increasingly intriguing to the narrator. She soon begins to see a figure in the

design, and eventually comes to believe that a woman is creeping on all fours behind the pattern. Believing she must try to free the woman in the wallpaper, the woman begins to strip the remaining paper off the wall. After many moments of tension between John and his sister, the story climaxes with the final day in the house. On the last day of summer, she locks herself in her room to strip the remains of the wallpaper. When John arrives home, she refuses to unlock the door. When he returns with the key, he finds her creeping around the room, circling the walls and touching the wallpaper. She excitedly exclaims, "I've got out at last... in spite of you and Jane", causing her husband to faint as she continues to circle the room, creeping over his inert body each time she passes it, believing herself to have become the personification of the woman trapped behind the yellow wallpaper.

Acupuncture Can Help You Quit Smoking

Smoking is one hard habit to break. If nicotine patches and gum doesn't work, perhaps you should try something else like an alternative form of healthcare like acupuncture.

Acupuncture is an ancient practice involving the use of needles. This instrument is inserted into the skin to allow you energy or Qi to start flowing freely around your body and thus help you quit smoking.

When you go visit an acupuncturist for the first time and tell him or her that you want to quit smoking, after answering some questions, the specialist will carry out an examination of your ears and search for areas where the energy is low.

These courses can be chosen on the basis of modules or on an hourly basis. The course material covers the history, theory and techniques of acupuncture. Courses that offer tools such as acupuncture DVD and video are ideal for acupuncturists or students of acupuncture to improve their clinical expertise.

Once you graduate from acupuncture school, some will open their own practice while others will first work for a clinic. Those who decide to be employed will work with other professionals that may include naturopaths, chiropractors and other specialists that are also into Oriental Medicine.

The average acupuncturist makes about \$45,000 a year but this can change in the years to follow as they add years or experience under their belt. This just goes to show that if you work hard, you too will make a fortune. Just make sure that you do this properly for each patient because one mistake could make this all go away.

With the growing acceptance of alternative medicine in Western cultures, acupuncture is quickly becoming a popular practice. More and more people today are choosing acupuncture over western medicine to treat bodily pains, relieve stress, or to promote overall health. If you are thinking about trying acupuncture but are wondering if it is safe or if it's the right treatment for you, the following information may aid you in making a more informed decision.

Description and Origin

Acupuncture is the practice of inserting fine needles into specific points in the body for therapeutic purposes. According to theory, these specific points called "acupuncture points" lie along pathways of the body along which one's vital energy is said to flow. The needles are used to promote free-flow of energy in areas of the body that circulation may have stagnated. Although acupuncture is practiced in many Asian cultures such as Japan, Tibet, and Korea the practice is commonly known to have originated in China.

If you like the school but cannot afford the cost of tuition, find out if they offer scholarships or if they have a grant in aid program. If there are none, then check with the federal government because they should have one and they will give it to deserving students who plan to enroll in a school accredited by the National Commission for Acupuncture and Oriental Medicine.

Some states do not require you to get a license once you graduate from the program. However, if you plan to practice this elsewhere, you should prepare yourself for the state board exam as this is a requirement.

Power perfect day term paper pdf pdf~Acupuncture in the Western World

One of the most debated issues between the East and the West is the use of acupuncture as a western means of medical treatment. Even though this form of medicine has been used as an effective method for over five thousand years in China, there is no concrete evidence from scientific research studies that have proven the healing properties of acupuncture.

Skeptics shrug off the positive effects of acupuncture as merely placebo effects. Believers in acupuncture, however, say that the benefits have simply not yet been proven. Believers promote that the treatment is harmless and can be used as a complement to western medicine.

Although there is an increase in the use of contraceptive methods by adolescents during their first sexual contact, only sixty three percent of the high school students have said to use condom while having sex previously. Adolescents, who use prescription contraceptives, delay their doctor's visit until the time they become sexually active for over a year.

According to a research, youngsters who have participated in sex education programs which gave them knowledge about contraception methods, abstinence, sexually transmitted diseases and youngsters who involved in discussions in order to get a clear picture, used contraceptives and condoms effectively without any increase in sexual activity. Allergies in Adolescents

Allergies are reactions by immune system that are abnormal in nature to stuff that are usually harmless to majority of the people. When somebody is allergic to something the immune system of that person gets confused and thinks that the substance is detrimental to the body. The substances causing allergic reactions are known as allergens. The examples of allergens are dust, food, plant pollen, medicine etc. The body produces antibodies to protect itself from these allergens. The antibodies make certain cells present in the system to let chemicals to mix with the bloodstream and one of them is histamine. This chemical then acts on nose, eyes, skin, lungs, gastrointestinal tract and results in allergic reaction symptoms. Exposure to the same chemicals in future triggers same response to the antibodies again meaning every time one comes in contact with the same allergen, allergic reaction is produced in the body.

