The Peabody Picture Vocabulary Test Fourth Edition (PPVT-4) is a widely recognized vocabulary assessment that has been in operation for close to half a century. Developed by Lloyd M. Dunn and Douglas M. Dunn, the assessment is designed to measure vocabulary comprehension for American English. It is quick and simple to administer, conserving valuable time so that attention can be set on applying effective interventions.

The PPVT-4 test material includes a broad range of vocabulary comprehension levels, spanning from pre-kindergarten through adulthood. The test items extensively sample words that represent 20 topic fields (e.g., actions, vegetables, tools), parts of speech (nouns, verbs, attributes), and home and school vocabulary.

The test gives two identical editions which hold different vocabulary items, making sure that the person has not “memorized” the evaluation. One version can be utilized ahead of intervention implementation to assess people’s vocabulary understanding and the alternative version can be utilized for re-evaluation to measure and note improvement. The PPVT-4 also contains a distinctive Growth Scale Value (GSV) which is reactive to small changes over time.
