Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic

2018-12-28 Erokhin, Vasilii Global interest in the exploration of the Arctic has been growing rapidly. As the Arctic becomes a global resource base and trade corridor between the continents, it is crucial to identify the dangers that such a boom of extractive industries and transport routes may bring on the people and the environment. The Handbook of Research on International Collaboration, Economic Development, and Sustainability in the Arctic discusses the perspectives and major challenges of the investment collaboration and development and commercial use of trade routes in the Arctic. Featuring research on topics such as agricultural production, environmental resources, and investment collaboration, this book is ideally designed for policymakers, business leaders, and environmental researchers seeking coverage on new practices and solutions in the sphere of achieving sustainability in economic exploration of the Artic region.

Market and Competition Authorities

2015-03-26 Annetje Ottow Market and competition authorities operate in a complex environment with conflicting stakeholder demands. Balancing the various interests of the authority and stakeholder in an objective and impartial manner is strategic to achieving the goals of the legislation imposed. In a fresh approach examining the actions of an authority when a regulation is applied, Annetje Ottow argues the vital importance of the behaviour of authorities, focusing on five fundamental good agency principles: legality, independence, transparency, effectiveness, and responsibility, or, LITER. These principles provide agencies and those reviewing their actions with a framework for agency design and action. Combining theory and practice to provide insight into agencies' organization and behaviour, this book outlines and analyses behavioural issues using an ecosystemic method, addressing how independent agencies should be assessed, and which principles should apply. Using cases from the Netherlands and the UK, Ottow examines the key processes of authorities against the LITER principles, and opens the debate on 'how to regulate the agency'.

Africa's Economic Partnership with China

2022-11-30 Mussie Delelegn Arega This book examines how increasing Africa-China relations in the fields of trade, development finance and investment have impacted productive capacities and structural economic transformation in sub-Saharan Africa (SSA). The book argues that statistical and empirical evidence shows that China's influence has not substantially altered the fundamentals in Africa, and instead outlines a framework of policy conclusions and recommendations to help achieve transformational growth and development. Despite increased Chinese investments in transport, energy, communications, and manufacturing, sub-Saharan Africa is yet to see tangible economic and development benefits according to the multidimensional Productive Capacities Index (PCI). External trade is dogged by the same problems as during the colonial era, with primary commodities dominating exports to China, and industrial or manufacturing products dominating imports, thereby leaving the region exposed to external economic shocks. The book considers whether there are lessons to be learned from the experience of Asian countries such as Vietnam, proposing pragmatic, coordinated, non-ideological, and non-confrontational policy approaches to development. This book will be of interest to researchers, policymakers, advisors, academics, and practitioners with an interest in development in Africa, and China's increasing role in the continent.

Wellbeing and Schooling

2022-05-05 Ros McLellan Collectively, the research presented in this book revisits, challenges, and rearticulates taken-for-granted wellbeing conceptualisations, policies and intervention frameworks, as critical discussion of wellbeing in relation to children and young people from a variety of socio-cultural, political, and economic settings is still relatively sparse. The contributions work synergistically to generate a sophisticated understanding of children's wellbeing while introducing fresh and context-sensitive approaches. Pre-conceived and taken-for-granted notions of wellbeing are problematised through four sections in (i) Re-examining conceptualisations of wellbeing in educational research and policy; (ii) Focusing on School environments, schooling, and wellbeing; (iii) Examining the significance of cultural contexts; and (iv) Amplifying children's voices. The objective is to help generate new ways of researching and thinking about wellbeing and schooling, that transcend monocultural, monodisciplinary and monomethodological strategies. The book aims to stimulate further theoretical and empirical research, as well as development of effective policies and school interventions which nuance rather than reduce complexity of both education and wellbeing.

Structural Change, Competitiveness and Industrial Policy

2014-06-20 Aurora A. C. Teixeira The onset of the global crisis has emphasised the persistence of substantial differences in development and social progress within the euro area. The specific case of countries located in the southern periphery region has come to the centre stage, due to the harsh economic conditions that all these countries have experienced in the recent past. In the aftermath of the American subprime credit bubble, these countries' high indebtedness raised doubts as to their ability to sustain public finances, with the financial crisis developing and gaining momentum due to the fragilities presented in the economy. To varying degrees of severity,

all of these economies have since been forced to introduce strong fiscal tightening programmes in order to achieve fiscal consolidation, which have translated into recession and rising unemployment. This book undertakes a comprehensive analysis of the causes of the crisis in southern European countries, showing that the 'Achilles heel' of these economies is rooted in the dismal evolution of productivity and in a specialisation pattern excessively based on the so-called 'traditional', low, and low-medium tech industries, which yield low margins, declining export shares and, ultimately, withering international competitiveness. Such evidence suggests that the southern European periphery industrial growth model has reached its limits, demanding a multidimensional policy approach capable of overcoming the magnitude and complexity of the present crisis. Without denying the need to adjust public and private balance sheets, it is argued that finding a sustainable path out of the present problems requires addressing the challenges of productivity growth and competitiveness in the long term.

Urban Mobility Design

2018-11-29 Selby Coxon Focusing from the perspective of the user, Urban Mobility Design investigates how designed mobility and design processes can respond to and drive the emerging social and technological disruptions in the passenger transport sector. Profound technological advances are changing the mobility expectations of city populations around the world. Transportation design is an under represented research area of urban transportation planning. Urban Mobility Design addresses this gap, providing research-based analysis on current and future needs of urban transportation passengers. The book examines mobility from a uniquely multidisciplinary perspective, involving a variety of innovative design and transportation planning approaches. Examines urban mobility from a new perspective Coherently combines current research and practice in transport design, technology, mobility, user behaviour experience, and cultural analysis Utilizes hands-on experiences with transportation manufacturers, transit operators and engineers to bring a practical view on today's mobility challenges Shows how design approaches to problem solving can influence travel behaviour and improve passenger experience