Children and adolescents with normal cholesterol level is a thing of the past. Because of the changing lifestyle and junk food trend, even they have a high risk to develop high levels of cholesterol which also increases the risk of developing heart diseases which can affect the blood vessels and the coronary arteries. The main cause of this change is obesity, junk food high in fat, fast food diets, sedentary lifestyle and high cholesterol level in family history. Keeping the blood cholesterol levels at normal is a good way of avoiding high blood pressure and coronary artery diseases.

The blood cholesterol level can vary from individual to individual. Healthy levels of LDL is less than one hundred and thirty milligrams, HDL is greater than thirty five milligrams. If the HDL is less than thirty five milligrams then the adolescent is at a higher risk of developing heart diseases. And LDL more than one hundred and thirty milligrams is dangerous. But a high level of LDL cholesterol is a problem in many citizens of America. And there is an expected increase in number, the figure is unknown, of adolescents who have a family history of high cholesterol levels.

An adolescent or a child who has a parent having high levels of blood cholesterol and family history of heart diseases at an early age, should take cholesterol test from the age of two. Seventy four percent of females above fourteen years and sixty percent of females below fifteen years have reported to have involuntary sex. Fifty percent of the adolescent pregnancies are within the time period of six months after the initial sexual intercourse. More than nine hundred thousand teenagers are reported to have become pregnant every year in the United States. Fifty one percent of the adolescent pregnancies result in live birth, thirty five percent result in induced abortion and fourteen percent result in stillbirths or miscarriages. Four out of ten adolescent females get pregnant, before they turn twenty, at least once. Twenty five percent of adolescent deliveries aren't the mother's first child. When a teenager gives birth to her first child, she increases the risk

of begetting another child. One third of the adolescent parents are themselves result of adolescent pregnancies.

There are many reasons why adolescents choose to become sexually active at an early stage in life. The reasons can be early pubertal development, poverty, sexual abuse in childhood, lack of parent's attention, lack of career goals, family and cultural patterns of early sex, substance abuse, dropping out from school and poor school performance. Factors which discourage an adolescent to become sexually active are stable family environment, parental supervision, good family income, regular prayers, connectedness with parents and living with complete family and both the parents. The factors which are responsible for the consistent use of contraceptive among adolescents are academic success, anticipation for successful future, and involvement in a stable relationship.

There are many medical risks associated with adolescent pregnancies. Adolescents who are less than seventeen years are at a greater risk of developing medical complications, when compared to adult females. The risk is even more in teenagers below seventeen. The weight of the child, given birth by an adolescent, is very low in these pregnancies. It is usually below 2.5 kilogram. The rate of neonatal birth is also three times greater in adolescents, when compared to adults. Other problems caused by adolescent pregnancies are prematurity of the child, birth of underweight child, poor maternal weight gain, poor nutritional status, anemia, STDs and hypertension induced due to pregnancy.

Transformation perfect day term paper pdf pdf-Teens get anemia as they grow rapidly the amount of iron intake may not be enough to keep up with the pace of the growth as it needs more nutrients in this process. In the case of girls they need more iron after puberty and are at risk due to heavy blood loss during menstrual periods. In some cases pregnancies also leads to anemia. Also, teens who diet excessively to lose weight may also be at risk of having iron deficiency. Meat eaters especially red meat eaters are at less risk compared to vegetarians as meat has rich iron in it.

Asthma in Adolescents

Most of the teenagers who have asthma are also allergic to many things. The asthma can get severe even if the people with asthma are exposed to allergens of low grade. Allergies play an important role in asthma cases which are undiagnosed. Other factors that also trigger childhood asthma include upper respiratory infections like colds, second hand smoke, and certain climate conditions like cold air and due to emotional physical expressions like laughing, crying or yelling. However, it is not the end of the road for asthmatics as they can live active and healthy if they manage asthma properly by avoiding asthma triggers, regular intake of prescribed medications, being alert of the warnings and be aware of the ways to deal with an asthma attack.

Life Lessons from perfect day term paper pdf pdf~Self motivation is extremely necessary in losing weight. Because obesity is more a family problem and not an individual problem, the whole family can switch to eating healthy food and exercising regularly. This can make the weight control program a success. Parents can play a major role by boosting the self esteem of their children by concentrating on their strengths and encouraging them, instead of targeting the weight problem. The whole family should eat meals together, instead of eating individually while watching a movie. This helps all the members to focus on the food and the quantity being eaten. If the teenager isn't getting support from his family members, he/she can join support groups which can help towards the goals.
