The Botany of Desire 2002-05-28 Michael Pollan "Pollan shines a light on our own nature as well as on our implication in the natural world." —The New York Times "A wry, informed pastoral." —The New Yorker

The book that helped make Michael Pollan, the New York Times bestselling author of *How to Change Your Mind*, *Cooked* and *The Omnivore's Dilemma*, one of the most trusted food experts in America. Every schoolchild learns about the mutually beneficial dance of honeybees and flowers: The bee collects nectar and pollen to make honey and, in the process, spreads the flowers' genes far and wide. In *The Botany of Desire*, Michael Pollan ingeniously demonstrates how people and domesticated plants have formed a similarly reciprocal relationship. He masterfully links four fundamental human desires—sweetness, beauty, intoxication, and control—with the plants that satisfy them: the apple, the tulip, marijuana, and the potato. In telling the stories of four familiar species, Pollan illustrates how the plants have evolved to satisfy humankind's most basic yearnings. And just as we've benefited from these plants, we have also done well by them. So who is really domesticating whom?

No Small Potatoes: Junius G. Groves and His Kingdom in Kansas 2018-10-16 Tonya Bolden Discover the incredible true story of how one of history's most successful potato farmers began life as a slave and worked until he was named the "Potato King of the World"! Junius G. Groves came from humble beginnings in the Bluegrass State. Born in Kentucky into slavery, freedom came when he was still a young man and he intended to make a name for himself. Along with thousands of other African Americans who migrated from the South, Junius walked west and stopped in Kansas. Working for a pittance on a small potato farm was no reason to feel sorry for himself, especially when he's made foreman. But Junius did dream of owning his own farm, so he did the next best thing. He rented the land and worked hard! As he built his empire, he also built a family, and he built them both on tons and tons and tons of potatoes. He never quit working hard, even as the naysayers doubted him, and soon he was declared Potato King of the World and had five hundred acres and a

castle to call his own. From award winning author Tonya Bolden and talented illustrator Don Tate comes a tale of perseverance that reminds us no matter where you begin, as long as you work hard, your creation can never be called small potatoes.

The Book of the Potato 2015-08-05 T. W. Sanders Excerpt from The Book of the Potato: A Practical Handbook Dealing With the Cultivation of the Potato in Allotment, Garden and Field, for Home Consumption; Also the Pests and Diseases Thereof; Together With Selections and Descriptions of the Most Productive, Best Cooking, and Disease-Resistant Few people recognised prior to 1914 that the British folk would later on have to face the problem of a possible shortage of potatoes for food. Until then we were able to produce, with the exception of the very earliest supplies, which were imported in large quantities from the Canary and Channel Islands, sufficient to meet the then requirements of the population of this country. But since the advent of the great European War, such immense quantities have had to be exported to the front to feed our great army that the supply for home consumption has necessarily been considerably curtailed. Another difficulty in production, too, has arisen in consequence of the military authorities having taken so many of the workers on the land to serve in the forces, that it has not been possible for farmers and market gardeners to plant so large an acreage with potatoes as in former years. It is, therefore, no wonder that our supplies should not be abundant, or that these should increase in value. In face of these facts, it becomes the imperative duty of occupiers of gardens and allotments to cultivate their own supplies, and not rely, as in the past, on obtaining them from the

shop or market. Happily, this fact has already been seriously recognized by country and suburban dwellers, and a greater area of land has been laid under tribute for potato culture than was previously the case.
