Post Memes

2019 Daniel Bristow Art-form, send-up, farce, ironic disarticulation, pastiche, propaganda, trololololol, mode of critique, mode of production, means of politicisation, even of subjectivation - memes are the inner currency of the internet's circulatory system. Independent of any one set value, memes are famously the mode of conveyance for the alt-right, the irony left, and the apoliticos alike, and they are impervious to many economic valuations: the attempts made in co-opting their discourse in advertising and big business have made little headway, and have usually been derailed by retaliative meming. POST MEMES: SEIZING THE MEMES OF PRODUCTION takes advantage of the meme's subversive adaptability and ripeness for a focused, in-depth study. Pulling together the interrogative forces of a raft of thinkers at the forefront of tech theory and media dissection, this collection of essays paves a way to articulating the semiotic fabric of the early 21st century's most prevalent means of content posting, and aims at the very seizing of the memes of production for the imagining and creation of new political horizons. With contributions from Scott and McKenzie Wark, Patricia Reed, Jay Owens, Thomas Hobson and Kaajal Modi, Dominic Pettman, Bogna M. Konior, and Eric Wilson, among

others, this essay volume offers the freshest approaches available in the field of memes studies and inaugurates a new kind of writing about the newest manifestations of the written online. The book aims to become the go-to resource for all students and scholars of memes, and will be of the utmost interest to anyone interested in the internet's most viral phenomenon. Dadding It!

2020-04-30 Rob Kemp Bestselling parenting author Rob Kemp (The Expectant Dad's Survival Guide) delivers the ultimate guide to navigating your child's life milestones (0 months to 50 years) and offers advice on how fathers can best play a lasting, impactful or at least vaguely useful role in it. Kids don't come with an instruction manual. (Not that most men would read one if they did). Instead they're shaped by life-forming milestones and learn-as-they-go mistakes which you, as modern, responsible fathers must be there to help them deal with, solve or at least advise upon pretty much from their birth until you've drawn your last breath. This book will give you a head's up on all the defining moments you are guaranteed to experience as a parent. It'll warn you when your life is going to take a change of course, how your child is going to influence the choices you make and give you some practical, knowing, sanity saving methods of dealing with them. Each moment is headlined with a common scenario that dads have

encountered down through generations – but will still come as a shock to you for the first time. And for every milestone moment, landmark action or parenting task to perform there's a sound advice and strategic solutions to help you cope and even discover the purported 'joys' of parenthood...

Everyday Heroes

2012-10-23 Katrina Fried IPPY 2012 Outstanding Book of the Year, Most Likely to Save the Planet (Independent Publisher Book Awards) Nautilus 2012 Gold Grand Winner, General Adult Foreword Reviews 2012 Book of the Year Finalist, Social Sciences Two years ago, photographer Paul Mobley and author and editor Katrina Fried set out to find fifty Americans who had made it their business to improve the lives of others. The result is this groundbreaking book profiling some of America's leading social entrepreneurs whose energy and nonprofit organizations have changed the lives of millions around the world, very often one at a time. From activists who have rallied the support of hundreds of volunteers to bring such necessities as clean drinking water, economic support, and urgent medical care to developing nations, to educational leaders who are using their gifts to elevate the opportunities of the poor and disadvantaged, to crusaders of equal rights and women's advocacy, these are remarkable everyday citizens. Fried interviewed this eclectic and passionate group of people and has written their startling stories, sharing a unique view of their personalities, journeys, and causes. You will meet heroes such as infectious disease specialist, Gary

Slutkin, who returned from Africa (where he reversed the Aids epidemic in Uganda) to reduce street violence in Chicago with stunning success through his organization CeaseFire; Geoffrey Canada, the founder and CEO of the Harlem Children's Zone, whose pioneering efforts to reform education in one of New York's most impoverished neighborhoods has touched thousands of students and families; Susan Burton who after fifteen years in and out of the justice system, rehabilitated herself and started A New Way of Life, which provides housing and support services to formerly incarcerated women in South Central Los Angeles; and Roy Prosterman, a man who has devoted an entire lifetime to securing land rights for the poor throughout the Third World. Their narratives are accompanied by powerful portraits from award-winning photographer Paul Mobley who brings a grace and epic quality to his images of these remarkable people. Traveling the country to capture his subjects where they live and work, Mobley has created a body of images that harnesses the spirit and energy of giving. A complete directory of the organizations founded by the heroes is included. Each American celebrated in these pages is making a profound contribution to bettering our world. Their stories serve as an inspiration and as a reminder of an empowering truth: every human being can and should make a difference.

The writers contend that despite its at times aimless appearance and ostensibly unstructured substance, casual conversation is a highly structured undertaking and performs a crucial role in the social building of reality. The work goes through genuine instances of casual conversations entailing participants varying in age, gender, ethnicity, and socio-economic class¹². Life Lessons from the good guys 50 heroes who changed-Orthopedic Problems in Adolescents

Physical health problems encountered during adolescence can affect the development of the body, if not treated.

There are few anatomic regions, such as spine, knee and ankle, in adolescents which can get orthopedic problems such as Osgood-Schlatter disease, and Slipped Capital Femoral Epiphysis.

Osgood-Schlatter disease is caused due to injury or overuse of the knee which causes swelling and pain in the area below the knee, above the shin bone. The patellar tendon and the soft tissues surrounding it gets inflamed, because of the constant pulling of the area where the tendon joins the below knee. Usually, adolescents who participate in sports actively and are athletic, such as football, basketball, soccer, ballet and gymnastics, tend to get the Osgood-Schlatter disease. Boys of age eleven to fifteen and girls of age eight to thirteen are at greater risk. The reason why adolescents get this problem is that their bones grow faster when compared to the tendons and muscles in this age and because of this the muscles and tendons stretch and become tight.

Accounting Terms – Profit & Loss and Other Terms

Different fields of study make use of certain terms that are not easily understood by others. If you're an accounting student or a professional accountant, you know the different terms used in accounting. One very popular term is profit & loss.

So, do you know what the term means? To start with, you have to determine what profit means. Profit can be referred to as net earnings or net income. Businesses can either sell services or even products. Profit will come from the sales of these services and products. If the costs of running a business are controlled, it can add up to the profits.

Profits are also called ROI or return on investment. However, this term is often limited to securities like bonds or stocks. But still, some companies use ROI to mean short or long term business outcomes. Taxable income is another term for profit.

Researchers have concluded that OCD is usually a family problem and is a disorder of the brain. Streptococcal bacterial infection can create or worsen the condition of OCD. Adolescents with no family history of OCD can also develop it. Most of the adolescents feel embarrassed to talk about their OCDs. They think that people will label them as crazy and this will make them feel ashamed. This will make it difficult for the parents to talk to their children about their OCD, in order to solve them. Parents need to develop good communication skills for this purpose. Parent's support is also very important to the adolescent. Cooperation is extremely important along with treatment, because if the problem is not treated the adolescent will grow into a disturbed adult.

Most of the adolescents with OCD can receive effective treatment. The treatment can include psychotherapy and intake of medications such as fluoxetine, clomipramine, fluvoxamine, paroxetine, sertraline and other serotonin reuptake inhibitors. When OCD is caused due to streptococcal infection, the adolescent can be administered with antibiotics to kill the bacterium which is causing it. Exposure and response prevention behavioral therapy is very useful in solving OCD. In this therapy, the adolescent is wotedly exposed to his/her fears which give him/her obsessive thought. After that he/she is trained to avoid these thoughts and the rituals which he/she carries out to tackle the anxiety.

An adolescent having OCD can also have depression, substance abuse, attention deficit hyperactivity disorder, eating disorders, and other types of anxiety disorders. When a person with OCD and other mental illness, is treated, OCD becomes more difficult to treat and even diagnose.

Amenorrhea is the condition in which the female skips her menses for more than three consecutive menstrual cycles. Amenorrhea is also classified as primary amenorrhea and secondary amenorrhea. Primary amenorrhea develops from the onset of menstrual periods. In this condition, the adolescent might not get periods when she enters puberty. Secondary amenorrhea is a condition where periods become irregular after a period of time and not from the start. There are many causes of amenorrhea such as ovulation abnormality, eating disorders, birth defects, anatomical abnormalities, malnourishment, anorexia, bulimia, pregnancy, over exercising, thyroid disorder, obesity and other medical conditions. Out of these ovulation abnormalities are a common cause for absent or irregular periods. It is a must that an adolescent start getting menses at least by the age of sixteen. If not, anatomical abnormality, birth defect and other medical conditions are the cause. Adolescents who participate in sports actively and are athletic have a lower body fat content because of which they have absent menses. Even because of malnourishment, the body is incapable of sustaining pregnancy. So in turn the body itself shuts down the reproductive system and menses. Extra fat cells in the body interfere with ovulation and that is the reason why obese female have irregular menses. Amenorrhea is treated by dietary modifications, ovulation inhibitors and hormone treatment.

Auriculotherapy or ear acupuncture is one of the variations of conventional acupuncture. In this practice, it is believed that the ear provides a map for all the major bodily organs. A specific area or point on the ear corresponds to a particular organ, such as the heart, kidneys, or liver. Thus, the needles are placed in particular points around the ear and on the ear cartilage.

Staple acupuncture is a method used in smoking cessation, wherein staples are placed for a certain period anywhere on the ear area to provide stimulation.

Here, the acupuncturist lights a small bunch of the dried herb called moxa or mugwort and holds it above the needles. The herb, which burns slowly and gives off a little smoke and a pleasant, incense-like smell,

will never directly touch your body.

Another variation is electrical acupuncture. Here, electrical wires are hooked up to the needles and a weak current runs through it which may cause no or little sensation at all.

Concepts the good guys 50 heroes who changed...In TCM, practitioners adhere to the concept of Qi, or energy flow, and the meridians in which they travel. They use longer needles and insert them deeper in order to reach the acupuncture points. Modern science has found little evidence to prove the existence of these energy channels, but this is the technique that has been used effectively for thousands of years.

In medical acupuncture, the practitioners are graduates of western medical schools. Their application of needles is not based on the traditional acupuncture points, but on anatomic data. These acupuncturists use shorter needles and the insertions are shallower. They also tend to use fewer needles and leave them inserted for shorter periods of time. Adherents to TCM feel this is a watered-down version of the real thing. Nevertheless, many patients have felt relief of symptoms through this method.

Conditions for Puncture Application

There is a broad and extensive list of ailments which can be treated with acupuncture. The conditions run the gamut from asthma to constipation, anxiety to weight loss. Most TCM practitioners believe that any health condition results from an imbalance in Qi flow, therefore amenable to needle therapy. Nicotine is the addictive and toxic substance present in a cigarette. This is the same substance that makes quitting a big challenge for most smokers. The nicotine that you get from smoking will attach itself to the pleasure areas in the brain, making it hard for you to stop. Without a steady stream of this substance, a smoker will tend to feel depressed and uncomfortable.

People who have undergone acupuncture treatment reported that they no longer find cigarettes as tempting or as satisfying. Oftentimes, smoking would leave an awful taste in their mouths prompting them to stop their habit for once. Some patients would even resort to eating mints or lozenges to clear to get rid of the terrible aftertaste. According to skilled practitioners, approximately 7 out of 10 smokers will successfully extricate themselves from their smoking habit after 2 or 3 weeks. While the others are unable to quit totally, these smokers will be able to cut down on their cigarette consumption quite significantly.
